Brian Hill, in Zumbrota,Minnesota,,,, Brian Hill, in
Zumbrota,Minnesota,,,,,,
I always hear and I always see when the U.S.Mail snail mail van comes down the road doggy and I live on.She helps me go out to my snail mail box by the side of the road, on doggy's side of the road.

I reckon your buddies will up and call me a liar again.Where is my money for that old Sunn Guitar Amplifier I sent you? It cost me $79.00 and pocket change to send it to you via UPS.You once emailed told me I would get my money back plus over $100.00, I have some emails here to show that.I think you, Brin Hill, in Zumbrota,Minnesota are a GYP! You stay nice and warm in that cold weather in Zumbrota,Minnesota, Brian Hill.Hey, Brian Hill in Zumbrota,Minnesota, check out the weather here in Jackson,Mississippi. www.halandmals.com

Don't get me wrong, I like Minnesota, I was there in 1956, probally before you was ever boned. (boned)

3000. Lightning EMF Protection using an In-Line Gas Discharge Tube (GDT) {Arc-Plug} Device

Newsgroup: rec.radio.shortwave
Date: 2008-02-03 17:38:48 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <fedca82f-f6a6-4802-92b6-e4e5453448a9@s19g2000prg.googlegroups.com>
Source record: 135918

- -
- - They are a sealed gas tube. However, impurities, leakage...
- - that sort of thing, compromise effectiveness over time.
- - And even a few static strikes will produce some electrolytic
- - action between the electrodes and the gas introducing further
- - impurities. I read an article a some years ago, either on the
- - Universal or the Grove websites, recommending replacement
- - of the gas cartridge every few years as a matter of course.
- -
- - The Transitrap has a replaceable cartridge, in part, for this
reason.
-
- Now you did it! You made me go dig out the paperwork!
-
- From the Alpha Delta data sheet: ...
- Arc-Plug Cartridge replacement is indicated by an increase
- in VSWR during transmitter tune-up, or by a "dead" receiver
- caused by the Arc-Plug Cartridge being shorted due to an
- extremely strong near-miss lightning dischharge.

For the Newbies : Lightning EMF Protection using an
In-Line Gas Discharge Tube (GDT) {Arc-Plug} Device.

Me either, I'm content with my old longwires. Vs are cool, if you plan em right, you can get some great results in a limited space. Just keep the ends off the ground as high as possible. Here's a good program to help you plan a V:

http://www.smeter.net/software/inv_vee.exe

BH

3003. Numbers Station 17.435mhz AM

Hello:

Is there some "general" rule regarding what is USB and what is LSB ?

e.g.

Are all MIL... ?

Or by frequency...?

Or,... ?

Thanks,
Bob

I really like Grundig, I have two of their radios, and have also
bought from them in the past. Most of the radios are made in China,
and Grundig/Eton, is not the same compay as before, but I think the
quality is still there.

Robert11 wrote:

> Is there some "general" rule regarding what is USB and what is LSB ?

Yes, all communications except HAM RADIO ones are USB. Note that this
is a "general rule" as you asked for, and there may be exceptions.

For HAM RADIO, the practice is USB above 10mHz, and LSB below,
but it is not a rule, and the U.S. 60 meter band (5mHz) is required
AFAIK to be USB.

The ham radio practice came about because of a particular military
surplus radio that when added to a carrier generator produced
USB over 10 mHz and when subtracted LSB below it.

This was never made a legal requirement, and by 1980 most ham radios
had both USB and LSB on all bands. It is legal to modify a commercial
radio for ham use, and therefore sometimes you hear people using USB
only commerical radios on the ham bands.

Millitary communications are often USB even up into the VHF/UHF range.

Geoff.

From Wikipedia

GENERAL RULE (MAY VARY)
a.. SSB: Single sideband(USB/LSB): This is used for long-range
communications by ships and aircraft, for voice transmissions by amateur
radio operators, and for broadcasting. LSB is GENERALLY used below 9 MHz
and USB above 9 MHz.

Example - Amateur radio operators can operate either LSB or USB on any Ham
band except the
60 Meters (5.3 MHz) which is USB only.

But most Hams follow the convention of LSB below 9 MHz and USB above 9 MHz
(except 60 meters)

Most of the shortwave broadcast stations seem to be USB

Bob - Good Questions :o) ~ RHF

ABOUT - Single Side Band
http://en.wikipedia.org/wiki/Single_Side_Band
-Claims- In Amateur Radio, LSB is traditionally used
below 10 MHz and USB is used above 10 MHz.

However Read - LSB/USB Chaos on the Bands...
-by- Peter (VK3KCG) on August 1, 2003
http://www.eham.net/articles/5913

FWIW - It has alway been my understanding :
* Generally "LSB" {Lower-Side-Band} is used by Amateur {Ham}
Radio Operators BELOW 7 MHz. {7,000 kHz}
* Generally "USB" {Upper-Side-Band} is used by Amateur {Ham}
Radio Operators ABOVE 7 MHz. {7,000 kHz}

US Navy AFN Shortwave Radio uses "USB" {Upper-Side-Band}
* Current AFN / AFRTS Shortwave Radio High Frequencies
AFN-SW - http://myafn.dodmedia.osd.mil/ShortWave.aspx

WWV and WWVH use a 'modified' Double Side-Band {DSB}
http://en.wikipedia.org/wiki/WWV_%28radio_station%29
with Suppressed Carrier (DSB-SC) for their Time Signal
Transmissions on 2.5 MHz, 5 MHz, 10 MHz, 15 MHz
and 20 MHz. WWV => http://tf.nist.gov/stations/wwv.html

Many/Most Commercial High Frequency (HF) Broadcasts
use "USB" {Upper-Side-Band}
http://radionut53.tripod.com/id213.html

CB {Citizens Band} Radio uses both LSB and USB.
http://en.wikipedia.org/wiki/Citizens'_band_radio
http://www.tech-faq.com/cb-citizens-band-radio.shtml

Nah, most of the shortwave broadcast stations use AM.

Never heard of a true PayPal hack; the 'compromises' stem from 'phishing'
emails sent to PayPal users who don't check the email headers for routing
and origin and fall prey by visiting sham sites' URLs. When using the
PayPal website, the URLs should always start with 'https'.

Michael

There have been shortwave broadcasts in SSB over the years. They are very attractive to broadcasters as they use far less power than AM. They never really caught on because their target audience did not have SSB capable receivers.

Note that the U.S. Armed Forces Radio Network transmissions are not broadcasts, because they are not intended for the general public.

Geoff.

Some of those phishing sites do a good job of mimicking
an Ebay page.

So, if you never had a Paypal account, how
in hell could they obtain/hack your ID "through" paypal?

"Is "Technology Killing the Radio Star"?"

From the Sunday Times of London:

The days of turning on the radio to hear inane DJs rambling, or the same irritating adverts being repeated hour after hour, could almost be over.
A million Brits are now tuning in to personalised stations online every week, and many are also tuning out traditional radio.

Taking personalised radio fully mobile, although it's available only in the US for now, is Slacker.com's Portable Radio Player (from $200/£100). Launched this week, it comes preloaded with up to 40 stations containing thousands of tracks. As you rate individual tracks, Slacker learns your tastes and refreshes the player's built-in memory with other songs, using your wi-fi connection.

Personalised broadcasts of the future will probably have either advertising or a price tag attached, just as they do today. But once your radio knows exactly what you want to hear, the idea of a human DJ - however cheeky his banter - might start to sound a little dated.

In Germany last week, Digital Audio Broadcasting (DAB), the service that offers easier tuning and catchup facilities to radio listeners, had its funding cut because of poor take-up. One reason was that consumers were switching to listening online, a classic case of a new technology being overtaken by an even newer one before it has had a chance to take hold (remember how laser discs were overtaken by DVDs?).

In Britain, a survey by Rajar, the research organisation, revealed that one in six listeners to personalised radio were listening to less live radio than ever before. Might this all signal the beginning of the end for music radio as we know it?

Now let's sort out some of this.

The difference between radio as it is now (in the US) and what's being described here is a difference between passive and active listening.

That is, the more "into music" or "active" you are, the more apt you are to happily invest the time and effort (not to mention the money) required to dramatically better fulfill your musical tastes. That, in essence, is what personal radio is about, because the very act of personalization requires personalizing by the user. And that's a task that some are up for and many are not.

So, in other words, the folks who want their music to flow over them without any effort and aren't really that into music to begin with (and this describes a lot of people) are unlikely to be seduced by these technologies.

For the other folks, however, the writing is on the wall, radio.

Over the long haul I fully expect the influence of music-oriented radio to diminish. Because music, my friends, is a commodity. Not only can anyone string together a playlist, but nobody can string together my favorite playlist better than I can.

Note, too, the fascinating reference to DAB (the European equivalent to HD radio), where the analogy is made between digital radio and laser discs. The fact is that all technology is transitional - the only question is how long you have between transitions. This is the first time I've seen any evidence to suggest that Internet radio is killing digital radio. Food for thought, folks. And not likely to surprise any reader of this blog in the least.

Finally, note the survey indicating that a fraction of personalized radio listeners were listening to less terrestrial radio, now that they could have their own customized version of it. The most amazing thing about this result to me is that the number is so low! Only one in six? When you can have exactly what you want? Again the difference between "passive" and "active" listening (sure, some folks want to be introduced to new music by human beings - a "curated" music experience. But nobody ever said those human beings need to have their own radio show).

What it all adds up to is the gradual near-obsolescence of music radio, not in a blink, but by a slow and persistent siphoning of audience and attention and interest and advertisers. This process will take years to happen.

Let me be painfully clear: If radio doesn't wake up and smell the coffee the future will bring lower-rated music stations and a disappearance of those stations which are driven by new music and music fans. We will be left with an audience that is older, less affluent, more multi-lingual, and perhaps less engaged in the medium of radio and the advertisers who support it.

Indeed, we're seeing this play out in Alternative and Active Rock and in the erosion of time spent listening among younger audiences already.

What a fabulous opportunity for non-music radio. What a fabulous opportunity for new non-music experiments (which may or may not be "Talk"). What a fabulous opportunity for radio to plant its flag in the future, given that so much of that future can be seen coming now.

Once upon a time, radio was built by programs, many of them non-music.

Then along came TV, and much of radio retreated into the world of music, which it could own.

The exclusive ownership is no more.

And now the pendulum swings back....

Ebay instructs you to open the email, do not click on any links, and then
forward it to spoof@ebay.com.
Lately there's been a lot of phoney Ebay emails sent out telling you that
your account has been restricted or it's overdue etc. The emails look
official. I still have them, scanned for viruses and tucked away on a
floppy.
Not as many are being received after notifying Ebay. Still the odd one
though.

I get these notices all the time. They are just phishing expeditions by
someone who is trying to get my personal information so they can steal from
me......I just ignore them........I can go to my account on both eBay, and
Pay Pal, and sign on using my keyword, and inspect my balances and
outstanding payments and/or purchases. If they are clear, then I know the
emails are bogus.

SAN-EARTH M5C Conductive Cement for Grounding Systems

http://www.sankosha-usa.com/sanearth.asp

SAN-EARTH is used to build Conductive Concrete Grounding Electrodes.

SAN-EARTH absorbs moisture from the surrounding soil
and hardens to become a Conductive Solid.

SAN-EARTH covered Copper Electrodes last ten times longer
than Bare Copper Ground Wwires.

Note - The surface area of the Electrode is dramatically
increased, Resistance to Ground is substantially reduced
and surge Impedance is lowered significantly.

SAN-EARTH Electrodes provide the low Resistance Ground
that is essential to any Lightning Protection System.

SAN-EARTH Technical Review
http://www.sankosha-usa.com/pdf/san-earth-tech.pdf

Typical Installation of an In-the-Ground Radial
{Lateral Electrode} using San-Earth.

I never heard of this. If it didn't come out of Japan, I'd suspect it
was snake oil. However, googling I found other conductive concrete
links. This one looks pretty cool:
http://www.cement.org/tech/cct_con_design_conductive.asp

3041. Just got Terk AM Loop/SuperRadio III

Newsgroup: rec.radio.shortwave
Date: 2008-02-04 03:11:16 UTC
From: Count Floyd <CountFloyd@MonsterChillerHorrorTheater.com>
Message-ID: <BJ4mQCBKg9HM-pn2-qy32LM28lr3K@localhost>
Source record: 135959

Just got this combo for Christmas, hooked it up and am getting
hundreds of stations never even dreamed of coming in almost like
locals. I am in SE Florida, one mile from the Ocean in Hobe Sound,
and am picking up WBZ 1030, WCBS 880(nulling out Radio Progresso),
WPHT 1210, WINS 1010 in NYC and a host of other East Coast stations.
Seems like a great combo.

The score? 4000 to 1000000.

==========
As if to underscore that fact, more than 60 Iraqis were killed and
another 88 were wounded in a massive bomb blast in a market place in
Iraq three days ago. Nearly 600 Iraqis were killed in various bomb
blasts and other attacks in January 2008, raising the tally of Iraqi
civilians killed since the US invasion and occupation of Iraq began in
March 2003 to over one million. The latest round of violence in January
gives the lie to the Bush administrationï¿½s oft-repeated claim that the
so-called ï¿½surgeï¿½ in the number of US troops in the country is working
and has reduced the incidents of violence.

You can add 9 more innocent civilians to the score. The US "heroes" just admitted to the crime an hour ago. More parades for the American "heroes" are no doubt being planned as you read this. Truly pathetic.

By LAUREN FRAYER, Associated Press Writer 1 hour, 16 minutes ago

BAGHDAD - The U.S. military said Monday that it accidentally killed nine Iraqi civilians during an operation targeting al-Qaida in Iraq south of Baghdad.

The civilians were killed Saturday near Iskandariyah, 30 miles south of the Iraqi capital, U.S. Navy Lt. Patrick Evans told The Associated Press. Three more civilians were wounded and taken to U.S. military hospitals nearby, he said.

The incident and the events surrounding it are under investigation, Evans said.

The killings occurred as U.S. forces pursued suspected al-Qaida in Iraq militants in the area. Shortly after the incident, American officers met with a Muslim sheik representing citizens in the area, he said.

"We offer our condolences to the families of those who were killed in this incident, and we mourn the loss of innocent civilian life," Evans said in a statement e-mailed to the AP.

Saturday's strike was the deadliest known case of mistaken identity in recent months.

In November, a leader of one of the so-called awakening councils -- Sunni tribesmen allied with American forces fighting to oust al-Qaida from their hometowns -- said U.S. soldiers killed dozens of his

fighters during a 12-hour battle north of Baghdad.

The leader, Mansour Abid Salim of the Taji Awakening Council, accused American troops of mistaking his men for militants. The U.S. military admitted killing 25 men, but said they were insurgents operating "in the target area" where al-Qaida was believed to be hiding.

The U.S. military investigated that incident, but the two versions of events were never reconciled.

A month later, the U.S. military said its forces accidentally killed two people during a raid in Baqouba, northeast of Baghdad, and that one of them was later revealed to be an awakening council member.

The news this week is that the MWB comeback tour is failing miserably.
Although he is as clueless as ever, any other noted Troll is much
farther ahead trashing threads except for Billy who also put in a
pretty weak showing.

Statistical analysis of postings show that m II has become less
disgusting this week. Could this trend continue to the point that he
appears to be a normal individual?

Cuhulin is back in style just not in volume.

That new pipe mixture of coal tar and DeoxIT just didn't seem to light
a fire under the David the nowhere-man. It did get a few short lived
raves out him though.

David Eduardo again spent most of his time posting about the most
important subject in the increasingly warming world, which is the life
and times of the uber cultural David Eduardo.

This weekï¿½s clueless poster boy award goes to RHF where every post is
an unwanted Google search result with added punctuation for that extra
touch of incomprehension.

Congratulations RHF.

A special note this week goes out to Burr.

Dear Mr. Burr,

Trolling is serious business that is best left to professionals. I know
they make it look easy but generally it takes a serious mental
deficiency or psychiatric problems to reach the level of performance
exemplified by the gentlemen in the competition listing above.

My advice is don't try it.

End

This has been another installment of the RRS no-spin clueless factor report. Good night and good listening.

3.5835 MHz is in the 80m ham band.
They have a couple MFSK modes.
Your recording sounds different though.
What mode was your radio in, USB? AM?

Sorry, forgot to mention CW, 2kHz filter. I have a collection of digital mode audio samples but nothing quite matches; I'd like to add samples of esoteric modes like Hell*, THROB, OLIVIA, etc. but would need to do it over the air since some of these involve FM, PSK, SSB, etc. and can't be recorded directly from an encoder.

Just finished having a little chat with a general manager for several radio stations here in West Virginia. A few of them are transmitting HD. This poor fellow is still under the illusion that HD radio is set to take off like a rocket. He sites Ford's decision to make HD radio an option for '08 and thinks that other auto manufacturers are on the verge of announcing their introduction of HD radio as an option. I informed him that the local Best Buy has had the same two RCA HD-100 radios on the self for several months with no takers and that the local Ford deal was unaware of the HD radio option. How detached can these people be? It's no wonder listeners are dropping like flies.

The interesting thing about all this is that one of the HD FM stations has a very annoying buzz on the analog transmission side that I suspect is being cuased by poor implementation of the Hybrid Digital equipment and it's been there for months. This poor fellow informed me that it's a defective microphone in one of the studios. Funny thing, it occurrs during music and remote network news. Who does he think he's fooling. It's obvious to me that he nor anyone else is listening close enought to discover the wonders of HD radio.

Typical Radio response: Deny, Deny, Deny. But then, in all fairness, that's a typical response throughout the culture, these days.

They're still running heavy HD promos here in the Windy. What's not happening is promotion based on content. They're selling all the things that are secondary to listeners: Audio quality, digital clarity. And some listeners have noted that in higher noise listening environments, the HD stream is definitely not as easily appreciated as the more highly processes analog stream. Further, after decades of highly processed, loudness war audio, many listeners are finding the less processed sound of the HD stream less appealing. And finally, as you've suggested, HD isn't being uniformly well implemented. Resulting in poor first time listener experiences. It's very hard to come back from that kind of first contact deficit.

And the one thing that's rarely discussed, is that the public, in the main, doesn't really understand the concept of audio quality on the same level as the engineers who built this stuff. Look at the number of half-baked, 'drug-store electronics' stereo systems being sold today. Less than $100, but all have 5 band graphic equalizers on the panel. And speakers that would make the engineers at Ten-Tec laugh. Talking 'audio quality' to owners of such hardware creates an entirely different

expectation of performance than it does to guys like me with more invested in the speakers in his living room than he does the SUV in the garage.

Selling audio quality is, at best, a hit or miss proposition...because so much of the perception depends on experience exposure, and quite frankly the interest in knowing what sounds good, or bad, and why. Most users of radio simply don't know. Nor do they care to do the math to find out.

Instead, HD should be selling content. But they can't, because the thrust of the effort is in producing the baseband audio in "HD Quality" on the digital stream. Supplementary content is spotty at best. And usually poor, because there is little or no budget to support it. Advertising on the HD supplementary streams is insufficient, at this stage to make the supplementary audio streams self supporting. So, at best, the efforts that I've heard, are half-assed.

Here in Chicago, they're never mentioned. To date, no one but Roe Conn on WLS has mentioned that WLS is carried on the WZZN secondary HD stream. For guys up here who have trouble receiving WLS AM due to the noise, having WLS on an HD stream of a station we CAN receive is a big plus. WZZN hasn't mentioned it once. This is just one example. There are dozens of others representing a sizable missed opportunity to sell this system on content...which is where listening is rooted.

Until stations begin to sell based on CONTENT, most of HD's marketing efforts are self-defeating.

There are signs that HD isn't entirely dead. And getting it in the hands of listeners in the car will certainly help. Controlled environment listening, newfangled-ness...all will help secure exposure. But if it doesn't work as expected...it can work as promised, but the EXPECTATION is often different, even when the promise is clearly defined...if it doesn't work as expected, HD will have signed it's own death certificate.

The first stumbling attempts to get HD in the ears of the public were staggeringly disappointing. And those were the Innovators and Early Adoptors. Burn them once and they move on. And without them, and their buzz....Belongers and Late Adoptors will not make the move.

As presented, so far, HD is a solution in search of a problem. And short of an FCC mandate, there's not a lot of reason to suggest that the rate of uptake will improve.

Regardless of all the hype about improved audio quality and all the other nonsense, this guy was unaware that this HD FM transmitter was having problems (and for months I might add) and when confronted made some lame excuse about a bad microphone.

Now I'm not an expert but it seems that if your going to tout the benefits of HD radio why would you let a bad microphone spoil them for you?

Well, see, now there you go making sense, again. Stop it.

He's trying to tell you it's a small matter that's creating the issue you've described. That it's not a problem with his radio station, that it's a problem with a manufacturer's microphone. Not his fault.

I know, I know....it doesn't make sense in the real world. But I've heard arguments like this at radio stations across the country. He doesn't understand what's going on...so he's trying to insure that you don't either.

It's one of the huge problems facing this new technology.

"And finally, as you've suggested, HD
isn't being uniformly well implemented. Resulting in poor first time
listener experiences. It's very hard to come back from that kind of
first contact deficit."

"Is HD Radio Toast?"

"There are serious issues of coverage. Early adopters who bought HD
radios report serious drop-outs, poor coverage, and interference. The
engineers of Ibiquity may argue otherwise and defend the system, but
the industry has a serious PR problem with the very people we need to
get the word out on HD... In other words, everything you can find on
the regular FM dial... The word has already gotten out about HD Radio.
People who have already bought an HD Radio are telling others of their
experience (mostly bad) and no amount of marketing will reverse this."

http://www.fmqb.com/article.asp?id=487772

You've got that right!

"What Are We Doing to Ourselves, Exactly?"

"IBOC FM Interference Has Been Reported in Several Cases Where FCC Contours Provide Inadequate Protection."

http://tinyurl.com/yt286v

"HD Interference: Not Just For AM Anymore"

"Radio World Engineering Extra dropped a bomb this month with a very provocative cover story: 'What Are We Doing to Ourselves, Exactly?' Written by Doug Vernier, the man who authored the technical specifications for an ongoing Corporation for Public Broadcasting-sponsored HD Radio interference analysis, the report is the first of its kind to document interference between FM-HD stations around the country. Using anecdotal reportage, some sophisticated contour-mapping, and presumably 'early data' from the CPB study, Vernier's article conclusively proves how stations running in hybrid HD/analog mode can (and do) interfere somewhat significantly with not only themselves, but their neighbors on the FM dial."

http://diymedia.net/archive/1207.htm#122307

Yup, HD Radio also jams itself and others on FM.

Here's the scoop on Ford and HD Radio:

"DEAD AIR: Radio's Great Leap Forward stalling in the Valley"

"Nearly two years after the Valley's four Clear Channel stations went
HD, several high-end car manufacturers have promised to offer HD
radios as an option on new models. But while Ford announced in
September that it offers the radios as dealer-installed upgrades -- as
have Mini, Volvo, Jaguar and BMW -- local Ford and Lincoln dealers had
not heard of HD and said they don't offer the option."

http://www.themonitor.com/news/radio_7098___article.html/digital_new.html

"Are Ford and HD Radio in Sync?"

"The radio industry will, of course, promote Ford for free in exchange
for this development as part of the presumably soon-to-expire pledge
of airtime to the HD radio effort."

http://www.hear2.com/2007/09/are-ford-and-hd.html

"Ford, Lincoln And Mercury vehicles to feature factory-installed HD
Radio Technology in 2009"

"Ford Motor Company today became the first US automaker to announce the availability of factory-installed HD Radio(tm) technology as a standard or optional feature on Ford, Lincoln and Mercury vehicles beginning in calendar year 2009."

http://www.prdomain.com/companies/F/FordMotor/newsreleases/20081851249.htm

"No HD for Ford 2009"

"Kind of a downer to close out the year, and a possible warning for the future... a family member works in Detroit on auto designs for future years, and the audio systems that go in them. During a recent holiday chat, he informed me that he was just about to wrap up the work for Ford 2009 models. 'So they have HD tuners, right?' I asked. Well, no they don't he responded. They are loaded and ready for Sirius radio, THX sound as an option, many other lovely audio treats, but unless requested custom by the buyer, HD will not be included in the 2009 audio systems. I find this bit of news to be very very troubling. It also adds to my growing fears that while it 'seemed like a good idea at the time' spending $250,000 to upgrade our signal to HD was a HUGE waste of time and money. Sure, we did some much needed upgrading of our transmitter site, beefed up the infrastructure and wiring, but I think we could have done it for less than a 1/4 mil. It would be less than kind to suggest that we're being taken for a ride on this, but with virtually no interest from consumers and no support from industry leaders, it sure feels that way."

H(D)appy New Year
Joe Vincenza
WUWF Public Media, Pensacola

http://lists.radiolists.net/pipermail/broadcast/2007-December/065882.html

"Ford Gets More Sirius"

"Sirius Satellite Radio and Ford announced today that they are targeting a 70% installation rate for the Ford and Mercury brand of automobiles. Ford had previously announced that their Lincoln brand was effectively at standard equipment. This commitment with the Ford and Mercury brands is a substantial step for Sirius, as it brings Ford up to a similar installation pace as Chrysler."

http://siriusbuzz.com/ford-gets-more-sirius.php

"Ford to make Sirius Factory Standard in Canada"

"Here's some incredible news for Sirius Canada: Ford of Canada has announced that they will make Sirius Satellite Radio a factory-standard feature in virtually all Fords sold in Canada, by the end of 2007. That's a total of 20 vehicle lines. Absolutely great news, and hopefully a sign of things to come for the U.S."

http://www.orbitcast.com/archives/ford-to-make-sirius-factory-standard-in-canada.html

"Ford SYNC, HD Radio and the state of competition"

"Now here's the killer: Ford is making SYNC available as a factory-installed option for just over $300. And for the top-end trim levels, like the Focus SES, it'll be a standard feature."

http://www.orbitcast.com/archives/ford-sync-hd-radio-and-the-state-of-competition.html

"Radio: Internet Radio or HD Radio. You choose!"

"The first video is a pitch from Ford for their new optional SYNC, which, among many other things, allows one to listen to any Internet Radio from anywhere in the world... I searched in vain for a Ford pitch video on HD Radio but, wisely, they didn't do one."

http://gormanmediablog.blogspot.com/2007/10/blog-post.html

"iBiquity Digital Investor Information"

"iBiquity's investors are global leaders in the technology, broadcasting, manufacturing, media and financial industries all supporting the development and rollout of HD Radio broadcasting: Leading Manufacturers include Ford Motor Company, Visteon Corporation...."

http://www.ibiquity.com/about_us/investor_information

"Lincoln Mercury, Visteon and iBiquity to Showcase HD Radio?"

"Both Ford and Visteon have agreements with iBiquity Digital, the sole developer and licenser of digital AM and FM radio in the United States, with Visteon already developing HD Radio capable OEM receivers for the 2004 model year."

Doubtful, that there would ever be a mandate:

"Digital Audio Broadcasting Systems and Their Impact on the
Terrestrial Radio Broadcast Service"

15. We will not establish a deadline for radio stations to convert to digital broadcasting. Stations may decide if, and when, they will provide digital service to the public. Several reasons support this decision. First, unlike television licensees, radio stations are under no statutory mandate to convert to a digital format. Second, a hard deadline is unnecessary given that DAB uses an in-band technology that does not require the allocation of additional spectrum. Thus, the spectrum reclamation needs that exist for DTV do not exist here. Moreover, there is no evidence in the record that marketplace forces cannot propel the DAB conversion forward, and effective markets tend to provide better solutions than regulatory schemes.

16. iBiquity argues that in the early stages of the transition, the Commission should favor and protect existing analog signals. It states that this could be accomplished by limiting the power level and bandwidth occupancy of the digital carriers in the hybrid mode. At some point in the future, when the Commission determines there is sufficient market penetration of digital receivers, iBiquity asserts that the public interest will be best served by reversing this presumption to favor digital operations. At that time, broadcasters will no longer need to protect analog operations by limiting the digital signal and stations should have the option to implement all-digital broadcasts. We decline to adopt iBiquity's presumption policy because it is too early in the DAB conversion process for us to consider such a mechanism. We find that such a policy, if adopted now, may have unknown and unintended consequences for a new technology that has yet to be accepted by the public or widely adopted by the broadcast industry.

IBOCcrock wrote:

> Doubtful, that there would ever be a mandate:

Don't count it out. FCC also said there would no digital only mandate for DTV, too. Have you heard about Feb 17th, 2009?

The ONE thing we've been able to count on from FCC for some years, now, is that they will do whatever it takes to maximize the confusion, inconvenience, and abandonment of the broadcast consuming public to the benefit of special interests.

Sanity is no longer in FCC DNA and hasn't been since before they cut the balls off the AM Stereo momentum.

"To serve in the public interest as a public trustee," isn't even paid lip service anymore. It's about the broadcaster. Not the public interest.

It has been the goal of iBiquity and broadcasters in general to make this move to all digital service. There have been decades of technological development. Billions in investment. If HD Radio does not catch on with the listening public, there will be enormous pressures on both the Congress and FCC to move forward with an all digital mandate.

Don't think it can't happen. Don't believe their denials. They've denied before. And done it anyway. This is a political agency, beholden to a Congress in turn beholden to very high dollar special interests. An FCC promise is meaningless.

Around 5:22 p.m. EST today (2222 GMT), I was listening to the BBC news on 5.975 MHz. In the middle of an erudite explanation of Sri Lankan internal politics, they suddenly switched to a soccer game (?) between Cameroon and (I think) Tunisia for about 2 minutes, then switched back to the political program in progress.

Either that, or I suppose it might have been a pirate on the same frequency, but I heard no heterodynes.

Did anyone else hear this?

" Don't count it out. FCC also said there would no digital only
mandate
> for DTV, too. Have you heard about Feb 17th, 2009?"

Several reasons support this
decision. First, unlike television licensees, radio stations are
under
no statutory mandate to convert to a digital format. Second, a hard
deadline is unnecessary given that DAB uses an in-band technology
that
does not require the allocation of additional spectrum. Thus, the
spectrum reclamation needs that exist for DTV do not exist here.

Yea, I do count it out, Grim Reaper!

The FCC is in the middle of a Congressional investigation - LOL!

"House Subcommittee To Investigate FCC"

"WASHINGTON -- December 4, 2007: House Commerce Committee Chairman
John Dingell (D-MI) told FCC Chairman Kevin Martin in a letter Monday
that he's concerned about 'procedural breakdowns' at the FCC and that
the Commerce Committee's Subcommittee on Oversight and Investigation
will be conducting a probe into the agency."

http://www.radioink.com/HeadlineEntry.asp?hid=140298&pt=todaysnews

"HD Radio on the Offense"

"But after an investigation of HD Radio units, the stations playing
HD, and the company that owns the technology; and some interviews with

the wonks in DC, it looks like HD Radio is a high-level corporate scam, a huge carny shill."

http://www.eastbayexpress.com/2007-03-07/music/hd-radio-on-the-offense

"Editorial on the recent approval of HD Radio (IBOC) in the USA"

"... the reason the big boys in the big markets are so pro IBOC is because they like the hash as it wipes out distant signals getting into their market. There is no way to stop skip, but if the IBOC hash wipes the signal out, then the locals will have to listen to their local station. Kind of like legal jamming. Considering that, then even if the public does not buy the radios, keeping the IBOC signal might be worth their while."

http://www.am-dx.com/amiboc.htm

"DEAD AIR: Radio's great leap forward stalling in the Valley"

"KMBH, the National Public Radio affiliate based in Harlingen, switched to HD this year, but the change did not boost its inconsistent analog signal in the upper Valley. Monsignor Pedro Briseño, the manager of the station and its television affiliate, did not return multiple calls and an e-mail requesting comment on the station's shift. A fundraising campaign on the station asked local listeners to contribute to the upgrade earlier this year, touting the change as a service to listeners that would improve their experience. The station's business manager said she could not reveal the cost of the upgrade, saying all media requests have to be routed to Briseño. A public information request faxed to the station Monday evening has not yet received a response. Organizations that receive government funding are subject to state and federal open records laws, but have seven business days to respond to information requests."

http://www.themonitor.com/news/radio_7098___article.html/digital_new.html

"HD Radio: Will More Awareness Translate To Sales?"

"Unfortunately, Ibiquity does not: Yes, they have gotten many radio stations to make the $100,000 or so investment required to add HD Radio broadcasting, but what the leave out of their PR spin is that MANY of these stations were Public Radio/NPR stations that had their equipment paid for by special funding from Congress. So tell me, senior executives from, say, Sony, Mitsubishi, Best Buy, etc.: How do you feel about Ibiquity''s lobbyists getting US taxpayers to pick up the tab for many of their transmitter sales? Wouldn''t it be great if your lobbyists could get Congress to mandate that US taxpayers be required to buy your products, too? Do you even slightly care? Ibiquity will take their money and run, and HD Radio will join a long list of failed formats, like Dolby FM radio, Elcassete, mini disk (in the US), etc."

http://tinyurl.com/37pe7t

"HD Radio: Fun with Math"

"I think it is fair to say that the audiophile community, those people who take their FM seriously, is dead set AGAINST HDRadio. Not only do most people never intend to buy a radio, unless as a plaything for early adopters and collectors, but are aghast at the FCC for even allowing IBOC to thrash up the FM bandwidth. Plus, people with enough technical savvy to read the specs are insulted by the false claims of 'CD sound quality' or even 'near-CD sound quality'. These are transparent marketing hype, beyond mean puffery. Sorry, but HDRadio has sworn enemies. This goes beyond just business but has political reprecussions for FCC and for Congress. This has the whiff of political scandal - and I'm a rock-ribbed Republican! The Corporation for Public Broadcasting is especially vulnerable. My advice for any businessman is to avoid any association with HDRadio."

http://www.hear2.com/2006/06/hd_radio_fun_wi.html

Either way, consumers will still not buy HD radios (who buys radios anymore), and it would just hasten the death of terrestrial radio, which it already is dying:

"Clear Channel's murky future"

"Sad because eliminating new hires (including sellers), failing to replace those who leave, stopping all investment in the future, and halting all advertising and research is the equivalent of saying that necessity requires us to strangle the goose that lays the golden eggs, even as the goose is up for sale."

http://www.hear2.com/2008/01/clear-channels.html

You can talk out of your ass all you want, but it won't make any diffference.

> Yea, I do count it out, Grim Reaper!

You're addressing everything but the point.

1) If there is no significant uptake in HD technology, only a mandate from the Congress/FCC can save it.

2) The money behind HD has powerful lobbying efforts in Washington that have made many of the decisions about HD deployment possible.

3) If there is no sigificant uptake in HD technology, the money behind HD will have every reason to lobby Congress/FCC to a mandate.

4) There was also no mandate to update television to digital technology. It was all to be 'voluntary' and market driven. Expectations were that the public would suck up HD TV receivers at record rates, and that analog would be turned off only at 85% of market penetration. And that was to be market by market. There were no mandates. However, the market didn't respond, in precisely the same way the market hasn't responded to HD. A mandate was necessary to drive conversion and speed the uptake of DTV technology. It wasn't until the mandate...it wasn't until the date was set and publicized...that DTV sales blossomed.

5) This hasn't been lost on the money behind HD radio. The very same people who have been talking about all-digital broadcasting since before HD was implemented are the same people talking about mandates, today.

6) FCC said more than a decade ago, that all future modulation schemes for broadcast be digital. They are committed to it. FCC, as much as the money behind HD radio, is motivated to encourage HD technology uptake. Which includes a mandate.

7) Broadcasters are salivating at the possibility of finally achieving the holy grail of broadcasting since the industry began 80 years ago--subscription radio. Conditional access with IBOC technology is currently under test. Broadcasters now are highly motivated to petition FCC for a mandate, as well. As well as the savings of shutting off the analog transmitters.

And, 8) Take a look at the frequency allocations for DTV. You may be surprised at where those frequencies fall.

Do not count out a mandate to save HD Radio. There is every precedent, and every reason to believe that FCC will reverse their stated position on HD Radio. Too many people are too interested in seeing this happen. The money behind HD radio, broadcasters, have powerful lobbying efforts committed to just that. The FCC also has an interest in HD Radio to meet its own goals. And FCC has reversed such a position before. Ruling out this possibility is turning a blind eye to reality.

You're committed to reminding everyone here that IBOC is failed technology, and that HD Radio is dead. You may be right. But you may close your blind spot to the reality that there's much too much money

invested here to let this go quietly. And since the HD Alliance can't seem to get their head out of their ass long enough to begin to market this product effectively, encourage sales at the local level, promote product infusion into the marketplace or the creation of new programming content to drive listeners to HD Radio, they must have an ace up their sleeve to make this happen.

An FCC mandate would be the Ace of Spades for that card.

This is going to be a protracted fight. HD isn't happening in the marketplace. But it's not going down without a fight, and won't be disappearing anytime soon. There are just too many forces involved for that to happen.

> is grundig one of the best companies out there?

Well, there is a Grundig in europe, which is different from the Eton folks in USA that have the rights to use that name. If it is important to you the products from either company come mostly from china and other parts of asia. Basically you will get what you pay for.

> I really like it and am
> wondering if its of a really good caliber.

What exactly are you looking at. You asked if Grundig was a good company and then you really like it asked if it was a good caliber. Which it are you talking about. I assume you are asking about products with the Grundig name and not the companies that own the brands.

The UK has been threatening to turn off analog, yet look what
happened:

"Report: Future Of U.K. Digital Radio May Be Bleak"

"LONDON -- January 30, 2008: A report from Enders Analysis found that
digital audio broadcasting, or DAB, is in trouble due to the high cost
of transmission and slow revenue growth, U.K. newspaper the Guardian
reports."

http://www.radioink.com/HeadlineEntry.asp?hid=140877&pt=todaysnews

It's over for digital terrestrial radio:

"Germany flicks off-switch on DAB"

"Part of the problem is that analogue FM never went away and most
people didn't seem to care for the clear digital-quality sound, and
were left nonplussed by such benefits as easy tuning and message
displays with song names and titles. DAB is struggling almost
everywhere in Europe."

http://www.theregister.co.uk/2008/01/28/germany_switches_dab_off/

"Digital Radio in Canada"

"The Commission is very concerned about the stalled DRB transition.
Roughly 15 of the 76 authorized stations (including the digital-only
operation in Toronto) are not on the air. Some stations that once
operated have since ceased operations. Few recievers have been sold,
and there is no interest in expanding DRB service beyond the six

cities where it exists."

```
15. We will not establish a deadline for radio stations to convert to
digital broadcasting. Stations may decide if, and when, they will
provide digital service to the public. Several reasons support this
decision. First, unlike television licensees, radio stations are
under
no statutory mandate to convert to a digital format. Second, a hard
deadline is unnecessary given that DAB uses an in-band technology
that
does not require the allocation of additional spectrum. Thus, the
spectrum reclamation needs that exist for DTV do not exist here.
Moreover, there is no evidence in the record that marketplace forces
cannot propel the DAB conversion forward, and effective markets tend
to provide better solutions than regulatory schemes.
```

You really have a hard time comprehending - IBOC is in-band and requires no additional spectrum to be allocated. A mandate would do no good - no one will buy HD radios.

New Grundig Radios for 2008
http://cobaltpet.blogspot.com/2008/01/new-grundig-radios-for-2008.html
-source- Cobalt Pet [Blog] -14 January 2008

The Grundig "G4 World Recorder"
http://www.etoncorp.com/product_card/?p_ProductDbId=345591
AM/FM Shortwave Portable Radio with MP3 and SD Player
Fearures :
* The 'Unit' Records and Plays MP3 Music on up to
a 2GB SD Card that plugs into its socket.
* LW, AM, FM and Shortwave (3000-29999 KHz)
* Digital display world-band radio
* 1000 programmable memory presets
* Digital tuning methods including Auto-Scan,
* Manual-Scan, Direct Key-in and Manual Tuning
* Supports MP3/WMA decoder/MPEG 1/2/2.5
* Power source: 3 AA batteries (not included)
or AC adapter (included)
http://www.etoncorp.com/upload/contents/307/G4.pdf

Maybe a 'clone' or Upgrade of the of the
Kaito KA 1121 Radio ?
http://cgi.ebay.com/_W0QQitemZ250212035048
That is being sold on eBay by Radios4You
for $130 + $13 S&H
-also- Sold by J&R Electronics for $130
http://www.jr.com/JRProductPage.process?Product=4200349
-and- Sold by Universal-Radio for $150
http://www.universal-radio.com/catalog/portable/0021.html

+plus+ Amazon for ???

Have you actually looked at the spectra for digital TV? Be surprised.

Repeating the same meaningless promises, here, will not make them anymore reliable.

There is too much money, too much motivation, too much at stake to rule out a mandate. FCC has gone back on it's word before, over this very type of thing. There's no reason to believe there would not be a reversal here.

Consider also, that in less than a year, there will be a new administration, and changes in the Congress. New faces, new lobbying efforts.

Nothing is certain except the volatility of a political body.

Don't look now, but FCC is a political body. And politics runs on big money.

A mandate is not out of the question.

Hmm. A real CW mode is usually narrower than 2 kHz.
With a 2 kHz width it is almost a SSB mode. Is your
CW mode with a tunable BFO?
Usually I find USB with a 2.5 or 3 kHz width best for
identifying signals.

> digital mode audio samples but nothing quite matches; I'd like to
> add samples of esoteric modes like Hell*, THROB, OLIVIA, etc. but

Here are a couple sites that have a lot of examples for identifying signals:
http://signals.taunus.de/DIG_introd.htm
http://www.kb9ukd.com/digital/

> would need to do it over the air since some of these involve FM,

I'm sure you can roll your own conductive cement, just like you can
build something that is patented. Selling your own conductive cement
would be another story.

As a side note, when you deal with sheets of conductive material, the
term sheet resistance (Doh!) comes into play. This is really common in

chip design where you roll your own resistors. However, getting back to the cement, even though the copper wire is much lower resistance than the carbon embedded cement, the cement makes up for it with greater contact to the soil.

If you watch construction in expensive areas (i.e. where you don't have land to waste), the engineers use what is generally known as geotex. They place the dirt in layers with geotex in between layers in such a manner where the slope can be steeper than is just soil was used. Well, I had a hunch and sure enough they have conductive geotex http://www.geosynthetica.net/tech_docs/IDPFlooding_Geotextile.asp It gets a bit messy since some refer to heat conductivity rather than electrical conductivity.

I most places with poor soil conductivity, they just use a counterpoise. You can often see the radials from satellite photographs. I have a few documented here: http://www.lazygranch.com/nellis_range_beacons.htm

Still don't get it do you? Well, that's the reason you are last weeks
winner. I would not rest on those laurels though as MWB is playing
catching up.

You, as part of the select group of people listed above generally annoy most readers of the news group and the fact that you do not understand this is funny.

> > > Get a life, Telamon. You obviously seem to be adrift.
> > > And it's starting to show...

That is a fine sentiment until you post then people in general have an expectation that you have something worth posting about. You don't and nether do the people on the list above.

> - I know how to sail and you don't. 1 point.
>
>
> OK That's A Big One {I Think :o} - Just what does the

> your Ability-to-Sail . . .

I was making a joke on MWB's use of the word "drift." It's OK that you didn't get it. There was no expectation on anyone's behalf that you would get it.

Apparently the meaning of most of the post "sailed" right past you.

It's OK if you don't get that either. Don't worry about it.

> Telamon - May I Suggest The Group : ALT . SAILING
> http://groups.google.com/group/alt.sailing/
>
> - You think you know my motivation but you don't. ï¿½1 point.
>
> You Are Motovated - Wow No Wonder Why . . .
> We Were All So "ClueLess"

Pretty much but also the present and most likely the future. The insidious nature of being clueless is never getting to a point of having one. I'm sorry to say you are doomed to a life of cluelessness.

> - Mikey is off to a flying start.
>
> Hey He Did It On His Own -ps- Without Any Help* From You !
> * Help = As in Being Helpful -aka- Here is a "Clue"

You need to pay closer attention as MWB could not have the notorious reputation that he has without interaction with myself and others. Again it's OK if you don't get it.

> Dang Telamon ! - Your 'Clueless' Report
> is Morphing Into the "Pointless" Retort.

Looks like you made many of my points for me. Good work.

> and that is something to think about ~ RHF

Thinking is not activity that suites you very well. If I were you I'd stick with clueless.

The very fact that you felt the need to defend him is, well, pretty clueless on its own.

Now stop goofing off get back to work. You need to generate at least another 199 posts this week about nothing and it will take hours just to type all that extra punctuation you use.

"Digital Radio Downunder"

"MACQUARIE Radio Network said yesterday that years of delays had killed the future of digital radio, which was being overtaken by broadband services, third-generation mobiles and digital devices such as iPods..."

http://lists.radiolists.net/pipermail/broadcast/2006-March/028726.html

"Germany flicks off-switch on DAB"

"Part of the problem is that analogue FM never went away and most people didn't seem to care for the clear digital-quality sound, and were left nonplussed by such benefits as easy tuning and message displays with song names and titles. DAB is struggling almost everywhere in Europe."

http://www.theregister.co.uk/2008/01/28/germany_switches_dab_off/

"Report: Future Of U.K. Digital Radio May Be Bleak"

"LONDON -- January 30, 2008: A report from Enders Analysis found that digital audio broadcasting, or DAB, is in trouble due to the high cost of transmission and slow revenue growth, U.K. newspaper the Guardian reports."

http://www.radioink.com/HeadlineEntry.asp?hid=140877&pt=todaysnews

"Digital Radio in Canada"

"The Commission is very concerned about the stalled DRB transition. Roughly 15 of the 76 authorized stations (including the digital-only operation in Toronto) are not on the air. Some stations that once operated have since ceased operations. Few recievers have been sold, and there is no interest in expanding DRB service beyond the six cities where it exists."

Telamon,

From your response to RHF, I think everyone can make their own conclusions. Few of us probably have the capacity to keep up with someone so advanced in wit, humor, and intelligence as you seem to be (at least in your own mind!). Thank you so much for judging which of us have lives and don't. The fact that you seem to live to set the rest of us right says so much about the depth of your own life. What would we do without your vastly superior capacities? This group would clearly be just a gaggle of inferiors without your stunning (and usually off-topic) contributions.

Awaiting your continued pearls of wisdom and side-splitting humor,

MWBRYANT

Images of self-superiority often have a way of clouding intellect. As
usual, Telamon's images of self-superiority provide a delightfully
ironic twist.

And folks accuse Steve Lare of short, meaningless responses! Telamon's refutation skills make Steve's refutations look downright eloquent.

Yes, Telly, you have enough of a life to spend it daily berating everyone else on this group for failing to live up to your standards. The depth (nay, the actual superiority) of your life is obvious.

If you know how to sail, here's some advice: Find the rudder.

Regardless of your "true" motivations, your method displays all we really need to know about your "real" life.

Once upon a time I thought you were at least intelligent, even if you were ill-mannered. I'm beginning to think I was clearly wrong. Conceit should never be mistaken for intelligence.

AMMAN: When Saad Tawfiq watched then-US Secretary of state Colin Powell's presentation to the United Nations on February 5, 2003, he shed bitter tears as he realized he had risked his life and those of his loved ones for nothing. As one of Saddam Hussein's most gifted engineers, Tawfiq knew that the Iraqi dictator had shut down his nuclear, chemical and biological weapons programs in 1995 - and he had told his handlers in US intelligence just that.

And yet here was Powell - Tawfiq's television was able to receive international news through a link pirated from Saddam's spies next door - waving a vial of white powder and telling the UN Security Council a story about Iraqi germ labs.

"When I saw Colin Powell, I started crying - immediately. I knew I had tried and lost," Tawfiq told AFP five years later in the Jordanian capital, Amman.

Now in his 50s, a round-faced man with a small moustache and lively eyes behind delicate spectacles, Tawfiq described how the CIA set up an elaborate operation to recruit Iraqi weapons scientists and then ignored the results.

From the end of 2002 the US spy agency had sources inside Iraq's weapons plants telling them clearly what the whole world now knows - that Saddam had ended efforts to produce weapons of mass destruction.

Nevertheless, in March 2003 the United States and Britain invaded Iraq to disarm Saddam of this non-existent arsenal and in the process triggered the effective collapse of the Iraqi state, plunging it into chaos and bringing hundreds of thousands of deaths.

Telamon,

Since 1976 this has been your Theme Song with one Modification
the word ain't 'Vain'... It's "Clueless" -cause- You're So
"Clueless" !
http://www.youtube.com/watch?v=tKOehPr_FTk
don't chu, Don't Chu. DON'T CHU !

-ps- For the Shortwave Radio Newbies "CHU" is the
Canadian 'Time Standard' Shortwave Radio Station
http://en.wikipedia.org/wiki/CHU_(radio_station)
"CHU" Transmits 3 kW Signals on 3330 kHz and
14670 kHz, plus a 10 kW Signal on 7335 kHz.

saying any more would be pointless
-cause- the song says it all ~ RHF
.

Asymmetry it may be but judging from the overall broadcasting quality
I've heard in recent years it's going to be a real problem for many
stations to maintain. The expertise just isn't there. This poor soul
is expecting HD radio to save his job. He's so far from reality it's
laughable and apparently he doesn't really listen to his own stations
either.

"Will consumers be required to replace their AM and FM receivers?"

Digital radio is not being introduced as a replacement for analog
radio. As such, there is no immediate requirement for listeners to
replace their existing reception equipment. Analog radio will continue

to play a vital role in the provision of radio services for a considerable period.

However, consumers seeking access to the new digital services commencing from 2009 will need to purchase new equipment as most AM and FM radio sets are not designed to the receive digital radio services.

While digital radio will be transmitted in Australia using the DAB technology the Government has not sought to mandate a specific DAB standard. This is in line with the Government's preference for standard setting to be driven by industry.

However, it will be important to ensure that any impact on consumers of the transition to new types of services and equipment is minimised. Accordingly, the legislation provides the Australian Communications and Media Authority with powers to determine standards for digital radio, should this be necessary.

http://www.dbcde.gov.au/media_broadcasting/radio/digital_radio/will_consumers_be_required_to_replace_their_am_and_fm_receivers

You stupid cluck, D. Peter Maus - digital radio is failing everywhere, whether there are mandates, threats to that affect, or not!

BTW - why, don't you post as, "Peter Maus". Does it sound more
prestigious with the "D", as with "Hillary Rodham Clinton", instead of
"Hillary Clinton"?

"Hillary Rodham Clinton"

>responded to HD.

Remember that the plot changed in there. Back when,in the early 1990s,
the idea was that the consumers would clamor for HD was before the
Internet hit big. Before the new Communications Act. Before there
were a zillion dot.com spawned Wireless ideas all grabbing for bandwidth,
and pumping up the prices in the spectrum auctions.

The mandate came because the Feds are impatient to get their hands on
the dollars they can get for all those kilohertz*square kilometers of
"protected area" caused by the poor interference rejection of analog
video. A demand that wasn't there when they first came up with this
DTV stuff.

>A mandate was necessary to drive conversion and speed
>the uptake of DTV technology. It wasn't until the mandate...it wasn't
>until the date was set and publicized...that DTV sales blossomed.

I disagree. ATSC is a gold plated monster, and they had to wait this
long for Moore's Law to catch up and the semiconductors get cheap
enough for a box somebody would buy. Europe just went with SD digital
telvison and they've already finished their conversion. Boxes there
are something like $25 and have been available for several years.
Ours are $50-$70 and are only becoming available NOW.

Add in media consolidation, and penny pinching at the stations
(when a lot of their advertisers and audience went to new media)
that put them on the air only 3-5 years ago. (At least around here).

And the competition from cable and DBS at the retail outlets. Even
while ATSC has been on the air here for a few years, you had to really
search for something that could pick it up, and not get steered to
the Direct TV display at the local big box store. The local stations
would have trouble matching whatever "sale incentives" the subscription
services could provide.

It's going to be interesting when these cheap DTV converter boxes
start to get sold and a bunch of cable/satellite subscriptions get

dropped. (<http://www.dtv2009.gov> to see how to get up to two $40 coupons/gift cards from your government). What is going to happen to the subscription services' stock prices.

Actually the loop does less good the better the radio is,
not that it's ever useless.

But the SRIII already has a pretty good impedance match to
free space, and so it can't be improved as much as a worse
radio, by the loop.

The time to check it is in the daytime. At night all signals
are strong, loop or no loop. Selectivity pays more than
sensitivity at night.

I'm not interested in lectures from you. You seem to express great
ignorance on any subject you post about.

> I'm surprised that a person of your obviously superior intellect is
> clueless enough to not get that simple point. :-(

< Snip >

Sorry about the extra "e" that got you all in a rage but I don't have
an editor to review my posts for spelling and grammar errors.

You have made mistakes yourself and I find it pointless to bring them to
your attention due to your clueless nature. In other words you have
bigger problems than spelling and grammar. Consequently if typos is all
you can find wrong with what I post I must be doing pretty good. Thanks
for the insight.

Mikey top posting is a clueless behavior. I fixed it for you in this
reply.

You are imagining these "images of self-superiority." They only exist
for you. I'm just a regular guy. I don't think I'm some superior male.
This is what most people call projection. You take an attitude inside
yourself and project it upon someone or something else. This is how
media like ink blots are used. They are just a random shapes that look
like something to you.

You see it is you that has the "image of self-superiority." It's
something you tried to projected onto me.

IT DEFINITELY WAS A GOOD GAME. And even though as a general rule - I
root against the GIANTS - being that I'm a REDSKINS fan - I was really
glad they won. I think they have a pretty decent bunch of guys
playing there. Though they looked terrible for most of the game - but
I guess New England didn't look much better in light of the score for
most of the game. BUT I DID NOT WIN THE POINTS POOL. Ah well -
there's always next year.

Yeah, yeah, yeah. You always like Steve better. No need to rub it in.

> Yes, Telly, you have enough of a life to spend it daily berating

> The depth (nay, the actual superiority) of your life is obvious.

Pay attention Mikey. It's just a select group of goofballs not everyone.

> If you know how to sail, here's some advice: Find the rudder.

I've sailed using a rudder and wheel. I prefer a rudder. You would not
know what to do with either.

> Regardless of your "true" motivations, your method displays all we
> really need to know about your "real" life.

I don't think so. This just shows that you are more interested in
imagining my life than knowing it. Also you seem happy to project your
own feeling of inadequacy upon me. That's a tough position to find
yourself in.

> Once upon a time I thought you were at least intelligent, even if you
> were ill-mannered. I'm beginning to think I was clearly wrong. Conceit
> should never be mistaken for intelligence.

Discourse should not be mistaken for debate. Debate is the mode you are
locked into. I'm not looking for an argument like you are.

What I do is answer questions about radios or antennas. I possess a lot of information about electronics, radios, and have been a SWL for many years. I don't just cut and paste and I answer in my own words. I try not to use big words that confuse people like you but I can't always get away from technical terms. I provide links when appropriate. My posts don't look like a Google search result. I don't expect to reach people like yourself that are not technically minded.

This thread that I started are my thoughts about a small select group of individuals that never seem to get any understanding of the majority of posts to the news group. A key feature of these select few is that not only do they not get a concept time after time they want to argue with you about it. This is in every sense of the word clueless behavior. Unfortunately you are a part of this select group. I really do feel sorry for you but that won't stop me from making fun about it once a week.

So Mikey go forth and be the most clueless you can be.

Thanks, I'll look; some time ago I fetched samples from a number of sites and aggregated them into a local directory. I checked against those and found nothing with the same duty cycle (protocol) but clearly the modulation is MFSK.

>>would need to do it over the air since some of these involve FM,

Just an FYI, if you are recording in compressed modes, the stereo
separation is often reduced. This is not the end of the world for
music, but if you are trying to record two signals without leakage
(such as from two scanners), it is the end of the world. It has been
my experience that OGG format does not have this issue. And of course,
it should not be an issue if you record in PCM

No Mark,

What I don't understand is why you believe that YOU need to
be the internet cop.

I have learned and educated more people on the rec.radio.cb
newsgroup than any HAM operator. My specialty is
amplifiers.... Big amplifiers.

I have learned that there are more people that want to learn
in the rec.radio.cb community than there are on ANY of the
HAM groups that I have been on. A fact which does, in some
ways, bother me. But, do I have to go spewing BS about how
so and so is wrong because they won't let me talk? No, I
don't. Do I go around acting like a snitch (nobody likes a
snitch!!) quoting people on a rec.radio.cb group,
cross-posting and pulling messages from the cb newsgroup to
the ham newsgroup, knowing full and well the animosity
between radio services? No, I don't.

Then you seem to take a perverse pleasure in the fact that
because nobody on the rec.radio.cb newsgroup trusts you
because of the above mentioned facts that they all resort to
email. This sucks. It means that a lot of good dialog that
would have gone on won't. It means that a lot of people new
to the group cannot see what is talked about, ask questions
and "sandbag" and just read... There are hundreds, if not

thousands, of readers to rec.radio.cb that never post, but do learn. Let's go ahead and stifle the education process because Mark Fuller doesn't like the fact that we are discussing RF amplifiers on a CB newsgroup.... We all have to watch what we say on rec.radio.cb now because Mark Fuller gives off the "aura" that he will turn in anyone, help prosecute anyone, divulge info on request and just basically act like someone you don't want around.

I can't really see where it should bother you that the majority of the CB useage in America happens above 40 or below 1. Why do you let it bother you that other people are breaking the law? Most of the users on the "funny" channels are running equipment cleaner than your CB radio.... They don't generally bleed, they use ham equipment, and they are not bothering you on channel 23 or whatever your home channel is.... As a matter of fact, I would think that you, as the law abiding citizen staying in the normal 40 channels, would be delighted to know that there are millions of other people not on your channel, but who are above or below! Less traffic to "step on you", as you so eloquently put it... But, for some reason, you just knowing that those people exist, and they are doing something illegal, just puts a burr under your ass that won't stop, huh? Although it has no direct relation to you, you can't leave it alone!

Mark, you are welcome to do whatever you want to do... I don't try to stop what you do, but I don't like it, and I don't like what you represent. I think it is complete BS, and the majority of the people on the rec.radio.cb group don't like you, don't trust you, and don't want you around. Take your legal BS somewhere else and leave the CB newsgroup out of this..... And don't think that you need to attempt to get the ham community from rec.radio.amateur.policy involved by feeding off there inherent hatred towards the CB community.

For Sale:

Drake SW-2 Shortwave Receiver

* Frequency Coverage: Continuous Coverage 100 Khz to 30 Mhz
* Modes: AM, CW, USB, LSB
* Tuning Steps 50 Hz or 5 Khz
* Stores up to 100 Independent, programmable memories
* Built-in Selectable Sideband Synchronous Detector (Sync Detector)
effectively reduces or eliminates distortion due to fading signals
* Front-panel mounted internal speaker
* 1/8" headphone jack, 1/4" external speaker jack
* Front-panel mounted RF gain control
* Dual antenna input terminals (50 ohm feedline or wire antenna
* Front-panel LED frequency display
* LED Bar graph signal strength display
* Includes Drake A/C Adaptor
* Can also be run off of a 12 Volt DC power source
* Size: 10 7/8" Wide X 4 3/8" H X 7 5/8" D
* Weight: 5.8 lbs including A/C adaptor

* Includes original Drake SW-2 Owners Manual

Condition of this outstanding Drake SW-2 receiver is immaculate!
A nicer, cleaner, or better performing Drake SW-2 can't be found!

Will ship USPS Insured to your door (anywhere in the Cont'l U.S.)
upon receipt of a USPS Postal Money Order (only) for $ 250.00.

Price is firm on this beautiful receiver. Please E-mail any questions.

Huh, no response- interesting. If I would have flamed someone or said
something about IBOC there'd been a thread of twenty responses.
Definitely not like it used to be.:-(

Well now, that's exactly the point, isn't it? Particularly when someone like you who claims a superior intellect is ridiculing the intelligence of others, one would think you would be -very- and especially careful of spelling or typos before you hit that 'send' key. Otherwise, it leads people to question -your- supposed 'superior' intelligence.

By virtue of my having to explain that to you yet again demonstrates that -you- are indeed living in the land of the clueless.

I'm enjoying KCRW via web radio. I can pick them up in fuzzy mono,
sometimes squirelly HD, but the internet sounds the best by far. 128
kb/s MP3.

Maybe the skip over water, or the antenna array is pointed for a
southerly direction. I have yet to pick up European MW stations,
maybe have to actually go the beach in order to do that. Sometimes I
can get WCBS like a local, other times Radio Progresso, the Cuban on
880 smothers it.

During the day, I am picking up a lot of Florida stations a couple of hundred miles away, and even getting WSB in Atlanta a little bit. You are right, at night, the selectivity is important. I am going to try the loop with my old boatanchors: Lafayette HE-10 and Hallicrafters S-38, both are pretty hot on the MW band.

The demand still isn't there. And wouldn't be there save for the mandate. Which was my point. The technology is there, but there isn't as much interest as there needs to be for the 'voluntary' conversion to work. And while the spectrum auction is a big motivator, the amount of spectrum being auctioned is not very large. A larger motivator, by far, is the lobby pressure to force uptake of the DTV technology. Again, and enormous investment in R&D, testing and broadcast installation wasn't about to be left to the voluntary whims of the mass for return. Broadcasters took a big lesson from the failure of AM Stereo and the waffling by the FCC in that matter.

There was talk of mandating a conversion to DTV from well before the implementation of the first HDTV installations.

Not that the Feds didn't smell money. They did. No question.

I wouldn't be so eager to compare European broadcast to our own. The rules are different and have been since inception. Conversion in Germany can take a fraction of the time due to the nature of the broadcast/government relationship. And the quick adoption of new technology that's a part of their culture.

>

All good points. I myself have been receiving ATSC for a while, now. And I nearly had to build what I needed. There was nothing out there that would meet my requirements. Still isn't much. I've made the conversion without investment in a new receiver. At least not yet.

But I'm hearing a lot of conversation among pretty involved and informed individuals who don't really understand the 2/17/09 deadline, or what it really means. They just spent a kilobuck on a new TV a few years ago, and have no intention of buying a new set. There's also been a LOT of misinformation about DTV muddying those waters. Of 7 people at the table, last night, only 2 of us understand that neither satellite, nor cable are necessary for DTV reception.

ATSC is selling well. Now. But not so before the conversion deadline became public fodder. Until that time, resistance was high. I'm even hearing bitching at the local Best Buy that 'only these damned HDTV sets are out here...I just want a TV for the bedroom/office/kitchen/garage...I don't need a damned theatre.'

Many just do not understand.

Without the mandate, the uptake would have been much slower than it is now.

Inertia is a part of our culture.

Which again, is my point about HD radio. The uptake of the technology is slow. Virtually dead. There is no way, absent effective education about the content possibilities to drive public interest, short of a mandate.

And having the best Congress and FCC money can buy, I wouldn't rule out a mandate to force the conversion.

I know how to spot a spoof from Ebay and Paypal. Both "Accounts"
have been flagged, limited, restricted and closed thousands of times in
spite of the fact I've never had either. If you put your cursor over the
apparent link in a message you will see the real address at the bottom
of the browser window. Several programs will add a 'Phishing Philter'
to your browser to stop you from following any 'Phished' link.

I think the Phishing idiots need to just Phiss Off! ;-)

UPDATE : Station is not on the air yet cause of technical problems,
soon will get a Ramsey transmitter to increase range. The station
started in 2002, but left the air in 2005 and is on during
experimental times. This is not a pirate radio station cause it only
uses less than 10 mW of signal. Still radio listening as a hobby on
a Sharp GF9500 and Grundig S350 DL. The hobby for SWLing goes on if
you want to hear station that play rap and reggae on SW try to tune in
6925 and also go for the AM and FM bands. Your local radio stations
should provide the content be sure to visit their website and
participate. If GCC Radio had alot of money and licensing we would
be
on shortwave probably in 30 years from now in DRM mode.

73 and welcome to the new hobby group called rec.radio.shortwave
visit my website to get started.

GCC Radio Science,

Remember the Rules for "Part 15 Devices" :
http://www.fcc.gov/mb/audio/lowpwr.html#PART
Un-Licensed Operation on the AM and FM Radio Broadcast
Bands is permitted for some "Extremely" Low Powered Devices
covered under Part 15 of the FCC's Rules.
-Note- On FM Radio Band Frequencies, these Devices are
Limited to an "Effective Service Range" of approximately
200 Feet (61 Meters).

Maximum Effective Radiated Power - Part 15 - FM Radio
* Power 0.01 microwatts ~ 250 uV per meter @ 3 meters
http://www.fcc.gov/ftp/Bureaus/Mass_Media/Databases/documents_collection/pn910724.pdf

Read-and-Review : "Low Power Broadcast Radio Stations"
http://www.fcc.gov/mb/audio/lowpwr.html#PART
-source- FCC Audio Division

hope this helps ~ RHF

"What Are We Doing to Ourselves, Exactly?"

"IBOC FM Interference Has Been Reported in Several Cases Where FCC Contours Provide Inadequate Protection."

http://tinyurl.com/yt286v

"HD Interference: Not Just For AM Anymore"

"Radio World Engineering Extra dropped a bomb this month with a very provocative cover story: 'What Are We Doing to Ourselves, Exactly?' Written by Doug Vernier, the man who authored the technical specifications for an ongoing Corporation for Public Broadcasting-sponsored HD Radio interference analysis, the report is the first of its kind to document interference between FM-HD stations around the country. Using anecdotal reportage, some sophisticated contour-mapping, and presumably 'early data' from the CPB study, Vernier's article conclusively proves how stations running in hybrid HD/analog mode can (and do) interfere somewhat significantly with not only themselves, but their neighbors on the FM dial."

http://diymedia.net/archive/1207.htm#122307

HD will never work! Ha! Ha!

3201. Here is Something 'Old' that is Radio Related on eBay : Stoddard AT-205 / URM6 Loop Antenna

Dear "Telamon,"

Perhaps I am being obtuse though I don't mean to be. Why not subscribe to MONITORING TIMES? It's cheaper than buying it in a store and it comes packed in a nice plastic bag so you always get it fresh and clean. In addition, MONITORING TIMES allows you to subscribe to a digital edition which is in full color and is sent directly to your computer. The digital subscription costs less than the print subscription. (But I am from the old school - I like to have something in my hands to read - so I do not subscribe to the digital edition but I do buy the CD-ROM of each years' past issues. It's convenient to keep them on file that way).

I also subscribe to POPULAR COMMUNICATIONS for the same reason - it's less expensive than buying it at a store. Frankly, though, I wish they would pack their issues in a plastic bag as does MONITORING TIMES.

As for PASSPORT TO WORLD BAND RADIO, you can buy it directly from them with no shipping charge and you will get it as soon as possible after publication. They pack the book very nicely so it always comes undamaged. You could also buy it from Amazon.com for less money than PASSPORT itself charges, though they don't seem to get it right away. But if you don't mind waiting a couple of weeks, Amazon can save you about 30%. You can also buy the WRTH from Amazon for much less money than any bookstore charges and they do seem to get it quite soon after it's published.

Of course it's absolutely none of my business how you get these publications. The above are only my thoughts on the matter and I thought I would mention them to you. I hope they are of some interest.

I should mention that, at least in my opinion, both of the magazines have articles in every issue that are of more interest to me and some that are of less interest, though I do read the magazines cover-to-cover. Some issues, therefore, are "better" than other issues, in my opinion. Of course "one man's meat is another man's poison" so a particular issue which I may find relatively uninteresting may be of extreme interest to someone else! By and large, however, I always find these magazines to be interesting and very useful in the enjoyment of our hobby.

All the best to you,

Joe

No. You are clueless. You have no point.

> Particularly when someone like you who claims a superior intellect is
> ridiculing the intelligence of others, one would think you would be
> -very- and especially careful of spelling or typos before you hit
> that 'send' key.

I never made a claim to possess superior intelligence. I possess a
normal level of intelligense. You are quoting Mikey.

You are just going to have to put up with the occasional typos and the
bad grammar.

> Otherwise, it leads people to question -your- supposed 'superior'
> intelligence.

Well, since I'm normal and yet you think I'm positively brilliant where
does that leave you? Try real hard. Maybe if you hyperventilate it would
help.

> By virtue of my having to explain that to you yet again demonstrates
> that -you- are indeed living in the land of the clueless.

The only thing you explain is your own mental confusion. Don't expect
other people to follow in your wake.

VA Increases Travel Reimbursement
Department of Veterans Affairs | January 31, 2008

Peake: Disabled Veterans Earned Increase

WASHINGTON - Over a million eligible veterans will see their mileage reimbursement more than double starting tomorrow, for travel to Department of Veterans Affairs (VA) medical facilities.

"This increase helps veterans -- especially those living in rural areas -- offset some of the gasoline costs as they travel to VA's world-class health care," said Secretary of Veterans Affairs Dr. James B. Peake.

"Increasing the mileage reimbursement is one more step by VA to help veterans access the health care they deserve."

The 2008 appropriations act provided funding for VA to increase the beneficiary travel mileage reimbursement rate from 11 cents per mile to 28.5 cents per mile. The increase goes into effect on Feb. 1.

After little more then a month on the job, Secretary Peake used his authority to establish the first increase in the mileage reimbursement in 30 years, fulfilling a pledge he made during his Senate confirmation hearing last month.

While increasing the payment, VA, as mandated by law, also equally increased the deductible amounts applied to certain mileage reimbursements. The new deductibles are $7.77 for a one way trip,$15.54 for a round trip, with a maximum of $46.62 per calendar month. However, these deductibles can be waived if they cause a financial hardship to the veteran.
Sound Off...Why do you stink?

You ask good questions. Why don't I subscribe? I like going down to the store to buy it. I know it costs more money to that way but I like things on the fly. Even though I have CD's of music, I prefer to hear it on the radio. I like talk radio because it is something that happens in real time.

Next year I'll probably buy Passport direct.

In Popular Communications, I liked the historical articles on broadcast stations the best. Some issues are better than others. My main beef with POPCOM is that too much of it is related to scanning.

DOH ! - Why the 17 February 2009 Analog TV is Dead-Line ?
Can We All Say - = ? D E A D L I N E ? = - aka : Black-Out !
[And Just What Do It Mean?]

Hint - It comes after the 2008 Christmas YV Buying Season
and the Greatest New "HDTV" XMSS Sale Event-in-History !

Hint Hint - It comes after the 2009 SuperBowl TV Buying Season
and the Greatest New "HDTV" SPORTS Sale Event-in-History ! ! !

The Challenge : "Meeting the Digital TV Deadline"
http://www.businessweek.com/technology/content/jan2008/tc20080128_135558.htm

* U.S. Consumers have just over a year to get ready for the
Government-Mandated Switch to Digital HDTV from the
{Evil} Less Efficient [Decades-Old] Analog TV System.

* It's a Matter of Public Safety - Federal Officials say the
Upgrade to All Digital "HDTV" will free-up big chunks of
valuable Broadcast Airwaves for Public Safety Providers,
such as Police and Fire Departments, and First Responders

* Plus for American Consumers {TV Watchers} it will provide
a Sharper, more Vibrant, and Trouble Free Picture.

* HDTV Sales are Fueled by Fear of the Great Analog Black-Out !

* HDTV Retailers 'Strategize' to Sell Consumer "Up To" :
New and Improved HDTVs that are not only Digital but . . .
+ Bigger then Ever
+ Brighter then Before
+ Colors that are Rich and Vibrant
+ Featuring Dynamic High Contrast

Give HDTV Retailers Two Shots At Selling Consumers a
New HDTV and Growing the US Economy in the process.

it's a 'vision' thing ~ RHF

RHF, I have read and understood the information you provided. I
have been going on the air
since 1993 using ranges that are "farting" distances from the house
less than 100 feet.

My station that I use still is an FCC approved transmitter that eats
up batteries after I put them in there. If it was a kit it would
just use the antenna that came with the kit and the antenna would no
longer than 10 feet. Maybe you should start your own part 15er
and see what you would play for you neighbors & maybe you should start
your own show about Ham Radio and Shortwave listening or just as
beginning podcast not a broadcast. I would like to hear from you.
Also RHF I would like for you to make videos on youtube about your
shortwave antenna projects like put your drawings as a slide show to
show others what designs you created and receive comments. If you do
I will subscribe to your channel.

As for others I would encourage everyone who's into non pirate
broadcasting to learn more from
http://www.ramseyelectronics.com and http://www.part15.us

> financial hardship to the veteran.
> Sound Off...Why do you stink?

WTF !

What is 28.5 Cents-per-Mile when we have $3.++ Gasoline ?
Plus the Cost of Car Ownership, Maintenance and Auto Insurance

FWIW -The 'average joe' US Citizen gets these Mileage
Deductions Rates for 2007
http://www.usnews.com/usnews/biztech/articles/070206/6mileagetax.htm

Oops for 30 Years - The VA {and US Congress via Lack of Funding} Did Not Increase the Mileage Re-Imbursement Rates.

But Oops Again - The VA equally Increased the Deductible Amounts {Off-Sets} applied to Mileage Re-Imbursements {Due to Lack of Funding from the US Congress}.

It would appear the the Net-Result is most Veterans get NOTHING from the VA and the US Congress.

IMHO - Veterans should not have to Fight with the US Government for the Medical Benefits that they justly earned and are due for Their Service to Our Country.

The US Congress -provides- Funding for Free Medical Care for Illegal Alien Invaders -but- Nickels and Dimes Our Veterans(VA) Health Care System.

don't short-change our veterans ~ RHF

3234. WBBM no nighttime IBOC?

Newsgroup: rec.radio.shortwave
Date: 2008-02-07 12:22:06 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <47AAF7EE.78F1@mindspring.com>
Source record: 136152

WBBM 780 Chicago starting last week has turned
off their IBOC before dawn at least, as evidenced
by the sudden audibility of WABC 770 NYC listening
in Ohio, free of overwhelming IBOC hiss-wash.

WJR 760 Detroit seems to have ceased somewhat
longer ago, and now WABC is a clear channel again.

"DEAD AIR: Radio's great leap forward stalling in the Valley"

"KMBH, the National Public Radio affiliate based in Harlingen,
switched to HD this year, but the change did not boost its
inconsistent analog signal in the upper Valley. Monsignor Pedro
Briseño, the manager of the station and its television affiliate, did
not return multiple calls and an e-mail requesting comment on the
station's shift. A fundraising campaign on the station asked local
listeners to contribute to the upgrade earlier this year, touting the
change as a service to listeners that would improve their experience.
The station's business manager said she could not reveal the cost of
the upgrade, saying all media requests have to be routed to Briseño. A
public information request faxed to the station Monday evening has not
yet received a response. Organizations that receive government funding
are subject to state and federal open records laws, but have seven
business days to respond to information requests."

"HD Radio: Will More Awareness Translate To Sales?"

"Unfortunately, Ibiquity does not: Yes, they have gotten many radio
stations to make the $100,000 or so investment required to add HD
Radio broadcasting, but what the leave out of their PR spin is that
MANY of these stations were Public Radio/NPR stations that had their
equipment paid for by special funding from Congress. So tell me,
senior executives from, say, Sony, Mitsubishi, Best Buy, etc.: How do

you feel about Ibiquity''s lobbyists getting US taxpayers to pick up the tab for many of their transmitter sales? Wouldn''t it be great if your lobbyists could get Congress to mandate that US taxpayers be required to buy your products, too? Do you even slightly care? Ibiquity will take their money and run, and HD Radio will join a long list of failed formats, like Dolby FM radio, Elcassete, mini disk (in the US), etc."

http://tinyurl.com/37pe7t

"HD Radio: Fun with Math"

"I think it is fair to say that the audiophile community, those people who take their FM seriously, is dead set AGAINST HDRadio. Not only do most people never intend to buy a radio, unless as a plaything for early adopters and collectors, but are aghast at the FCC for even allowing IBOC to thrash up the FM bandwidth. Plus, people with enough technical savvy to read the specs are insulted by the false claims of 'CD sound quality' or even 'near-CD sound quality'. These are transparent marketing hype, beyond mean puffery. Sorry, but HDRadio has sworn enemies. This goes beyond just business but has political reprecussions for FCC and for Congress. This has the whiff of political scandal - and I'm a rock-ribbed Republican! The Corporation for Public Broadcasting is especially vulnerable. My advice for any businessman is to avoid any association with HDRadio."

"Editorial: AM IBOC in Distress?"

"Citadel Director of Corporate Engineering Martin Stabbert embodied
questions about the efficacy of full-time AM HD when he ordered all
his AMs that had already converted to cease transmitting HD at night,
using language that must have given Ibiquity officials heartburn.
Separately and for different immediate reasons, Cox, in a "let's wait
and see" move, has tried HD on most of its AM stations but is taking
it off the air day and night, once tested at each facility."

http://www.rwonline.com/pages/s.0044/t.9917.html

Stations affected were WJR, WSB, and WABC...

Try a Whole House Gold Edition; they have more power. Then you can get
a Minicircuits ZHL-1010+ for $149 that'll kick you nicely up to a full
Watt. Under $300 for the whole shmear.

Been noticing the number of RCA HD radios on the shelf at the local
Best Buy Store. There were two but now there's three!

At first I thought - hmmm.... they must be selling more of these than
I thought. Looks like they've orderdered more. But, on closer
inspection, I saw the RETURNED tag on the third box.

Boy this HD radio is neat stuff! Go iBiquity!!

Actually, no stations ceased HD broadcasting; a few have had different
formats put on the HD2 channels based on listener response.

There are no "Format Lab" stations.

The "Format Lab" is a development center in San Antonio where different
concepts are streamed and the ones with the most hits and longest listening
spans get put on actual radio stations. The ones that don't attract interest
are nuked and other ideas tried; it's an ongoing process. The idea is to
create new content for HD that has not been found on radio up till now.

RH - Clearification Please
"turned off their IBOC before dawn at least"

Is WBBM-AM 780 kHz in Chicago, IL turning 'Off' the
IBOC Transmission from Dusk-to-Dawn {Over-Night} ?

-or- Only a few hours before Dawn say 4~5 AM to 7~8 AM ?

i want to know ~ RHF

The "Format Lab" streams over 30 different prototype formats at
http://www.clearchannelmusic.com/formatlab/
and they can measure very easily which get more hits and listening time.
These prototypes, if successful, become the basis for terrestrial formats,
both for main channel and HD2 channels. The main idea is to find formats
with good appeal to put on the HD2 channels of Clear's stations to drive
receiver sales.

<http://www.clearchannelmusic.com/formatlab/

As I said, the format lab tests "what if" formats for possible use on
terrestrial radio. They evaluate the formats by hits and length of each hit
and return hits from the same user. The formats that don't work are
periodically flushed and new ones are developed and tried.

The nature and number of the formats on the Format Lab page has nothing to
do with the operation of the terrestrial stations, analog or otherwise, run
by Clear Channel.

He is, what Liddy calls, 'invincibly ignorant.'

Don't hold your breath.

As for detachment...you've hit it all. Like MBA's who only see
figures on P&L statements, he's shown all the signs of someone whose
only concern for the listener is in his own wallet. And while
broadcasting may be a business, it's also a public trustee to serve in
the public interest. While profit may result from serving in the public
interest, profit is NOT publc interest.

David, like most broadcasters today, has lost sight of what Radio's
REAL potential is.

Yeah, and the help is coming from Samsung and the other fabs that are releasing 9 mm form factor low power consumption chips for delivery sometime in Q2 of this year. This will permit portable HD devices, integration of HD into MP3 players and phones, etc.

And... I am not a general manager, although I have been one in the past; I work with listeners to find their needs and feelings regarding radio.

Eddie - You're still in denial. When it raises the prices up another
$100.00 for an MP3 player consumers will wisely pass that option up.
No demand....no HD. It really is that simple.

- Try a Whole House Gold Edition; they have more power.
- Then you can get a Minicircuits ZHL-1010+ for $149
- that'll kick you nicely up to a full Watt.
- Under $300 for the whole shmear.

OK David lets see . . .

Whole House FM Transmitter "Gold Edition"
http://www.amazon.com/exec/obidos/ASIN/B0007ODOMA
http://www.tss-radio.com/whole-house-transmitter-gold-edition-p-4505.html
Broadcast any Audio Source throughout your Entire Home
* Stereo FM Radio Transmitter + MP3 FM Transmitter
+ iPod FM Transmitter + Auto FM Transmitter
+ Car FM Transmitter
http://www.wholehousefmtransmitter.com/whole-house-fm-transmitter-gold-edition-p-39.html

HD Radio Humor - 5 Keys to Improving HD Radio Reception
http://groups.google.com/group/hd-radio/msg/2442e758104caf4a

http://radiosherpa.blogspot.com/2008/02/5-ks-to-improving-hd-radio-reception.html

"You may not know this, but HD Radio Signals Broadcast
at 1/100th the Power of the traditional Analog Radio Signal.
Basic physics tells us that this means that the Range (and
the ability to deal with Radio Interference) of the HD Radio
Signal will be less than that of your old Analog Radio."

Points Out a Key Problem with the "HD" Radio scheme
that was approved by the FCC the 1% Power Restriction.

There should have been a Multi-Year Phased-In Digital Power
Management Scheme for the continued Improvement of the
"HD" Radio Sugnal and the Phasing-Out of the 'old' Analog
Radio Signals.

First Year = 1 % of the Analog ERP with a Full 100 % Analog Signal

2~3 Years = 2 % of the Analog ERP with a 10 % Reduction
of the Analog Signal

4~6 Years = 4 % of the Analog ERP with a 20 % Reduction
of the Analog Signal

7~10 Years = 8 % of the Analog ERP with a 40 % Reduction
of the Analog Signal

TERMINATION - End All Analog Broadcasting After 10 Years.

Actually, the idea is to add more features to a player, phone or other
device at the same price.

3273. Ping Drifter AOR-3030 repair

Newsgroup: rec.radio.shortwave
Date: 2008-02-07 19:30:49 UTC
From: Pete KE9OA <p.gianako@comcast.net>
Message-ID: <aMudnd7yX6r3wTbanZ2dnUVZ_sednZ2d@comcast.com>
Source record: 136240

I received an e-mail from Drifter this morning, asking for help with his AOR-3030. I don't mind helping folks out, but if you are there, Drifter, and this goes for anybody else that needs technical assistance, please don't use some sort of spam blocking e-mail.
I got an e-mail form some fellow a couple of days ago, that was looking for a service manual for a Grundig Satellit 3400. I sent him the manual, and of course, the "undeliverable mail notification" was sent back to me. The only one who loses out is the person needing the assistance.
Thanks for reading my rant!

Pete

Radio Chad, 4905, is being reported back on the air today by various monitors in Europe. Program should run to 2230.

They were off due to the current troubles there.

Currently only a het here, but should fade up later on. Those of you to the east should have an earlier shot at it.

They do not make a car shortwave radio. They make a $39.95 converter that
may be satisfactory for some purposes.

3280. Does Sony still make SW radios?

Newsgroup: rec.radio.shortwave
Date: 2008-02-07 23:41:02 UTC
From: samos <danbjarnason@gmail.com>
Message-ID: <9395c402-4107-4dd1-9dba-f2837929a71c@h11g2000prf.googlegroups.com>
Source record: 136248

I want to buy a portable shortwave radio ... my beloved 20 year old
Sony ICF 2002 has finally died and I can't find anyone who will repair
it.
I'd like to get another Sony ... I really like the SW7600 GR but
can't find it for sale anywhere ...

Actually I can't find any Sony SW radios anywhere (I'm in
Canada) ... have Sony left the portable SW market entirely?

What would you folks recommend then ... for about $150?.
Is the Grundig G5 any good?
Many thanks.

This is good.............maybe enough people have complained about it.
Next, we need to see 670 and WGN 720 eliminate their evening "noise".

<Nice bluff, Eduardo!

That still does not change the fact that no HD channels or operations have
been eliminated, or "dumped" as you eloquently said, at Clear, except by
sale of stations.

Yup, bought two (one for each car) from the man in Singapore who sells on
eBay, and they work very well.

I was in JR Computer and Music World over the weekend. I was looking at an HD radio, since I figure they won't be along much longer and I wanted to remember what it looked like just for historical purposes. Eventually a salesperson walked over to me and wanted to make sure I understood that "this isn't a satellite radio receiver". Another one of those priceless moments.

9 mm is the package. It means 9 millimeter square. The number of
connections/pins can vary but the most important aspect is that it has
nothing to do with what is inside it. The thing that determines the
amount of power that is used is the die inside. The die is a piece of
semiconductor material that is the electronic circuitry inside the 9 mm
square package that along with the technology that made it determines
the power used by it.

the sound went ... it's very faint ... even with the volume cranked
up. it picks up stations just fine ... but i can barely hear them.
this sound problem happened all of a sudden. it's a mystery. i took it
to a sony dealer here and thye said something about a part being
corroded. i didnt junderstand, and they were the least interested in
dealing with it. sorry i cant be more specific about what the problem
might be.

Maybe the speaker failed or the headphone jack contacts are corroded.
Try plugging in head phones and see if they work. If they do it might
fix the speaker problem.

3307. WOW - Alpha Delta Prices, OUCH

Newsgroup: rec.radio.shortwave
Date: 2008-02-08 04:49:57 UTC
From: dxsavant@myisp.com
Message-ID: <v4nnq353sgvn5kkuuvse55qrob3ojdofts@4ax.com>
Source record: 136275

There was a thread a short while ago about the Hy-Power AB-SWL-SL that is available for ~$90. I thought this was a bit pricey so I looked at the cost of the similar Alpha Delta DX-SWL.....talk about sticker shock! That antenna sells for about $120!!!!!
I knew copper prices were up but nonetheless this price shocked me. I'm not knocking the antenna - I used to use the DX-SWL-S which is a 40 foot version that I bought about 12 years ago for under $30. Sure is an incentive to roll your own. Heck, my inverted L (vertical ~ 25 feet and horizontal about 50 feet) with the ICE 182A performed better than the Alpha Delta and I would be willing to bet that even with copper prices being up - could be done for less than buying pre-made.

Again, not knocking Alpha-Delta or any of the other antenna suppliers - just illustrating one of the benefits of roll your own. Speaking of which - I once had an EWE antenna that worked nicely, maybe it's time for another antenna project.....

Thank you. We are aware of that. Millimeter tends to indicate physical
dimension, doesn't it? Samsung has been nice enough to give us a little
presentation, in which they described how they developed a much smaller
package, which permits it to be used in multipurpose devices, which also
consumers much less power, permitting it to be used in portable devices.

Eddie - I think you're on to something. I can't wait to get a new
cell phone with HD radio inside. It's gonna be so cool hooked up to an
FM dipole antenna to recieve HD FM and a MW loop for AM HD. you're
right ... it's gonna work out real well. They're gonna sell like
hotcakes.

By the way I think you're becoming psychotic. You're delusions are
worse than I thought.

You might try the yahoo sony 2010 group. there is a person
who post there that repairs them. worth a shot. great radio,
hate to see it go bad.

Yo Pete. could be my isp bounced the email. sorry. i haven't heard
from Richard at AOR yet. was hoping you might have the road map.
how bout -driftermick at yahoo dot com- if you have it. or a url.
thanks Pete.

Drifter...

3313. On the BBC

Newsgroup: rec.radio.shortwave
Date: 2008-02-08 05:45:13 UTC
From: jaimefeliciano@comcast.net
Message-ID: <ac4e26e6-ab02-4217-9d55-fa3487f10e27@s13g2000prd.googlegroups.com>
Source record: 136281

I got an e-mail, in a web account that I checked during lunch, from someone named Paul Waters who claimed to work for the Richard Bacon Show on BBC Radio Five. They found my Web site (see below) and wanted to include me in a discussion about Should Shakespeare be taught in the high school. People are calling it dated and tedious. In the e-mail he asked for my phone numbers. I e-mailed him right away. He called me about three-thirty Pacific time which would be eleven-thirty PM his time. He said they would call me in an hour to include me on the show. They called me at about four-thirty. I told work what was happening and they allowed me to use the conference room for the call. I had to listen to a bunch of radio introduction and some sports news about soccer and cricket, English clubs playing league games of soccer around the world stirred controversy. Then the Shakespeare in High School started. The first guest was some very Pro-Shakespeare guy with an English accent I could hardly understand at first but after a bit I could understand most of what they said but then they started talking about different corners of the village they call London/England and I was lost. The host asked me whether I thought Shakespeare should be taught in High School. I said it should be taught like Beowulf and the Canterbury Tales. I said he was too much of a Royalist and we just watch kings declare war against cousins for the stupidest reasons. Another guest talked about how her son hated studying Shakespeare but when he saw a live performance he fell in love. Another guest brought up Hamlet for some reason and I followed his comment with To be or not to be is not the question. I am here right now, what should I do? is the question and if Hamlet asked that question he might have found a solution besides killing people. They laughed at that comment. A little later one of the guests brought up how current Shakespeare was for his time and I commented that Science was the rage at the time and Shakespeare never uses science. If Hamlet had used simple science he could have solved his mystery and found a different solution. Then the guy started talking about Shakespeare's later plays where he explores more metaphysical sides of life. They started talking about who wrote Shakespeare. Then the time was up and the host thanked each one of us and signed off and someone came on the phone and thanked me. I was on the BBC. I have to get that on my resume.

Not so outrageous. My Nokia has FM broadcast built in. Adding HD
wouldn't be so much of a stretch.

And using technology designed primarly for cell phone reception, the
FM in my Nokia allows some pretty impressive reception, using nothing
more than the earphone cord as an antenna, as far out of town as
Marengo, well outside of Chicago ADI.

Try using YouSendIt. You can get a free account, with 200Mb limit.
Upload, the far end receives a link. They can download at their discretion.

No ISP limits to deal with.

Yes that is the size of the package. A square 9 millimeters on a side. Like any 3 dimensional object it is defined with three numbers example 9X9X1.4mm in this link.

<http://pdfserv.maxim-ic.com/package_dwgs/21-0153.PDF>
This is a fairly small package but there are standard packages that are smaller. The package in the link I referenced has 100 leads or connections. This package is not unlike a PCB it would be soldered onto and if designed right could be very high performance. I have worked with designs that operate over 10GHz in this type of package. An HD chip will not be anywhere near this kind of speed.

In this drawing the round objects are made of solder. You put some solder paste on the circuit board pads, position the part in just the right place over the those pads and using hot air heat the part and local area of the board to where the solder balls on the package just start to melt fuzing it to the board then you stop the hot air. Now the package is mounted on the circuit board.

The top surface will radiate some heat during operation but most of heat the part generate will flow through the solder balls used for power and ground into the circuit board power and ground planes. Typically parts using this type of package will dissipate 1 watt maximum.

So it looks like Samsung has made a significant power reduction because that package could not be used otherwise if you follow my logic.

Do you find it interesting what you can know about a part just from the package it uses?

With the U.S. dollar at par, it is as cheap to shop in the U.S.
Use www.universal-radio.com to browse.

Shop at:
http://www.radioworld.ca/index.php?cPath=2
or
Http://www.durhamradio.com/home.php?cat=1855
or
http://www.burnabyradio.com/

In Canada, Sony sells through its own stores only.
The ham stores above found the selling conditions (no advertising of prices online, must sell so many units a month, take more models than they wanted, etc. etc.) so onerous they don't stock them anymore. Many will tell you to shop directly, they can't get it any cheaper.

3334. New radio in South Africa

Newsgroup: rec.radio.shortwave
Date: 2008-02-08 07:27:28 UTC
From: plimmer@telkomsa.net
Message-ID: <c01b5ef2-25fd-47e6-a060-65e1442d5b66@e23g2000prf.googlegroups.com>
Source record: 136202

I am getting another RX, an Icom IC-7700
see brochure at:
http://www.ab4oj.com/icom/ic7700/IC-7700_pre.pdf
also a nice 15 minute movie at
http://www.icom.co.jp:80/world/topics/ic-7700movie/index.html
it should be here at the end of February.
Of course this is an irrational decision, as there is nothing wrong
with my
present radio, but I figured I'm on the uphill now and might as well
spoil
myself while I can. It has two disadvantages though:- it can't be
taken on a
DXpedition as it weighs a hefty 23 kgs/50 lbs, and that's just too
heavy for
me to handle.
Also, it is mains only (has no 12v DC power), so it can't go to
Seefontein powerless DXpedition site either.

I was hoping to sell my existing Icom to help fund the purchase, but
now
find I've got to hang onto it for the DXpeditions.

When my pals read that they were horrified at this extravagent
purchase:
Vince wrote:
"So is that Rx better than the one you have already? What made you buy
another, and one that appears to be quite similar to your existing
rig..Weren't you tempted to get a nice small AOR7030 plus
perhaps..(perfect for lugging up that hill at Jongensgat ;-)) Just
curious".

I replied:
The 7700 is similar to a 756Pro3, but the difference is like upgrading
from
a Merc C320 to an S600. It's all about more convenient and user
friendly
features.
The 7700 has a higher IP3 point, roofing filter selection down to 3
Khz,
firmware upgrades and a much bigger/better LCD screen for tracking
that
faint DX. Plus a host of other features.

I am not really expecting to get any DX on the 7700 that I wouldn't
have got

on the old one. It's more about how you get there:
If we drive from Joburg to Cape town in a 70's VW Beetle (Gary's Frog) you
are going to have a tough journey. If you go in Vince's VW Passat (Drake
R8A) you are going to have a much easier journey. If you go in John's Merc
C320 (756Pro3) you are going up in great comfort and ease. When you go in a
Merc S600 (The new Icom IC-7700) you are going up in supreme comfort and
luxury with awesome individual climate control, a studio sound system, a sat
Nav system and every conceivable comfort and convenience. We are all going
to get to our destination at the same time, but the difference is HOW we get
there.............

So Vince, it's not a rational decision, there is nothing at all wrong with
the existing 756Pro3, I just want to upgrade and spend the children's
inheritance.....
As for a 7030+, I can't stand the thing. I tried one for a month and was
glad to give it back. I like a BIG screen and a nice case with lots of knobs
to twiddle, hence no thought of an SDR like the Perseus, which is the way
all the other serious MW DXer's are going.

Vince replied:
Fully in agreement with your decision John, go spend that moolah - you can't
take it with you when you go..!!

A VW Passat hey?!! Sheesh I feel insulted ;-) I thought of my Drake R8A as a
90's Chevy Corvette, perhaps a little outdated but still great on
performance but lacking some of the more modern features such as GPS, aircon
& 4 valves per cyclinder. Just a huge V8 with no frills!!..

Interestingly, the IC-7700 is going to sell in South Africa for $4300,
whilst the expected price in the U.S.A. is $6000

On another tack, a lot of my U.S. MW DX pals are joining the "ultralight"
craze. The most popular of these radio's seems to be the Sony CRF-59. It is
FM/AM only and sells at Amazon for $15.

My friend Guy Atkin's in WA sent me the following interesting info:

"King of the hill in this newly-named category of receivers is the
Sony
SRF-59. Most DXers have bought them for $15-20, although I found mine
for
$10 + $3 shipping. I only got mine last night, so most of my knowledge
of
this radio is "hearsay". However, it has MW performance that will
knock your
socks off!! This model from Sony is one of only three (that we know
0f)
which has an innovative, patented "radio on a chip" integrated
circuit.
Evidently the circuit on the chip is perhaps like the old "TRF" high
performance AM radios of the 1960s/1970s, but accomplished on a modern
IC.
Even the selectivity of the radio is done within the chip itself...
and the
SRF-59 is HIGHLY selective.

The person who seems to have started this craze (at least amongst the
IRCA
MW club) is fellow Puyallup resident Gary DeBock. He has even received
Japanese TPs on the little radio, from right here in Puyallup! John
Bryant
is the keeper of "firsts," a list that documents ultra-light radio
accomplishments such as "first to hear a TA on an ultra-light radio".

A lot of info on these fun little radios is found on the www.dxer.ca
Web
site. Check out: http://www.dxer.ca/content/view/55/1/ "

Have fun and good DX

Watching the news today, and doing some Google searches to verify my information.. I'm wondering how much Clear Channel had to do with Romney dropping out of the race. Since CC is owned by Bain Investments, which in turn is owned (run?) by Romney, doesn't that create a HUMONGOUS conflict of interest, and violate federal election laws?

Pay attention to what? You seem to think that information is knowledge.
Well it isn't without understanding. You post a lot of crap. Some of it
is relevant and most of it isn't. Like I've explained before your posts
read like a Google search result. Since you are incapable of
understanding your own clueless nature I suggest you just accept
it on the faith that I'm right.

Hey Roy,

Your spat with Telamon is a real bore, and your new tactic of
senselessly dredging up old threads like this is particularly

obnoxious. Can't you try to contain your little spat with Telamon to the "RRS No Spin Clueless Factor" thread; and you two can just have at it there? Because quite frankly, I don't think many of us really give a damn about this idiocy. Alternately, why don't you abandon this boring nonsense and get back to your radio listening?

Speaking for myself, I appreciate some of your on-topic contributions. Your political postings, of course, I naturally ignore; they're off-topic, but that sort of rubbish seems to be unavoidable for so many RRS participants. This Telamon vs. RHF crap, however, is damn near intolerable, since there's now this insistence to carry this trash throughout the breadth of RRS postings.

So, could you please put a lid on it? Or at least keep it contained to the thread pertaining to your issues with Telamon?

Thanking you in advance,

Junius

3342. HD Radio spinners claim a breakthrough year

Newsgroup: rec.radio.shortwave
Date: 2008-02-08 12:05:04 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>

HD Radio spinners claim a breakthrough year

Pulling a fast one

By Nick Farrell: Friday, 08 February 2008, 8:30 AM

THE HD RADIO Alliance has been attempting to claim that 2007 was a breakthrough year for the technology.

HD radio sales need to be quite high if the radio stations are going to be able to convince advertisers go buy space.

According to a press release from the Alliance 330,000 HD receivers were sold last year. This is a 725 per cent increase from the 40,000 sets purchased a year earlier and therefore 2007 was a 'breakthrough year' for the technology. In 2008 they will sell a million of the things.

Well, not really. InsideMedia points out that while the figure was better than last year 330,000 is a drop in the ocean when it comes to this sort of thing. And when Best Buy and Wal-Mart drop to the new low price of just $99 it is sign that things are not going that well.

The Alliance is hoping that prices will drop further and kill off analogue sets. If that happened then perhaps the technology will go somewhere. But generally things like satellite radio or even plain old analogue are giving the technology a good kicking.

More here. µ

The key issue is that Samsung has designed a smaller single chip replacing
the multi-chip set, which could not be used in portables due to size and
power consumption. Who cares what is inside if it works as stated? It's not
"rocket science" just consumer electronics.

Clear Channel is not owend by Bain Capital and Thos. Lee Partners, and will
not be for several months.

Romney has not run Bain for a decade, and does not own any of it; he owns
shares in several of its funds.

Nope. Wikidud data.

Arbitron does not use ADIs any more, and has not for about 15 to 18 years. They use DMAs, same as Nielsen. Nobody uses ADIs any more, particularly since Arbitron does not do TV surveys. Arbitron reports are based on MSA, or metro survey areas, and twice a year you can also get, if you pay for it, DMA data... it is not released to the trades, ever. And buyers never ask for it. The PPM apparently will not use DMA data at all.

I wasn't talking about ratings, Buckwheat. I was referring to
reception of a portable device at distance with simple antenna and
sophistcated techology. Precisely describing and experience with an
add-on feature to a device, as you had attempted to present. The use of
the term was entirely appropriate to my context.

Had we been speaking of ratings, you'd be correct. But we weren't.

What's almost laughable, is that here I was agreeing with you, and
you chose to attempt to micromanage the conversation and start an argument.

Once again, proving my previous points for me.

For someone who asserts that his official duties include listening,
you really don't seem to be interested in what's actually being said to

you.

Sorry, but ADI's ceased to be used decades ago, and since population is
dynamic, and no ADI has been redefined, the old definitions are obsolete.
Using an obsolete term for a rapidly changing population base is absurd. Do
you measure weight in stones and volume in cubits?

> What's almost laughable, is that here I was agreeing with you, and you

I find it indescribably ludicrous that we would agree on anything.

That's ok.............it is good that we hooked up. Now, about that 3030.............it sounds like one of the bandswitching diodes for the MW range has blown. This is the reason that MW reception is dead. If you remove the cover from the radio and have the front panel facing you, the preselector cicuits will be on the left hand side of the top board. The MW section will be the second filter section from the front panel of the radio. This section is easily identified, since there are not tuned circuits.....you will see three resistors that make up the 10dB attenuator that is used instead of a filter section. Why AOR chose this silly implementation on the MW band escapes me. I replaced this attenuator network with a MW bandpass filter of my own design, and the radio had no overload problems. While I was at it, I replaced all of the switching diodes in the front end with 1N5767 PIN diodes. It worked pretty well after these mods. Feel free to shout me down directly from that other e-mail address if you have any questions!

Interesting you should mention that. My Super 7 documentation
includes driver/passenger weight in stone.

So, yes. The point again, being that in an attempt to agree with you,
I was describing a wide area. Not a ratings incremental section.

>

And yet, we have, and we did. And on more than one occasion.

Your bitterness does not become you. Certainly not someone in your
position. Certainly not someone who deigns to participate in USENet
newsgroups.

Which, I guess, also raises questions.

>> Once again, proving my previous points for me.
>>
>> For someone who asserts that his official duties include listening, you

> Not by you, at least.

Or anyone for that matter. Unfortunate. It is the essential
quality of Leadership that it listens BEFORE dismissal.

Even bulletproof warriors like Generals Puller and Patton
understood that listening is a far more important quality than speaking.

For someone in your position, that would seem a no-brainer.

Well....I guess experience has taught us in this case it is.

Have a nice day, David. Your vitriol does not become you. But it
does serve as an object lesson to the general tenor of Radio to it's
biggest fans.

And you wonder why we are less impressed with broadcasting as we
once were.

I'd say your bosses have a refund coming.

- - Actually, the idea is to add more features to a
- - player, phone or other device at the same price.

d'Eduardo,

A Key New/Expanding High Technology Marketing Concept :
Always Selling-Up at No Extra Cost :
* For Businesses the Continued Process of Up-Grading
your Technology to Stay Competitive and In-the-Game.
* For Individual Consumers : Having All the Latest Bells
and Whistles -aka- Staying Ahead of the Want-to-Bees.

- What is the current drain of your new doodad?
- That is the important spec.

David - That Is Very True ~ RHF

A Key Metric for Many is : Power Usage = Operating Time.

When they can make a Moto RAZR size "DooDad" that is
Truly an All-in-One Device and will run/play for a full 24 Hours
{All-Day} on a single charge : Then they will have an All-Day
Every-Day portable device that many/most Consumers will
think/know they : Got-To-Have-It { I Want/Need It Now ! }
.

3366. Old and New Marketing Metrics : Area of Dominant Influence (ADI) -and- Designated Market Area (DMA)

> -wikipedia

d'Eduardo the AMA "American Marketing Association" still
lists both Terms in their "Dictionary of Marketing Terms"
may be we need to rewite all the text books to suit you.

Area of Dominant Influence (ADI)
http://www.answers.com/topic/area-of-dominant-influence-adi?cat=biz-fin
In the measurement of television audience data, geographic area
composed of all the counties influenced by originating stations in a
particular television market. For example, the New York ADI is
composed of all the counties in New York and New Jersey where the New
York City television stations are viewed. Each county in the United
States is allocated exclusively to one ADI.
* See also : Designated Market Area (DMA) .
NOTE - Per the AMA - Area of Dominant Influence (ADI)
http://www.marketingpower.com/mg-dictionary-view167.php
The geographic area surrounding a city in which the broadcasting
stations based in that city account for a greater share of the
listening or viewing households than do broadcasting stations based in
other nearby cities.
* See also : Designated Market Area (DMA) .

Designated Market Area (DMA)
http://www.answers.com/topic/designated-market-area-dma?cat=biz-fin
Geographic area defined by nielsen media research company as a group
of counties that make up a particular television market. These
counties comprise the major viewing audience for the television

stations located in their particular metropolitan area. For the most
part, the metropolitan areas correspond to the standard metropolitan
statistical areas (see metro area) defined by the Federal Government
Office of Management and Budget. The areas do not overlap, and every
county in the United States belongs to only one DMA. dmas are used in
the evaluation of audience data as well as in the planning and buying
of media.
* See also : Area of Dominant Influence (ADI)
{ Oops we have gone full-circle }
http://en.mimi.hu/marketingweb/area_of_dominant_influence.html
NOTE - Per the AMA - Designated Market Area (DMA)
http://www.marketingpower.com/mg-dictionary.php?Searched=1&SearchFor=designated%20market%2
0area
- The geographic area surrounding a city in which the broadcasting
stations based in that city account for a greater share of the
listening or viewing households than do broadcasting stations based in
other nearby cities. It also is the specific geographic area to which
a county in the United States is exclusively assigned on the basis of
the television viewing habits of the people residing in the county.
* See also: Area of Dominant Influence (ADI)
{ Oops we have gone full-circle here too }

3369. Power amps/watts consumption query?

Newsgroup: rec.radio.shortwave
Date: 2008-02-08 17:48:33 UTC
From: plimmer@telkomsa.net
Message-ID: <8946ce7b-0790-4b7d-af34-ff0437190a28@i29g2000prf.googlegroups.com>
Source record: 136287

I would be grateful for the advice of one of our technically minded
members:
The new radio I have coming merely states it's power consumption as
210VA, as it is a multivoltage radio.

What consumption in watts/amps does this translate to at 240 volts AC
mains?
Also. if I used an inverter to drive it off a 12 volt DC battery, what
would the power consumption in amps then be?

A friend who helped me wrote:
Watts = Volts * Amperes so 210VA = 210 Watts

210 Watts means 210 / 240 Amps which is .875 Amps.

If you want to use a 12V battery, 210 Watts means 210 / 12 Amps or
17.5 Amps. This assumes the AC supply is as efficient as the DC
supply. It won't actually be quite as efficient, so you're likely to
need fewer Amps, maybe 14 or 15 but that's a guess. Maybe you can ask
as the DC current depends on their design which is not known to us
yet.

Those numbers look very high to me. I suspect they've made a little
mistake.

I replied:
it does seem very high to me for 210VA. at 240 volts AC mains.
As just a poor guess I would estimate
0.5 amps at 240 volts AC mains
and 8 amps at 12v DC
but I cannot calculate it.

So what do the experts out there think?

Would be grateful for your help.

Drape an empty Beer can upside down on your radio's whip antenna.(drink all of the Beer out of that can first though) I did it, on one of my AM/FM/Shortwave radios that I had accidently yanked over one night when I was in one of my drunken stupors on doggy's couch and I broke off part of that antenna.(I can't blame that on my little doggy) It sure does improve the sound quality when I listen to Paul Gallo's radio squawk shew and Garden Mama's www.gardenmama.com radio squawk shew and JT and Dave's radio squawk shew on, www.supertalkms.com

- Pay attention to what?

Telamon - Thank the fact that you did Reply :
Means that You are in-fact Paying Attention.

- You seem to think that information is knowledge.

Telamon - Information (Step # 1) can create Knowledge
(Step # 2) within the Mind of the Reader . . .

- Well it isn't without understanding.

Telamon - Understanding (Step # 3) comes with
"Thinking" within the Mind of the Reader :
Which Requires Steps # 1 and # 2 To Cccur First [.]

All I can do is Lead the Reader to Step # 1 the Information.

Next the Reader {Seaker-of-Knowledge} has to Read the
Information for himself and become Knowledgeable (Step # 2)

Then the Reader has to Internalize the Knowledge to 'create'
their Own Understanding based on # 1 and # 2
{Personalize the Knowledge}

- You post a lot of crap.

Telamon - Crap-to-You is just 'possibly' Gold-to-the-Newbie
-ps- It is you 'choice' to Read It -or- not; and to Evaluate-it -or-
Discount-it as you choose to do : Based on your own needs.

- Some of it is relevant and most of it isn't.

Telamon - If I am writing to a Newbie hopefully it is 'relevant'
to Their-Needs -but- What is 'relevant' to them may in-fact not
be 'relevant' to you - all-things being 'relevant'.

- Like I've explained before your posts read like a Google search
result.

Yes that they would about right :
1 - Google Search Results {999+ Webpages}
2 - Evaluate the Results {Check-Out the Top 10~30}
3 - Select the most Pertinent 1 to 5 Links {Normally 2~3}
4 - Post those Evaluated-and-Selected Links {by Me}
NET RESULT - Let the Reader Decide to Begin Their Own
Internet Voyage-of-Discovery to satisfy their personal need
for : Information + Knowledge = Understanding.

- Since you are incapable of understanding your own
- clueless nature I suggest you just accept it on the
- faith that I'm right.

I don't think Sony is technically making the 7600 any more. But I
think there is a lot of inventory out there. It's a good radio for
sure. But also look at comparable offerings from Kaito/Degen such as
the DE1103.

According to Samsung, there's no chance of ever producing an HD radio that won't be a power hog. That's not to say that anyone would want an HD radio even if it weren't a power hog. I'm just sayin'....

WHAT KIND OF RADIO IS IT -- 210 VA IS TOO HIGH FOR A RECEIVER -- MORE LIKE A
TRANSCEIVER

Volt-Amperes VA usually refers to AC apparent power - it takes into account reacive components see URL:
http://www.allaboutcircuits.com/vol_2/chpt_11/2.html

True power in an AC circuit is IxE if there are no reactive components otherwise it is I squared R or ExI x Cos theta

So True Power (Watts) does not equal VA unless the circuit is purely resistive.

Assuming your device is resisive (or near to it) then see URL:
http://www.sengpielaudio.com/calculator-ohm.htm

which indeed gives 0.875 Amperes

Again using
http://www.sengpielaudio.com/calculator-ohm.htm

which indeed gives 17.5 Amperes

Allowing for efficiencies and loss etc I would allow for 20 to 25 amperes
Most inverters will specify a power rating

Lamont

What are you talking about? We were telling him how to clean the earphone jack on his radio -- not his ears.

If he never uses earphones, he may still need to clean the earphone jack because it contains a switch to cut out the speaker, and if the switch contacts get dirty, the speaker stops working.

> contacts get dirty, the speaker stops working.

the problem isn't that theres no sound coming from the speaker ... the
problem is that it is very very weak, no matter how loud the volume
thingie is turned up.

Thanks for that Lamont.
The device is a transceiver and the power usage on:
Transmit is 850VA and on
Receive is 210VA

The result you and my other friend get (which is the same) seems
enormous.

Right, just what you'd expect if those contacts are dirty, so that there is
a high resistance in series with the speaker.

so ... how would i clean those contact ... someone i think suggested
sticking a qtip into the hole where headphone jack goes ... shud the
qtip be dipped in alcohol or some other cleaning fluid?

And I thank God for you. Reading this news group is much more
entertaining with you in it.

Don't thank me for RHF. He got on the news group by himself as did you
Mr. Clueless.

Unless you mean to say I control both of you. In that case take a few
laps around the block and then do 50 pushups. Get back to me when you
have completed these tasks as I have more for you to do.

Yeah, earlier in the thread he did the same to me. Apparently he wants
to argue even when you agree with him.

Thanks for that Lamont.
The device is a transceiver and the power usage on:
Transmit is 850VA and on
Receive is 210VA

Wow John those figures are high -- is it a tube type radio?

Example a solid state Icom IC-746 PRO - URL:
http://www.icomamerica.com/en/products/amateur/hf/746pro/specifications.aspx

Power supply requirement 13.8V DC ï¿½15%
Power consumption Tx Max. power
23A
Rx Standby 2.2A
Max. audio 3.0A

That's 317 Watts Tx and 41 Watts Rx (max figures)

Lamont

> sticking a qtip into the hole where headphone jack goes ... shud the
> qtip be dipped in alcohol or some other cleaning fluid?

If you have headphones, the first thing I would try is just plugging the headphones in and unplugging them several times. If this helps, you're on the right track and 1 drop of rubbing alcohol on the tip of the plug would be the next move -- then plug it in and unplug it repeatedly. I don't think a Q-tip stem would be particularly helpful since it wouldn't come in contact with the contacts.

Next step would be to open up the radio and see if you can actually get to the contacts.

If the headphone jack is the same as in the ICF-2010 (2001), then, sadly, it is a unique item no longer available from Sony. With my ICF-2010, I worked out a way to use a commercially available one, with circuit modifications. Lacking an ICF-7600 service manual, I don't know what to advise, but the problem is soluble.

That's assuming it is the headphone jack.

>
As you noted above 210 Watts is to much power for a receiver. Chances
are then the VA the OP refers to is apparent AC power or peak power. In
order to answer the PO's question if we assume AC 210VA peak power I
have found that for most power supplies, which are full wave rectified
followed by larger capacitance a figure of about a third works well.
Then the AC real power would be 74 watts. Then to get to DC we need the
RMS value of the AC real power, which is a factor of 2.828 so about 26
watts RMS. At 12 Volts to drive the inverter would be about 2 amps DC.
I'm making plenty of assumptions here. You will be somewhat more than
2.1 amps depending on the inverter efficiency. Lets use a figure of 80%
so the battery current draw would then be about 2.5 amps. 26 watts and
2.1 amps are rational numbers for todays solid state receivers. A lot of
assumptions but it seems to make sense.

JP,

Message - "New Radio in South Africa"
http://groups.google.com/group/rec.radio.shortwave/msg/c9866d6ff18a951c
I am getting another RX, an Icom IC-7700 see brochure at:
http://www.ab4oj.com/icom/ic7700/IC-7700_pre.pdf
ICOM IC-7700 - http://www.rigpix.com/icom/ic7700.htm
Minute-Video - http://www.youtube.com/watch?v=eJS0z-Y5hKc

You are talking about your new Icom IC-7700 Transceiver.
IC7700 - http://www.ab4oj.com/icom/ic7700/main.html
Icom IC-7700 Transceiver - Rated Power Consumption :
Tx Max. power 800 VA {Transmit 'Power Output' Mode}
Rx Stand-by 200 VA (typ.) {Receive Only Listening Mode}
Max. Audio 210 VA (typ.) {Receive Only Maximum Audio Output}

12 VOLT DC POWER SOURCE / SUPPLY
- = FOR RECEIVE ONLY USE = -
[NO MIC CONNECTED / NO TRANSMITTING]

240 Volts divide by 12 Volts = 20 f#

0.875 Amperes @ 240 Volts

0.875 Amperes times 20 f# = 17.5 Amperes @ 12 Volts

Add a 15% Power Supply Safety Factor :
17.5 Amperes times 15% (0.15) = 2.63 Amperes
17.5 Amperes plus 2.63 Amperes = 20.13 Amperes

Requires as a Minimum a 12 Volt DC Power Supply that
is Rated at 20+ Amperes. {25 Amps would be better.}

FWIW - Going from 240 VAC to 120 VAC the 0.875 Amperes
would become 1.75 Amperes {2 Amps}

Again these Rough Numbers are for "Receive Only" Use
-NOT- Transmit. ~RHF
.

No, it's not a tube rig, it's the latest Icom IC-7700.
See the spec sheet at the end of the brochure:
http://www.ab4oj.com/icom/ic7700/IC-7700_pre.pdf

Golly Brenda how does
210VA = 95.55W
850VA = 386.75W

wikipedia on volt-ampere
A volt-ampere in electrical terms, means the amount of apparent power in an
alternating current circuit equal to a current of one ampere at an emf of
one volt. It is equivalent to watts for non-reactive circuits.

Are you using peak, rms, or average factors?

I assume the VA figures given by John are rms values

thus RMS voltage is the amount of dc voltage that is required for producing
the same amount of power as the ac waveform

URL on rms voltage

http://www.free-ed.net/sweethaven/ModElec/acee/lessonMain.asp?iNum=0102

I don't like his style. I find all the punctuation confusing and
difficult to read. I don't like the fact he constantly refers to yahoo
groups for answers instead of posting an answer. I don't like the fact
that he posts from Google, which automatically munges all addresses in
his posts. I don't like the fact that he replies with dozens of links
some appropriate and some not. I don't like that he responds to all spam
in the news group, which I have blocked but since he responds to all of
it I get to see it anyway. I don't like the fact that even though you
point out to him that his behavior is annoying he won't stop. All pretty
clueless behavior.

I hope that answers your question.

The calculator used assumes a power factor of .70. It is right in line with
the calculations used for USP'es in their V/A to W conversions.

I looked at the Samsung web site and could find no reference to a HD
radio system on a chip. I could find several versions of an analog
radio on a chip and HDTV chips but no HD radio chips.

Eduardo is blowing smoke.

The reason is the power supply input impedance is not resistive and
worse the bridge diodes will only conduct on the AC peaks thus the power
factor correction and the VA being a peak value not RMS.

Very good Brenda -- agree if we take into account power factor. I assumed a
resistive load

Also folks note the ICOM 7700 is a 200 Watt Radio and uses a switching power
supply. Finals take 42 Volts

Lamont

Tell me you are not buying this transceiver for SWL.

In any event you better be real careful with an inverter powering this
transceiver as it looks to have an auto switching power supply in it.
You would be safe with a 115V inverter but you might see trouble ahead
with a 220V inverter. I've seen inverters hiccup when a load is switched
on, which might cause the auto switching supply to go into the doubling
mode for 115V. When the inverter recovers to 220V you will be lucky if
all that happens is you blow a fuse. Whether or not you have a problem
might depend on timing. Where the inverter is in the AC cycle when you
happen to switch on the radio may determine if a failure event occurs.
Having some load on the inverter like a lamp before you switch on the
radio may help stabilize the situation. Good luck.

No need to worry boys. Eddie says cell phones and other gadgets with HD radio built-in are just around the corner! But you'll need to hook your FM dipole and MW loop antennas up in order for the "HD" part to work right. Just a minor detail though.

Oh, and don't forget your contribution to iBiquity That'll cost you $100 or so.

That Eddie - he knows everything. Just as him.

Thanks Telemon and all of you for your replies.
The 7700 certainly draws a lot of current on receive mode only.

It will be used for listenig only and I will disable the transmit
through the internal software.
I was hoping to take it to our powerless Seefontein DX site, but the
problems Telemon highlights and the huge 12v DC current draw means I
would need massive batteries, so I wont take it.

Instead I will keep my Icom IC-756PRO III for the DXpeditions.

The Listener - HD : If a Tree Falls & No One Hears It . . .
http://www.washingtonpost.com/wp-dyn/content/article/2008/02/08/AR2008020801035.html
-by- Marc Fisher - Washington Post Staff Writer
Sunday, February 10, 2008; Page M05

Actually it sort-of-proves that "Content-is-King" and gives two
good examples of FM "HD" Radio Stations :
WHUR - 96.3 FM
WAMU - 88.5 FM
That have a Primary FM "HD" Station with an "HD-2" secondary
Broadcast that has real "Content" which is attracting new Radio
Listeners.

Plus there is natually a longer list of "Bad" FM Radio Stations
which also happen to be Broadcasting in "HD" {IBOC}.

The Subtitle {Theme} : HD Radio's Scatter-Shot Development
has Raised a Chicken-and-Egg Question for Radio Stations
and the Radio Listening Audience.
-source- Brainerd Communicators

Note - Bridge Ratings conducted a survey about HD and
found that only 7 % of respondents expressed 'interest'
in owning an HD Radio presently.

OK that would be 7 % in the First 3 Years (1-2-3) :
Followed by 21 % in the Second 3 Years (4-5-6) :
Followed by 63 % in the Third 3 Years (7-8-9) :
Resulting in about 67 % Two-ot-of-Three AM/FM Radio
Listeners expressed 'interest' in owning an HD Radio
-or- in-fact Owning and "Listening To" an HD Radio
as their Primary Daily Radio.

Also - Bridge 'projects' Slow to Poor Growth for HD Radio
-but- What has to be factored-in is the general decline
in the Weekly Average of Radio Listening Hours. Radio
itself is a declining Media; where Media "Choices" are
Expanding. A Ten (10) Year Transition from Analog
Radio to "HD" {Digital} Radio is an Acceptable Business
Plan for the Broadcasting Industry.

Worth reading the whole Article since is has both some
Pros-and-Cons concerning HD Radio.

=PS= AM/FM Radio - Be It Analog -or- Be It Digital :

Clear Channel already tried a cell phone deal and it fell through due
to lack of interest. The iPhone and iPod are going with iRadio and
FlyTunes, and the iPod constitutes 80% - 90% of the MP3 market.
There's nowhere for HD Radio to go.

That's key-down CW right? Worst case?

If you're going to be just listening or working SSB your power
consumption will be much less.

Probably drawing at *least* 2 amps on receive. And, that puppy is capable of 200 W output. With transceivers that put out only 100 W one had best have *at least* a 20 amp supply. I realize that the '7700 is not capable of DC operation, but that gives you some idea of power consumption.

Just a thought, but you might peruse the Universal catalogue and look at the power consumption of *similar* rigs.

Yikes! That's worse than a desktop computer. Do you generate your own electricity?

You might as well get an R-390A using 250 Watts to listen to the radio.
Zounds!

I saw that and to me it further establishes that while we do see
climate changes we don't fully understand why and for how long and
truly where things will end up. While it makes sense, to me, to keep
greenhouse gas emissions as low as possible and to develop alternate
energy sources.....our human impact kinda pales in
comparison to Mother Nature.

HI all, re Elad FDM77 SDR
has anybody managed to use any other software to control/use this radio?,
seems not many of us with these radios around ,maybe due to having to use
Elads software .

Any help appreciated !!

Tony

3458. EDUARDO - Jim Cramer spits in Radio's face

Newsgroup: rec.radio.shortwave
Date: 2008-02-09 17:40:45 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <80ec1090-057a-46c9-95e0-c4ff5ea98dde@f10g2000hsf.googlegroups.com>
Source record: 136376

"Jim Cramer spits in Radio's face"

"All of this from the perspective of Wall Street, of course, not Main Street. But it's not pretty. Says Jim, "radio is finished as know it." See the video here. (Sorry, embedding isn't enabled. I hate that.) And the video is tagged with a spot for a car that features...XM Satellite Radio. The Devil is in the details, of course. And the issue in my mind is the "as we know it" part of Cramer's statement. Nothing else remains static. Why should radio?"

http://www.hear2.com/2008/02/jim-cramer-spit.html#comments

Comments: "I think music radio is dead or dying. Companies are still spending tons of $$ on music radio but it is almost like they are waiting for the best of the unknowns to rise to the top so the money can be shifted there. I think talk radio is vibrant. Watching music radio die sucks, but it had its time and it was a damned good run. The companies that run music stations have sucked the life out of the stations."

Ha! Ha! SUCKA! I told you that music-oriented FMs are screwed! AM news/talk/sports is radio last bastion:

"News/Talk/Sports:Radio's Last Bastion"

"Music FMs of any flavor are utterly screwed... Right now -- while FMs are losing the music audience to new media -- satellite radio is offering more News/Talk/Sports programming than we can fit on AM radio..."

http://ftp.media.radcity.net/ZMST/daily/IS031005.htm

And, I'm not even in the broadcast industry, as you! SUCKA!

3459. Re: Ping Drifter AOR-3030 repair

I think they are using a Japanese equivalent to a 1N4148. Good luck!

Pete

Here you have several of broadcasting's top executives talking about the
chip and its effects:

http://radioink.com/HeadlineEntry.asp?hid=140889&pt=todaysnews

The chip is announced, shipping in demo quantities and available for bulk
shipment in Q2.

The shoutcast audience in any US metro area is not even large enough to qualify for inclusion in the radio ratings.

They are also prime locations for intercept polling.

3466. EDUARDO - Chrysler to put WiMax into its cars

Newsgroup: rec.radio.shortwave
Date: 2008-02-09 18:51:57 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>

"Chrysler to put WiMax into its cars"

Recommend article:Detroit (MI) - Chrysler is working on what the company calls "advanced in-vehicle wireless communications" that will be based on cellular, Wi-Fi and WiMax technologies.

Chrysler may have been a bit slow adopting electronic gadgets for its vehicles in the past few years, but the company plans to be on the forefront when the next wireless technology is rolled out.

"We recognize that customers are spending more and more time in their vehicles, and that the automobile is becoming much like an additional room in the home or office," said Frank Klegon, executive vice president for product development at Chrysler. "To address this evolving reality, Chrysler vehicles will soon boast an unprecedented level of vehicle connectivity, delivering a wide array of important communications features directly to our customers, in their vehicles." Chrysler believes that wireless connectivity will also increase the security of cars.

In fact, specifically the intent to integrate WiMax into cars comes very early, even before the technology has become generally available to business and home users.

So, what exactly is WiMax expected to bring to the driver and passengers of a car? Of course, general availability and a greater bandwidth than cellphone networks makes this technology an attractive tool to increase data communication: Chrysler envisions that future GPS systems will feature satellite imagery downloaded from the Internet as well as automatic wireless map updates, real time weather information. Downloads to in-car entertainment centers can also include service reminders, Internet search, e-mail access, and online shopping - which will include the availability of fee-based multimedia content. On the service side, an always-on broadband connection could be used to download software patches to virtually any electronic module in a car.

"Chrysler's in-vehicle communications strategy will continue to focus on creating a safe-driving environment through practical innovations, while enabling customers to choose a variety of features they want," said Klegon. "Chrysler's connectivity solutions will deliver simplicity, security, freedom and flexibility," the executive promised.

He said that Chrysler, Dodge and Jeep vehicles will be getting WiMax connectivity "over the next few years."

WiMax services are expected to be rolled out in the U.S. this year.

http://www.tgdaily.com/content/view/35601/145/

SUCKA - it's over for HD Radio!

The following two quotes from the link were all I could find in the
article about "chips." Please excuse the quotes within quotes.

"Asked about HD Radio and its traction with consumers, Smulyan said
adoption is going to take time. "There are a billion radios in the

United States today," he said. "We're not going to replace a billion radios in a week and a half." Mason agreed, saying, "If you look and see how quickly this curve is coming, it is remarkable." He said the real discussion will be about HD chips and the distribution channels that will open up when the chips appear in iPods, cell phones, and other devices."

"Another questioner asked if there's any industry group working with consumer electronics manufacturers on getting radio tuners into devices, and Smulyan responded, "The answer is yes. The HD [Digital Radio] Alliance is working on it." "

So this adds up to nothing. These are just nebulous statements that are promises with no specifics of any kind. No names, no dates, no devices (chips), no products, and the last sentence in the first quote states that the discussion on new devices (chips) has yet to take place.

All this is, is promotional talk. Smoke and mirrors. It's a dream. It could amount to something in the future but to date ZERO.

The ICOM on receive is not out of line with SWL table top receivers.
My R8B specification states it draws 2 amp at 11 to 16 volts (27 watts)
DC power and the AC power is about 40 watts.

< Snip >

You can always use the tin foil hat for an antenna.

Yes this is the double sun spot bottom I spoke of in earlier posts.

The Canadians have done a lot of solar research. It's clear that since similar temperature trends have occurred on other planets in the solar system that the suns output is changing and that the earths global warming due to CO2 is BS.

I suppose you would rather I lie about this? I could go on with more
things that I don't like about you. Remember that the disrespect started
with you not listening to other people like myself. Myself and others
have made numerous requests that you stop doing what is listed above.
You decided instead to continue to annoy. You reap what you sow.

Looks like you are headed to your second big win.

Let's see now, you don't know how to answer a question directly; and can't tell the difference between information, understanding or knowledge; and you will continue all the annoying behavior listed above.

Very clueless.

But don't despair, MWB will be along soon to correct my grammar and make everything all better for you.

The only car manufacturer I know of that is promoting HD radio is BMW. I have heard the BMW commercials on AM radio as my source but I don't know if it is an option or standard or any other details. Could be just promotional BS. I'm not interested enough to follow up on it. I already waisted my time on the Samsung site looking for vaporware.

these are all people who have seen the Samsung presentations. "The chip"
means the Samsung chip, which is now in limited developer shipment per
Samsung's statements at the CES.

My X5 has HD. Third generation and marvelous. Takes FMs in HD to and beyond the useful analog contour, and AMs on clean frequencies beyond the onset of noise on analog. During the storms two weeks ago, I could get KNX HD for news well into Riverside County, while the analog signal was unlistenable due to the lightening and atmospherics.

Samsung does not promote the HD chip to consumers. It has certainly spent a lot of time with iBiquity and its shareholders, though.

They were seen by the NRC Denver Convention in 1963, and by multiple DXers
in NE Ohio such as the renowned Ed Krejny in the same time period. They were
listed in NRC's DX Achievements awards.

Step up to the plate and be a MAN, 'Eduardo'. Post all YOUR 'veries' on the internet, notarized. Yeah, those 2200 veries, the 87 countries...

But, you can't do it, can you? Why? Because they don't exist, right?

LMFAO

But wait, oh faux one, you just said they weren't QSL's... At any rate, they
didn't exist then, and they certainly don't exist now, isn't that right?

Someone made a mistake. All the references to a radio on a chip on the
Samsung site were analog. Looks like there is some confusion here as
they do have chips for satellite and HD but not AMBCB and FMBCB.

I'm not talking about promoting. If you visit the Samsung semiconductor
site they have announcements for all chip developments. All I saw were
analog radio on a chip for AMBCB and FMBCB.

< Snip >

Was it an option or standard equipment?

How KOGO 600? Can you get that in HD?

There's no reason for them to be included in your so called "ratings" which measure nothing but a dying medium's last gasp. Shoutcast (and Icecast, Live 365, etc.) are where the top dollar demos are going for good music radio and NPR/CommunityRadio. There is no reason to subject one's self to the torture that is commercial radio in the 21st century. It is painful to listen to sonically (and HD sounds worse on AM) and only a complete loser would voluntarily absorb the content.

That's all well and good, but unless Toyota makes it standard it ain't
gonna fly. And they won't and it won't, unless Ibiquity pays them big
bongos to do it, like the satcasters did.

Nope. That's not going happen. Once I have written something using the
wrong meaning word or a typo I will reread it and make the correction
mentally without realizing it. I see other peoples mistakes very easily
but not my own. I'm also a bit of a mental dyslexic and write sentences
backward, which I have to rewrite. I also write using overly complicated
sentence structure and I use extra words in many sentences.

He claims to have radios. I don't know about that either.

There is the very teensy problem of it actually EXISTING.

Yes it is a SMALL matter but important.

- = [Telamon Writes Some More Concerning RHF] = -

- I suppose you would rather I lie about this?

Telamon - Please Do - Rage On !

- I could go on with more things that I don't like about you.

Telamon - Let It All Out !
-ps- Could you 'please' Number them
so that I can keep track of them all.

- Remember that the disrespect started with you not listening
- to other people like myself.

Telamon - OK so I am suposed to Live MY Life -by- Your Rules.
-ps- In a word : NOT !

- Myself and others have made numerous requests
- that you stop doing what is listed above.

Telamon - Dang That Has NOT Worked
- So Why Not Ignore Me
- Kill File Me
- Plunk Me !

- You decided instead to continue to annoy.

Telamon - I continue to be me -and- Not a Clone of You.

- You reap what you sow.

Telamon - That I Do -but- You have become OCD'ed with Me
and My Postings Here on Rec.Radio.Shortwave and IMHO
that is Bad for You.
-ps- Two Words : "Chill Out !"
How ? - Love Yourself {Be Yourself} More Than : You Dislike Me.
http://en.wikipedia.org/wiki/Self_love

- Looks like you are headed to your second big win.

Telamon - Dang sounds like you are still Stuck-on-Stupid
-ps- Been There Done That
-but- Every-Time that You Declare Me The Weekly WINNER :
That Instantly akes You the Weekly Loser.

- Let's see now, you don't know how to answer a question directly;
- and can't tell the difference between information, understanding
- or knowledge;

teli, Teli. TELI ! - Please Re-Read this Post :
Telamon Understanding the Quest for {Process} :
Information + Knowledge = Understanding
http://groups.google.com/group/rec.radio.shortwave/msg/9e921b730c5de922
-ps- Please Educate Yourssellf Better on this Topic and
Internalize the Message {Create Your Own Understanding.

and you will continue all the annoying behavior listed above.

Telamon - Once Again I am 'here' to satisfy myself :
Not To Live Up To Your Expectations.

- Very clueless.

Telamon - Maybe so in your opinion -but- At least I am Consistant
-ps- So Why Not Ignore Me - Kill File Me - Plunk Me

- But don't despair, MWB will be along soon to correct
- my grammar and make everything all better for you.

Telamon - Are you that 'in of need of attention' ?

Hopefully MWB has gone back to his Reader/Lurker Mode
and has {for him} an acceptable level of Enjoyment from
this Newsgroup.

Telamon- Where-as-You seem to be on a new OCD 'Kick'
of Sparing with My-Selfish-Ness {RHF} and d'Eduardo.
http://en.wikipedia.org/wiki/Selfishness
* A good exercise for d'Eduardo to practice his Radio Ratings
Song-and-Dance.
* Great Fun For Me -cause- While You are Arguing with Me :
I am Debating with You - I Know that is Debatable -but-
Lets Not Argue About It ! :o)
-ps- Argue-v-Debate & Debate-v-Argue
Sometimes I Amaze Myself :o)

3501. EDUARDO - Univision says the HD Radio is going to expolde on us!

Newsgroup: rec.radio.shortwave
Date: 2008-02-09 22:52:30 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <9be9437e-e16a-4433-8b22-da8712cf6266@v67g2000hse.googlegroups.com>
Source record: 136519

"Top Radio Execs Make Upbeat Impression In L.A."

"Asked about HD Radio and its traction with consumers, Smulyan said adoption is going to take time. "There are a billion radios in the United States today," he said. "We're not going to replace a billion radios in a week and a half." Mason agreed, saying, "If you look and see how quickly this curve is coming, it is remarkable." He said the real discussion will be about HD chips and the distribution channels that will open up when the chips appear in iPods, cell phones, and other devices. HD is just going to explode on us," Stone said, "and we may not all be ready for that."

http://radioink.com/HeadlineEntry.asp?hid=140889&pt=todaysnews

Is this true, Eduardo, that HD Radio will be included in iPods/ iPhones? Wait - I'll answer that:

"FlyTunes - Radio for the iPod that eliminates Radio Stations"

http://www.hear2.com/2008/01/flytunes---radi.html

"Radio on the iPod? Only if it's Internet Radio"

http://www.hear2.com/2007/11/radio-on-the-ip.html

"Presto: That iPhone is now a Radio!"

"Less than a month ago I posted about streaming radio coming to an iPod near you. Now comes word of a SHOUTcast player for your iPhone allowing you to stream thousands of stations to your phone (using WiFi - or not)."

http://www.hear2.com/2007/11/presto-that-iph.html

More BS from your windbags, Eduardo!

And if memory serves, KNX also dropped the amount of power to their AM
broadcasts when they started using the HD format.

"Renowned Cambridge SoundWorks HD Radio Designer Explains HD Radio"

"HD Radio broadcasts require a consistent, stronger signal than analog broadcasts... Below the minimum required signal le vel, the HD Radio program switches back to the analog signal... There is a limit to how far you can be from a transmitter and still receive an HD Radio transmission. For flat land with no obstructions, this limit could be as far away as 20-25 miles. For hilly terrain, the limit may drop to 10-15 miles. For the strongest signal within 20 miles of a radio transmitter, the user should position the provided 30 inch dipole antenna either horizontally or vertically along a wall or window."

http://www.hdradio.com/the_buzz.php?thebuzz=87

"Questions About High Definition HD Radio"

Q: Why do I get drop-outs or silences on the HD2 Services?

A: This is a sign of marginal signal strength at your radio. It is important to remember that the HD Radio multicast channels (HD2, HD3, etc), unlike the HD1 channel, do not have an analog signal for the radio to 'fall-back to' when digital reception is lost. So a listener with marginal reception that is losing the digital signal will experience periods of silence until the signal is regained.

- Nope. That's not going happen.
- Once I have written something using the wrong meaning word
- or a typo I will reread it and make the correction mentally
- without realizing it.

Ditto That.

- I see other peoples mistakes very easily but not my own.

Telamon - Dang You Are Me !

- I'm also a bit of a mental dyslexic and write sentences
- backward, which I have to rewrite.

Ditto That Again.

- I also write using overly complicated sentence structure
- and I use extra words in many sentences.

Telamon- Well I don't know if you could call my string of words
a real sentence; but I do know that I usually throw a whole lot
of extra words in there; just for good measure; should anyone
in-fact be measuring. [Oops that was an Example - I Think :-]

- - Roy seems to be doing fine on his own.

MWB - Glad to know that I can still 'represent' My-Selfish-Ness
{RHF}.

- - Quick, everyone, submit sample writing styles to Telamon
- - to make sure your URL format doesn't offend him.
- - We'd all hate for our beloved netiquette curmudgeon and
- - resident tech-lord to get his feathers ruffled...

- You sure are helpful all of a sudden but other people don't
- have to worry about this. RHF is in a class by himself.

Telamon - TYVM for Elevating Me to such a High Place in your
Order of Important People here at Rec.Radio Shortwave.

-ps- I will try to keep earning your high regard.

- - Looking for that post in the archives where Telamon
- - insulted me for complaining about RHF's writing style
- - about five or six years ago...

- You are here to be insulted.

Telamon - Is that what you think ? ? ?
IMHO - No One Is Here To Be Insulted.
-IF- That Is Truly Your 'Thinking'
Please Take It To the "Sado-Masochism" Newsgroup
http://groups.google.com/group/soc.subculture.bondage-bdsm/topics
To Satisfy Your Special Needs To Insult People.

- - Geez, this here newsgroup is full of characters, ain't it?

- I'd say you are one very special character.

Ah Telamon - You are 'special' in your own way. :o)

This bring up another question of why they don't have indicators to show you what is happening. I guess that would take all the fun out of it.

> More BS from your windbags, Eduardo!

I B OC'Deed and Half-Crocked,

You Don't Get It !

When the Power goes OFF and the Celphones and
WiFi Networks are all down.

Again When the Power goes OFF and your PC ain't
Working and the ISPs are down.

Your Local AM/FM Radio Station will go to generators
and your 'portable' AM/FM Shortwave Radio will still
be working on Batteries. Does not matter whether the
Radio System is Analog -or- Digital -or- IBOC

+Plus+ The AM/FM Radio in your Car/Truck will still be
working too.

When All The New Media Fails : Radio Will Still Be There.

free over-the-air am/fm radio - it will be there ! ~ RHF

Your mistake is depending on a website for data only of interest to
manufacturers, iBiquity and its shareholders. The chip is, obviously,
digital as HD is digital.

Mine had it installed on the lot. Which is funny, as my dealer is a good 70
miles from the closest HD station.

> How KOGO 600? Can you get that in HD?

I live in the Pasadena-Glendale area, and KOGO is a nosy catch at best
there. I am inland, and off the coastal plain area of good conductivity.

I was able to carry KFYI 550 to within 15 miles of Quartzite along the 10 in
full stereo HD several times.

Streams, satellite, HD2 channels and analog or HD terrestrial stations are all included in the Arbitron radio ratings. Additionally, there are audits of streaming "stations" and, as I said, the listening level of Shoutcast across the US would not qualify all its channels combined for the minimum reporting standard for radio ratings. In other words, think of the worst radio station in your market, and it has as many or more listeners than Live 365 or Shoutcast.

Less than a third of radio listening is in the car. Less than 20% of all
cars are Toyotas... and the average US car is 8 years old. Automotive is
part of it, but clock radios, office radios, kitchen radios, portables, etc.
are where most listening takes place.

- Seems a tad on the wasteful side.

David,

It's a Transceiver that has both the Receive and Transmit
Sections {Except maybe the Finals} Powered-Up {Active}
or in Stand-by {Waiting} all the time that the Transceiver
as a 'unit' is turned ON.

If as JP has said : That he can Lock-Out {Shut-Down}
the Transmitter Section then he may be able to reduce
the Receive Power Consumption in the Stand-by Mode.

Rx Stand-by 200 VA (typ.) {Receive Only Listening Mode}

Max. Audio 210 VA (typ.) {Receive Only Maximum Audio Output}

I have to think that about have of the Power being used
in the Stand-by Mode is Transmitter specific and if the
Transmitter Section could be De-Powered; then the overall
Power Consumption could be reduced for "Receive Only" use.

~ RHF

This is not a place to satisfy yourself. It is a place to post news.
Jerk off some place else.

> - Very clueless.
>
> Telamon - Maybe so in your opinion -but- At least I am Consistant
> -ps- So Why Not Ignore Me - Kill File Me - Plunk Me

I done all that. You still show up due to volume. You are not "a target"
but part of a group of special poster boys. This isn't just about you.

> - But don't despair, MWB will be along soon to correct
> - my grammar and make everything all better for you.
>
> Telamon - Are you that 'in of need of attention' ?

No I'm fine. Thanks for asking.

> Hopefully MWB has gone back to his Reader/Lurker Mode

> this Newsgroup.

You mean crawl back under his rock.

> Telamon- Where-as-You seem to be on a new OCD 'Kick'
> of Sparing with My-Selfish-Ness {RHF} and d'Eduardo.

Oh look, you discovered a theme. That's minus one point for you.

< Snip >

Oh darn! You are back up another point. That was close. You almost had a clue there but it slipped away from you at the last moment.

My opinion is that you are clueless. You are not going to change that opinion by arguing with me about it. You could change my opinion by changing your behavior.

So far you are ahead in the polls. Good work.

"On Radio: Car audio has quite a past and future"

"The percentage is even higher for certain times of the day such as
6-10 a.m. weekdays (37 percent, just behind home listening) and 3-7

p.m. weekdays (more than 44 percent)."

http://seattlepi.nwsource.com/tv/325058_radiobeat26.html

Are you really in the broadcast business?

MWB or Billy can be much more fun than RHF.

> In the meanwhile, thank you both for the mild entertainment.

It is a part of my new years resolution to go for the entertainment value in whatever I do. I'm glad to have brightened your day.

This is after all the RRS no-spin clueless factor report thread but due to another of a clueless individual's bad habits, the subject line was changed. Oh well, so much for containment and threading. I'll change the subject line back Sunday night.

Your mistake is that they announce any semiconductor development on
their web site. They may limit the amount of data for proprietary
reasons but all projects are announced with some detail.

I've seen plenty of posts here praising the Quantum Loop antenna. I'm curious to know, has anyone tried the Tropical Band loophead offered for the Quantum Loop antenna? If so, how's the performance, and how does it compare with other antennae that you've used for tropical band listening? Also, any opinions on the longwave loophead?

Regards,

Junius

Why would someone listen to hideous over the air commercial radio at
home if they have broadband and access to thousands of few or none
commercials stations?

The reason CC doesn't put their stuff on Shoutcast is that they'd rather
not call attention to the competition.

Telemon,
Why would a semiconductor company announce all their development projects on the internet? This would tell all their competitors what they are doing. Most companies do not disclose development activities until there is a competitive reason to do so.

If you go to the site, it says skyfm is currently serving 17117 users. That is spread across 30 stations.

If you go to shoutcast, you'll see that many of the feeds support 1000 or fewer connections.

Combine that with the low bitrates offered for many connections and I fail to see how they seriously compete with a single station that may have 10,000+ listeners.

They are a publicly traded company and need to let their stockholders
know what they are working on. Check the news here

Yeah, it's a sad life when I depend on this ng for entertainment,
nonetheless I'll take whatever jollies I can get. Don't take this too
hard, but your guys' barbs at each other are not quite as entertaining
as the DXAce & mII threads which do seem pretty sparse these days.

-

Junius - I never knew that they offered a Loop Head
for the Tropical Bands - you live and learn ~ RHF

Looked around and found this "RadioIntel Review"
of the Quantum QX Loop v2.0
http://www.radiointel.com/review-qloop.htm
-by- Jay Allen - RadioIntel Contributing Editor
http://www.radiointel.com/about.htm

TROPICAL BANDS LOOPHEAD : (~1.8 to ~6.2 MHz)
http://www.dxtools.com/QX.htm
http://www.dxtools.com/QXv2+.htm
Looks like it works with both the Quantum QX Loop v2.0
and the Quantum QX Loop v2.0 Plus.

FWIW - I have the older Quantum QX Pro Loop [15"] that
http://www.dxtools.com/QXPro.htm
has a switch for both AM/MW and LW; but never found
anything down in the Longwave Band that 'interested' me.
The Quantum QX Pro Loop works great on the AM/MW Band.

I fired the last salvo too soon, was thinking of 790 KABC which has
become a bit problematic in terms of reception. Noticable in the car,
not at home, and several friends have made the same comment. Damn I
hate getting old......or is that forgetfull.......oh hell.

Does it's existence on the web make it real?

The fact is that Samsung has worked with iBiquity on the chip, and they announced its development and availability schedule at the CES to the interested parties. There are two more single chip 9 mm low power consumption chips from other fabs accepting orders now, too.

My interest is not particularly limited to AM (although 710, 720, 1110, etc.
are receivable by me) but to FM for HD2 reception. I listen to the station I
am most involved with in programming in HD all the time.

Why not do what I do and ask them? A lot has to do with the talent (in my
case, Piolin, Buenos Dias Recuerdo, Omar 6 Argelia, Luis Jimenez, Amalia
Gonzalez, La Peligrosa, Serralde, Alfredo Contigo, etc., etc.) who
entertain, as well as the miusic... and the fact that the music is selected
by frequent consultation with local listeners for local tastes.

Likely there is a point in development, like just prior to shipping, when a
development becomes public. Since the HD chip is only shipping in
development quantities to radio manufacturers, the formal announcement may
not have been made... but that is just a guess.

Telamon,

Not -if- iBiquity Digital Corp entered into an "NDA" with Samsung
http://en.wikipedia.org/wiki/Non-disclosure_agreement
that allowed iBiquity to manage the public release of the Chips
Existance and Development. Then when iBiquity 'felt' that the
Chip was Ready to be Released; and that the Marketing and the
News of the Chip would have a Positive Impact on the Promotion
of "HD" Radio and the Sales of "HD" Radios. iBiquity would do
it jointly with Samsung.

we were not here and we did not talk ~ RHF
.

Craig M,

Good Point especially when they may be developing a Chip
'for' iBiquity under an NDA which gives iBiquity control over
all Information about the Chip.
http://en.wikipedia.org/wiki/Non-disclosure_agreement

~ RHF

You totally don't get it. There are thousands of web radio stations.
They are growing and you are bleeding.

You were partially right a few weeks ago; talk is going to FM. The
music is going to the web.

Really? Public companies actually tell their stockholder the details of their development plans?

Not in any company I've worked for. If what you propose were true, what would the value of a confidentiality agreement be?

All publicly traded companies release this kind of information in the
media. There is no argument to be made here. It is in the best interest
of the company to promote what it is producing.

Products under development, non-competes, etc, are not pub lically
announced. Most development is kept highly confidential.

Yes. This happens every day.

> Not in any company I've worked for. If what you propose were true, what
> would the value of a confidentiality agreement be?

Where have you worked that sales has not stated that the latest device will be available on some date? Sales is trying to create demand before the parts are made so they can sell them the day the parts can ship. How else do you think things work? You must have a pretty sheltered work life there buddy.

Why not look at the link. Read any news service about the stock market. Just about any company any day is telling you what the next big development is going to be that they are working on. When I worked for a semiconductor company I was always busting my butt to make some deadline created in a press news release. It's no different where I work now since I still work in manufacturing.

Believe me if Samsung is or has been working on a HD radio on a chip you would see a press release about it on their web site. Everything else is there like HD TV devices so why not an HD radio chip? Eduardo got you convinced it is a big secret? Well think again.

Baloney. Sales is chomping at the bit to release the news to build demand well in advance of actual production. It's the same anywhere for any manufacturer. Blow your smoke someplace else.

> http://en.wikipedia.org/wiki/Non-disclosure_agreement

You don't understand this. NDA's have to do with proprietary
information. The press releases are not going to declare how the part is
made or details of the software/firmware or how it operates. The press

releases are a sales tool to build demand. In them they will tell you a product identifying number, the device family, what it is used for of course and a few details to create demand such as it does not need support components or it uses 1/2 the power of the current generation or its twice as fast and a date samples will be available and when full production will commence. Any Semiconductor company does this.

There is no argument here. Go read the news and find out for yourself.

There are no radios announced yet. The public has no interest in chips, only in devices. The work now is helping manufacturers design receivers of all kinds. The publicity phase begins when there are products.

There are, first, no radios designed yet with the chip. The work at this stage is to develop products or integrate the chip onto existing models.

Bull. On many occasions I have singed NDAs for research projects for radio stations... proprietary information. A number of years ago, when I had some developmental equipment in test at a station, I signed NDAs on its very existence. I have signed numerous NDAs for software I was involved in late Alpah and early Beta testing. NDAs are used whenever a person has information that would prove vompetitively damaging were it to become general knowledge.

Not necessarily in early development (when competitors could spot a trend and jump on a bandwagon) or if the development is shared technology the partner does not want released.

No, but the industry leaders spoke of it two weeks ago in LA, with specific
reference to the chipset that the investors in iBiquity have all received
news about.
>
>> The fact is that Samsung has worked with iBiquity on the chip, and they

> company that is working on this. Put up or shut up.

As I said, the heads of several of the companies that own iBiquity made
comments about this 12 days ago in LA. It exists, Samsung has shown the
prototypes and the people who need to know, the factories that turn out mass
market radios, are in the loop.

This has got to be the most full of crap posts you have made to date.
You do not know what you are talking about.

I explained my experience working for a semiconductor company so I know
the score not that it matters as anyone can read promotional news from
any semiconductor company out there in the world.

You sure have your special brand of BS going there. Eduardo brand BS is
piled higher and deeper than any other brand. What a funny guy.

I'm planning on voting for a Republican this year, for the first time in my life, because he supported Obama. So, that means you can vote for Obama and cancel out the disturbance from my vote.

See, wasn't that easy.

Yes, I read those comments from the CES show. They were along the lines
of wouldn't it be nice if sometime in the future the parts existed. This
is not much different than saying if we all got along we could have
world peace tomorrow so Kumbya to you too.

The difference is that the owners of iBiquity are made up in a large part of the large broadcasters. This is why Stone, Mason and Smulyan 12 days ago raved about the chip and the potential explosion of HD.

I work in radio, but I know each company in the business does business in slightly different ways; same applies for semiconductor companies. What went on at yours, in the past (you used past tense) is not necessarily what Samsung in partnership with iBiquity does today. Different company, different point in time. And Samsung likes to think of itself as a consumer electronics company that is vertically integrated, not a semiconductor company.

They spoke of the "chip" in such vague terms that it is clear it does
not exist. They spoke of the "chip" in future terms.

Nothing special about the semiconductor company I used to work for. They
all have in the past and currently operate the same way in this regard
for the same business reasons.

If you watch the web stream, it was sepcifically referred to.

Similarly, if you "were there" at the CES, you know Samsung was offering the
chip to a variety of manufacturers of radios and audio devices.

I'm not pointing out the company I work for on Usenet. Any company out
there makes forward looking statements in press releases followed by all
the disclamers. Go read any business news outlet about any manufacturing
company. Go read the link to the Samsung web site I posted or any other
semiconductor maker.

OK, provide links to all the products your company has in development. It
should be easy if this is all public information.

I read the Samsung press releases and the HD radio chip was not
mentioned. I read the CES press releases and the HD radio on a chip was
not mentioned. Analog radio on a chip yes. HD TV on a chip yes. Other
types of chips yes.

If you know of a link to a semiconductor company or a show like CES
about a HD radio chip then post it otherwise put a sock in it.

I'd remind you that the CEO's or COO's of several of the largest radio
companies in the US made "forward looking" statements two weeks ago at the
SCBA conference; such statements come under considerable scrutiny by
regulatory agencies if they are not based on factual data.

There is no press release; the chip is being promoted to manufacturers, not
the public.

That doesn't matter. If they are intent on releasing it for production
they would have a press release saying so.

Great! I'm still waiting for that letter from your *daughter* on the government letterhead!

Can't produce it? Why? Could it be that your *daughter* isn't really a lawyer? Could it be that your *daughter* doesn't really work for the government? Could it be that it's all a fabrication on your part, oh faux one?

Waiting for more lies,

3581. Radio Myanama - Burma

Newsgroup: rec.radio.shortwave
Date: 2008-02-10 13:09:05 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <47AEF771.91DF4CD9@milestones.com>
Source record: 136449

Radio Myanma, Burma, 5985.8, noted here at fairly good level again this morning after 1300. Far better than yesterday.

Kind of corresponds to the K7RA propagation report which indicated a solar wind stream today, much as it was on 2 February when I also had fairly good reception.

From: Bob Miller <NOSPAM@neosoft.com>
Message-ID: <re2uq3hdanbvjdqoc0g7drgde9d2llhi4r@4ax.com>
Source record: 136450

When all the TV stations go digital in 2009, will I still be able to pick up the audio for channels 2-13 on my CCRadio? Or will that part of my radio become obsolete?

Bob
k5qwg

Obsolete. It's all moving.

Trust me. If there's a new AM/FM HD radio chip pending at Samsung or any other place on earth iBiquity would be touting it from the roof tops. They need any positive press they can get because to-date there hasn't been much to report. As I said before - no demand, no HD.

Eddie, you're like the Titantic, you're playing music while the ship is sinklng.

The new Colby PORTABLE HD Radio has only 5 hours of battery life - so much for your low-power HD chipsets.

I was in NYC last week and surprised at how good the reception was in my hotel room with a sony 7600gr and the random wire they provide, compared to reception in Los Angeles generally.
Question though: I wasn't able to find the BBC, whereas in LA I catch the Africa broadcasts very well. What frequencies/times do listeners in/around NYC catch the BBC on shortwave? Thanks.

15400 should be good from 1500-2300. That's generally what I listen to during my local afternoon.

When I get around to it, I can scan one state... a nice one like CA. Still, that is something like 80 scans, which is something that requires a bit of time at home, which in the pre Spring book period I do not have.

The chip was most recently touted by some of iBiquity's investors, via the heads of major broadcast groups at the SCBA conference in LA two weeks ago Tuesday. It's written up in Radio Ink, with clear references to the coming "HD explosion" based on the new chip.

<The new Colby PORTABLE HD Radio has only 5 hours of battery life - so
<much for your low-power HD chipsets.

There is no radio with the new chipset yet. The chips will ship in quantity
in Q2 of 2008 and there should be stock in stores by the end of Q3 of this
year.

It will probably become obsolete.

Low-power stations (that's a special class of license, it doesn't necessarily refer to the transmitter power) are not bound by the 2009 deadline. However, the FCC *will* set a deadline for them eventually and I strongly suspect it will be within a year of the deadline for regular stations. In any case, unless you live in an isolated rural area, chances are none of the stations you want to listen to have low-power licenses.

The regular stations aren't necessarily abandoning their VHF channels. (though many are) However, they are all converting to digital transmission. Your CCRadio will not receive digital signals.

Well then, why not start with the 87 countries? But, like all the rest, you'll be hard pressed to do it. Why? Because, in the past, you admitted to not having any of those 'veries' anymore. Remember?

So, either you were lying then, or you're lying now.

Either way, like most anything else you've *claimed* to have *had*, it's most likely a pathological lie on your part.

Waiting for more lies,

```
Eduardo is probably lying again - the new Coby portable HD radio, with
a battery life of 5 hours, and which comes with an external AM-loop
antenna, probably uses the new "low-power" (ha, ha) chipset.
```

What's the matter, Eduardo - no response? GMs and PDs already know
that HD Radio is DOA:

"Where is the Cool, the Content, the Charge?"

"Here is another bad sign: almost every time I speak with a GM or PD
about HD Radio, they say, ...it's a non-starter, isn't it? If we don't
believe in HD Radio, who will?"

Hello everyone,

I'm new to SWL, and am really interested in doing some DXing. But I've already got two strikes against me--one, I live in an apartment, and, two, it's just outside of downtown Portland, Ore.

I do have a decent Sony portable radio, and I feel like I'm just on the verge of getting some good signals. My question is this--I have a small balcony off of my radio listening room, and I'm wondering if there's a way I can use the metal railing of the balcony as an antenna. It's just about what you think, a large metal railing. Can I wrap some wire around part of it, and alligator-clip the other end to my whip antenna?

Thanks!

Jim Boyd

Jim,
You would be much better served to run some wire around the balcony
itself than using the rail. Run the wire along the 'floor' to the
outermost portion of the balcony, then up to the 'ceiling' and accross
it and then back down.

Which Sony? If it has an antenna jack use that, otherwise strip off
some insulation and wrap the wire tightly on the whip - or use an
alligator clip if you have one handy.

Greenhornet,

It's an ICF-SW7600GR, and it does have an antenna jack. It also has a
compact wire antenna with a clip that connects to the whip antenna.
I've deep sixed that out my window a couple times with limited
results, but the weather hasn't yet been warm enough for me to go out
to the balcony. I would think running that around the balcony the way
you suggest might work.

I have the REDSUN 2100 and it is by far the best radio of it's type I've ever owned. I purchased mine from a dealer in Hong Kong.

I notice the CC Radio SW is touting this "twin coil ferrite antenna" with their version of the radio. is this something C Crane added to the 2100?

Does it make the radio any better?

Dan

Greetings Ace!
I am trying to remember what you are using for receiver and antennas. It seems you used to list it at the bottom of your log reports. I am sure you have multiple receivers but maybe not many antennas. What are you working with lately? Have a great week! Jon in Upstate South Carolina.

I was listening this morning on the R8. I also have an R7, R8A and R8B.

Antennas are a 70' and a 200' longwires.

If there was nothing to disclaim then it was just vague hot air. I read
the statements you refer to and what was said was not defined in any way
so disclaimers were not necessary.

Press releases that do make real promises about some product always
have disclaimers.

3633. FS: ICOM IC-R75 HF+50 MHz All Mode Communications Receiver

Newsgroup: rec.radio.shortwave
Date: 2008-02-10 23:22:29 UTC
From: Blair M <blairm@aci.on.ca>
Message-ID: <Y5-dndo28besGjLanZ2dnUVZ_hmtnZ2d@aci.on.ca>
Source record: 136551

Hi folks. I must say farewell to the following almost brand-new unit. Please see the link for more information:

Toronto, Ontario - $650 OBO

http://toronto.craigslist.ca/tor/ele/569227097.html

This receiver was purchased new in October 2007 from RadioWorld in Toronto, is in perfect condition and has never left my home. The1 year warranty is still valid, and has 8 months remaining.

The IC-R75 covers a frequency range that's wider than other HF receivers; 0.03-60.000000 MHz. This wide frequency coverage allows you to listen to a variety of communications including marine communications, amateur radio, short wave radio broadcasts and more. The specs are as follows:

. Ships with the UT-106 DSP unit installed.
. Coverage: 0.03 - 60 MHz
. Modes: AM, S-AM, FM, USB, LSB, CW, RTTY
. Pull out the weak signals: The IC-R75 sports cutting edge technology for today's serious DX'er, yet it is easy and affordable enough for casual listener use.
. PC programmable: Get PC control of the IC-R75 with optional RS-R75 software on CD ROM. Runs on Windows 95; or Windows 98 and comes with the necessary connection cable.
. DSP (Digital Signal Processing): This IC-R75 has the optional UT-106 DSP plug-in module allowing AF-DSP. It offers noise reduction, and auto notch filter capabilities.
. Multiple scan modes: 5 Scan Modes are available: program scan, memory scan, select memory scan, priority scan and auto memory write scan.
. Optional filter slots: Two optional filter slots are available - one each for 1st IF (9 MHz stage) and 2nd IF (455 kHz stage).
. Superior receive: With its superior dynamic range of >104 dB, twin passband tuning (PBT) controls, and a large front mounted speaker, the IC-R75 offers unparalleled receive quality.
. Easy to use: IC-R75's large, backlit, 8 character alphanumeric LCD display is easily readable in low light conditions, and at all viewing angles. The numeric keypad offers direct frequency or memory channel input.

Additional features:

. Selectable RF gain/squelch control
. Attenuator
. 1 Hz tuning resolution
. 2 level preamp
. Selectable AGC

. Three timer functions: sleep, power OFF, power ON
. Noise blanker
. Single touch controls
. 12 V DC Power (120 V AC adapter included)
. Voice synthesizer (optional)
. 99 memory channels plus 2 scan edges
. Triple conversion superheterodyne receiver
. Synchronous AM detection (S-AM)

Take heart, your radio will not be obsolete.

Once the FCC auctions off all that valuable spectrum, it will be purchased
by Bill Gates and his cronies for Billion$$$...

Then, your radio will pick up all the wonderful wireless crap that they will
market to the public for more useless gadgets.

CE,

The Sony ICF-SW7600GR AM/FM Shortwave Radio has
an External Antenna Input that uses a 1/8" Mono-Jack.

As "GH" pointed out the Balcony Rail may not be your
best Antenna especially if it is Grounded via the building
to the earthen ground -or- some how re-radiating RFI
Noise from the building itself.

BUT - The Balcony Area is a good place for an Antenna
especially if the other choices are : an In-Door Antenna
-or- NO Antenna at all.

READ - The Simplest Shortwave Listener (SWL) Antennas
That I Know Of . . .
http://groups.google.com/group/rec.radio.shortwave/msg/9e3eb0cf326d45d1
In you case a 25 Foot Roll of Speaker Wire would most
likely do the job of going from your Radio inside the Room
out to the Balcony and around the Balcony.
* Connect the 1/8: Mono-Plug to the Speaker Wire
* Run the Speaker Wire from the Radio's Listening location
out to the Balcony.
* Tie a Knot in the Speaker Wire where you want it to start
as a Dipole Antenna on the Balcony.
* Split the Speaker Wire apart beyond the Knot.
* Sort of Balance {Mirror Image} the Two separated Speaker
Wires : Run them Out, Over, Up/Down until you have run out
of both the Speaker Wires. Use Black Plastic Electric Tape
and/or Wire Ties to secure the Speaker Wire in place.
TIP - It would be nice if you layed out the two Speaker Wires
so that their Ends came together : This way you could leave
them un-connected at the Ends as a Dipole -or- Connect them
together {Strip the Insulation Wire-to-Wire} to form a Loop
Antenna Element. as an alternative to the Dipole Antenna.
NOTE - Your Dipole Antenna / Loop Antenna should measure
between 20 to 30 Feet Tip-to-Tip or Around.

What You Have Built _ On your Balcony is a Bent Dipole Antenna
which is Balance Antenna {Self-Noise-Cancelling} and requires
No Ground Connection.

Also Read - A Shortwave Radio plus a Dipole Antenna
can get you The World on Radio !

3657. Re: The RRS no-spin clueless factor report

Newsgroup: rec.radio.shortwave
Date: 2008-02-11 06:10:11 UTC
From: Telamon <telamon_spamshield@pacbell.net.is.invalid>
Message-ID: <telamon_spamshield-46476C.22100510022008@newsclstr02.news.prodigy.com>
Source record: 136575

It's 10:00PM. Do you know where your news group Trolls are?

Welcome to the RRS no-spin clueless factor report and now here is this weekï¿½s news. Similar to the low number of sunspots of late the numbers of clueless poster boy posts appear to be hitting some low numbers with the exception of RHF. Here are the self-vote totals for this week.

Billy Burpelson - 4
m II <c@in.the.hat> - 7
Mike <mwbryant@aol.com> - 8
cuhulin@webtv.net - 30
David <nothere@nowhere.org> - 74
David Eduardo - 83
RHF - 256

It looks like there is some kind of trouble on the horizon as Billy, m II, MWB, and even cuhulin had low numbers. Worse, m II and cuhulin actually made a few on topic posts. Well, need I mention that posting on topic is not clueless behavior and I don't want to seem overly harsh but if this keeps up you could get dropped off this list.

MWB had low volume again this week but the few posts he made were of very high quality. This guy has not lost his touch and just needs to get his volume up by arguing with other people.

Another troubling development concerns David the not there guy. Some of his posts could not be classified as a rant. Worse, some of his posts made rational sense and other users of the news group recognized this. If David keeps up, he could be dropped off the list.

The good news is Eduardo got back onto the HD chip vaporware bandwagon and made quite a spectacle of with that topic. Using the old tried and true privileged information tactic he continues to try selling that the new HD radio chip as just around the corner with no way to verify it. We should just believe him. That is very clueless David.

Last but not least is RHF with 256 self-votes. RHF is looking like a real standout in both quantity and very clueless quality. It looks to me that this boy will never get a clue. In a dramatic incident earlier this week, he almost got a clue but we all watched it slip through his fingers at the very last moment. It's probably the closest he will ever get to have one.

And now I would like to award this weekï¿½s clueless poster boy of the week award upon the confused head of RHF for his hard work at remaining as clueless as ever. That cutting and pasting must be pretty tiresome work and you deserve this award. Fine work like this could earn you the

clueless poster boy of the year award. Good work RHF!

This has been another installment of the RRS no-spin clueless factor report. Good night and good listening.

From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <86837bd8-95bc-470e-b967-328b68a3f3d9@v67g2000hse.googlegroups.com>
Source record: 136578

On Feb 10, 5:01 am, Kevin Trolley <d...@not.reply> wrote:
-
- I am thinking of buying an Eton E1 receiver.

-r- IMHO the eton E1 Radio is a very good FM+Stereo* Radio.
* Using External Stereo Speakers -better- a Set of 2.1 Self
Powered PC Speakers.

- I have read lots of positive reviews of the AM performance
- but I am wondering how well it performs on FM broadcast
- band in terms of sensitivity and selectivity.

-r- As good as many 'Component' AM/FM Receivers.

- Does anyone have such a receiver and is able to give me some tips.

-r- Read On.

> I am looking to have good sensitivity to pick up regular
- distant stations and to take advantage of tropospheric
- openings.

-r- Usually you need an Out-Side Multi-Element FM Antenna
to really do that well.

- Selectivity is also a must.

-r- See Page 76 of the Eton E1 Radio's Owners Manual.
http://www.etoncorp.com/upload/contents/307/E1XM_manual_lowres.pdf

- I live in Europe and FM stations can be 100 kHz apart here.

-r- See Page 76 of the Eton E1 Radio's Owners Manual.
http://www.etoncorp.com/upload/contents/307/E1XM_manual_lowres.pdf

- Is there any advantage of attaching an indoor FM antenna
- or does that offer no advantage over the whip?

-r- Start with a simple FM Folded Dipole Antenna - These can
be purchased for under $5 [US] and are made of 300 Ohm TV
Twin Lead.

SOURCES - Folded Dipole Antenna for FM Radio
RadioShack Catalog # 42-2385
http://www.radioshack.com/product/index.jsp?productId=2062691
* Horizontal Arms Tip-to-Tip 58-60 Inches across
* Vertical Feed-in-Line 72 Inches long
IMAGE => http://tinyurl.com/melg5
IMAGES => http://tinyurl.com/m2qaz

Alternative Links => http://tinyurl.com/pfvcr

- I am thinking of something like the CC Crane FM Reflect.

-r- The C. Crane Co. FM Reflect Antenna is a very good
In-Door FM Antenna and is relativily easy to position and use.
http://www.ccrane.com/antennas/fm-antennas/fm-reflect-antenna.aspx
TIP - Place it 45* Diagonal across a Window if you can.

- Where I am living I am not really in a position to
- erect an external antenna.

-r- Sorry to hear that. Consistant Distant (DX) FM Radio
reception usually requires an Out-Side Multi-Element FM
Antenna with a Rotor to point it at what you want to hear.

IMHO - The Eton E1 Radio has very good {great} FM Radio
Stereo reception.
http://www.universal-radio.com/catalog/portable/0101.html

FWIW - Right now I am Listening to KQED FM-Stereo in
San Francisco, CA on an Eton E1 Radio with the Whip
Antenna in Stereo which is about 120 Miles away.
KQED-FM 88.5 MHz => http://www.kqed.org/radio/
http://www.fcc.gov/fcc-bin/fmq?list=0&facid=35501

The Eton E1 Radio has a 40" Whip Antenna plus a "DX" *
Switch {RF Pre-Amp} which gives a 10~15 dB Signal Boost.
* News Flash the "DX" Switch works for the FM Band too.

For FM Radio reception the Whip Antenna can be positioned
Vertical {Straight-Up} as an Omni-Directional FM Antenna.
-or- Layed the Whip Antenna Flat and Rotate the Radio to
Peak or Null an FM Radio Station.

Message-ID: <CqqdnSN8JOfrhC3anZ2dnUVZ_r-vnZ2d@comcast.com>
Source record: 136580

I do have an E1. While its adjacent channel performance isn't in the class of the McIntosh MR-78 or the Magnum Dynalab MD-102, it is fairly respectable. Sensitivity is very good, suitable for FM DXing. It is in the class of the Boston Acoustics Receptor radio, which I also have. With the built in whip antenna, MW performance is similar to a very good automobile radio. They did a good job with this design.

Pete

-
- I am thinking of buying an Eton E1 receiver.

-r- IMHO the eton E1 Radio is a very good FM+Stereo* Radio.
* Using External Stereo Speakers -better- a Set of 2.1 Self
Powered PC Speakers.

- I have read lots of positive reviews of the AM performance
- but I am wondering how well it performs on FM broadcast
- band in terms of sensitivity and selectivity.

-r- As good as many 'Component' AM/FM Receivers.

- Does anyone have such a receiver and is able to give me some tips.

-r- Read On.

> I am looking to have good sensitivity to pick up regular
- distant stations and to take advantage of tropospheric
- openings.

-r- Usually you need an Out-Side Multi-Element FM Antenna
to really do that well.

- Selectivity is also a must.

-r- See Page 76 of the Eton E1 Radio's Owners Manual.
http://www.etoncorp.com/upload/contents/307/E1XM_manual_lowres.pdf

- I live in Europe and FM stations can be 100 kHz apart here.

-r- See Page 76 of the Eton E1 Radio's Owners Manual.
http://www.etoncorp.com/upload/contents/307/E1XM_manual_lowres.pdf

- Is there any advantage of attaching an indoor FM antenna
- or does that offer no advantage over the whip?

-r- Start with a simple FM Folded Dipole Antenna - These can
be purchased for under $5 [US] and are made of 300 Ohm TV
Twin Lead.

SOURCES - Folded Dipole Antenna for FM Radio
RadioShack Catalog # 42-2385
http://www.radioshack.com/product/index.jsp?productId=2062691
* Horizontal Arms Tip-to-Tip 58-60 Inches across
* Vertical Feed-in-Line 72 Inches long
IMAGE => http://tinyurl.com/melg5
IMAGES => http://tinyurl.com/m2qaz
Alternative Links => http://tinyurl.com/pfvcr

- I am thinking of something like the CC Crane FM Reflect.

-r- The C. Crane Co. FM Reflect Antenna is a very good
In-Door FM Antenna and is relativily easy to position and use.
http://www.ccrane.com/antennas/fm-antennas/fm-reflect-antenna.aspx
TIP - Place it 45* Diagonal across a Window if you can.

- Where I am living I am not really in a position to
- erect an external antenna.

-r- Sorry to hear that. Consistant Distant (DX) FM Radio
reception usually requires an Out-Side Multi-Element FM
Antenna with a Rotor to point it at what you want to hear.

IMHO - The Eton E1 Radio has very good {great} FM Radio
Stereo reception.
http://www.universal-radio.com/catalog/portable/0101.html

FWIW - Right now I am Listening to KQED FM-Stereo in
San Francisco, CA on an Eton E1 Radio with the Whip
Antenna in Stereo which is about 120 Miles away.
KQED-FM 88.5 MHz => http://www.kqed.org/radio/
http://www.fcc.gov/fcc-bin/fmq?list=0&facid=35501

The Eton E1 Radio has a 40" Whip Antenna plus a "DX" *
Switch {RF Pre-Amp} which gives a 10~15 dB Signal Boost.
* News Flash the "DX" Switch works for the FM Band too.

For FM Radio reception the Whip Antenna can be positioned
Vertical {Straight-Up} as an Omni-Directional FM Antenna.
-or- Layed the Whip Antenna Flat and Rotate the Radio to
Peak or Null an FM Radio Station.
.

3663. Re: Quantum Loop Tropical Band loopheads

Newsgroup: rec.radio.shortwave
Date: 2008-02-11 10:01:23 UTC
From: Pete KE9OA <p.gianako@comcast.net>
Message-ID: <XsednXYECNdtgS3anZ2dnUVZ_jadnZ2d@comcast.com>
Source record: 136581

The longwave loophead is very good, although I haven't tried the tropical band unit. I am in the process of designing a three band model that covers longwave through the tropical range for one of the manufacturers in this country. If anybody has any features they are looking for, please let me know. It is early enough in the game to implement them right now.
I have experimented with multiple band windings on one ferrite rod, and there are too many comprimises in the design. As an example, I encountered self-resonance effects from interraction with the windings for the different ranges. This is the reason that Philips used separate LW/MW loopstick antennas with the D2999. This is also the reason that the loop antenna manufacturers in the USA are also using separate plug in loops.
The main thing that is holding me up with the tropical band unit right now is that I have to wait until I get some samples of ferrite rod with a mu of 400 or so. I've got some 900mu material, but with a permeability this high, only 16 turns center tapped, are needed for the required inductance. I have discovered that at least 40 turns are required in order to develop enough magnetic current in the ferrite rod for adequate amplitude. With my current stock, the tropical band loopstick in about 10dB lower in output.
I am thinking about a rod diameter of between 1/2 inch to 3/4 of an inch. It seems that output amplitude has a relationship to the cross sectional area of the ferrite itself.
An alternative to thie multiple head design would be to use a high Q tuning capacitor with a range of 14pF to 1500pF.
A 6:1 ball reduction drive would be used with this cap in order to make tuning easier. I have built a couple of prototypes in the last couple of weeks, using #36 x 14 strand Litz wire, and the results have been very good. This design seems to work fairly well, even without regeneration, but let me know if that is something you would like to see.

Pete

Junius - I never knew that they offered a Loop Head
for the Tropical Bands - you live and learn ~ RHF

Looked around and found this "RadioIntel Review"
of the Quantum QX Loop v2.0
http://www.radiointel.com/review-qloop.htm
-by- Jay Allen - RadioIntel Contributing Editor
http://www.radiointel.com/about.htm

TROPICAL BANDS LOOPHEAD : (~1.8 to ~6.2 MHz)
http://www.dxtools.com/QX.htm
http://www.dxtools.com/QXv2+.htm
Looks like it works with both the Quantum QX Loop v2.0
and the Quantum QX Loop v2.0 Plus.

FWIW - I have the older Quantum QX Pro Loop [15"] that
http://www.dxtools.com/QXPro.htm
has a switch for both AM/MW and LW; but never found
anything down in the Longwave Band that 'interested' me.
The Quantum QX Pro Loop works great on the AM/MW Band.

Well then, why not start with the 87 countries? But, like all the rest, you'll be hard pressed to do it. Why? Because, in the past, you admitted to not having any of those 'veries' anymore. Remember?

So, either you were lying then, or you're lying now.

Either way, like most anything else you've *claimed* to have *had*, it's most likely a pathological lie on your part.

Waiting for more lies,

That ain't going to happen. The spaces between stations cannot be used willy-nilly due to the fact that digital TVs have crappy front ends and will freeze-up in the presence of adjacent channel doodads.

3669. Shortwave is alive in Africa

Newsgroup: rec.radio.shortwave
Date: 2008-02-11 14:15:40 UTC
From: plimmer@telkomsa.net
Message-ID: <9dbf471a-0687-4c4f-be37-a5356e0cc262@s13g2000prd.googlegroups.com>
Source record: 136587

Shortwave is alive in Africa.
I did a bandscan at 1330 UTC which is 3.30 p.m. in the mid afternoon, about
the worst possible time to look for shortwave.
These are the stations I logged clearly per band:
21 Mhz band - 9 received of which 1 were English
17 Mhz band - 11 received of which 3 were English
15 Mhz band - 18 received of which 4 were English
13 Mhz band - 11 received of which 1 were English
11/12 Mhz band - 30 received of which 5 were English
9 Mhz band - 28 received of which 4 were English
5/6/7 Mhz bands - 2 received of which 1 was English
Total all SW bands 103 stations of which 19 were English.
Some had nice music.

In the evening after dark when shortwave conditions are at there best, the
number of stations possible here would be double the above numbers.

So shortwave is alive and well in Africa with plenty of interesting stuff to
listen to.

Have fun and enjoy your shortwave radio

Tardo is more fun when he's on his game. When he gets sloppy it's all
just too easy. My guess is he's getting a little tired of making stuff
up and then straining to keep various different stories straight. He
strains for our amusement, though, so I guess I shouldn't complain.

Steve

I don't think he's tired of it at all. Fact is, he can't help it. It's apparently a Gleason tradition, possibly even a genetic disorder.

Sure, just try it. What have you got to lose? In a pinch I've even connected a short wire to the metal ground screw on an electrical switch plate with fair results. If you're on the 2nd floor, a "ground" can be a decent antenna.

If the railing works, a stainless hose clamp would be a better way of securing the wire to the rail.

Good Luck,

Art N2AH

I think I've been picking up a station out of Morocco, at least. Which
is pretty good considering my tiny portable with a random length of

speaker wire draped over the frozen patio furniture, around the corner and over the side of the balcony. And I did get the lightest whisper of what I thought was something out of The Gabon. Just a snippet of French around the time that my Passport said might be Radio Gabonaise.

Totally unconfirmed. Sorry I don't have frequencies. My logbook is not handy.

I don't want to nit-pick, but this is not strictly accurate. While it
offers wide coverage, the receiver is only guaranteed to work 0.1-29.99
and 50-54 MHz. Selectivity and sensitivity outside of those ranges may
not be what you hope for.

Also, marine communications tend to be well outside of this extended
range much further into VHF. 156-162 MHz is where most of those channels
live. Even air traffic stuff starts somewhere around 108 MHz.

Looks like a fine receiver, however.

So, you can demand proof from others but don't need to back up your own, rather extravagant claims. Why are you such a hypocrite? Perhaps you're just too busy planning the Bush retirement party.

Just put the cards up on a web site and get it over with. What are you hiding?

Do you actually HAVE any reception confirmations? If you refuse to cooperate with this request, I may be forced to call your daughter/family some really ugly names. That will certainly get you motivated...at least YOU seem to think that method works and if YOU think it, it must be true.

I see you're well stocked up on the alcohol. That's good. You certainly don't want
another Driving while under the influence charge, do you..or Heavens forbid,
getting nailed by another car while you are stumbling in the walkway in front of
the liquor store.

Mind you, the insurance company did pay you rather well the last time.

-
- That ain't going to happen.
- The spaces between stations cannot be used willy-nilly
- due to the fact that digital TVs have crappy front ends and
- will freeze-up in the presence of adjacent channel doodads.
-

David,

How ever the FCC could usse two of the 'Old' Analog
TV Channels to -= E X P A N D =- the FM Radio Band !

Yes "Expanding" the FM Radio Band makes sense
to cover 76 MHz to 88 MHz to create and additional
60 'new' FM Radio Channels.

This can be done by 'converting' the former Analog TV
Channel 5 & 6 to an "Expanded" FM Radio Band.

Digital "HD" TV with Multi-Channel in Channel Broadcasting
will now have UHF Channels 14 to 69 which is 55 Channels.

But with any where from 1 to 4 Digital Sub-Channels nested
[HDTV-2~5] - http://en.wikipedia.org/wiki/Digital_subchannel
in each HDTV Channel that would give at least 110 separate
HDTV BroadcastChannels and possibly up to 550.

Presently many PBS HDTV Stations in the USA Broadcast :
* Daytime 6 AM ~ 6 PM = Four SD-TV {Analog} Channels
* Nightime 6 PM ~ 12 Midnight = One HDTV plus One SD-TV

it's a 'vision' thing ~ RHF
.

CE,

Here are another two simple 'Inductive' {Pick-up} Antenna
-Tricks- for Shortwave Radio Listeners (SWLs) living in
Apartment/Condos : Try Wrapping 10~12 Turns of
Insulated Wire around the :

* Telephone Line between the wall to the phone
usually close to the wall.

* Cable TV Coax Cable between the wall to the TV/STB
usually close to the wall.

Sometimes these simple 'Inductive' {Pick-up} Antenna
will work with good RF Signal levels for AM/FM Shortwave
Radio Listening.

Other-Times Oops ! - All this simple 'Inductive' {Pick-up}
Antenna may do is add to the Noise Levels that you are
hearing without an improvement in what you can hear.

cost little in time and money -and- worth a try - iane ~ RHF

3694. EDUARDO - Who needs "Tagging" for HD radio?

Newsgroup: rec.radio.shortwave
Date: 2008-02-11 20:43:19 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <4fae1bb8-1fe7-4b99-b23c-96cfd5a23ef5@e6g2000prf.googlegroups.com>
Source record: 136612

Who needs "Tagging" for HD radio?

No "HD tagging" required. No HD radios required, in fact. Why buy a new radio in order to tag your songs when you can do it on an iPod right now?

Just point your iPod here.

It's not exactly effortless, but it works great. Brilliant!

From there they can stream a station, access podcasts and look up the last five songs played. They can buy one of those tracks from Apple's music store, iTunes, or get a whole CD album from the online retailer Amazon. GCap gets a cut of those retail revenues.
The service still has glitches, including the fact that wireless broadband delivery makes it hard to listen to radio on the move. Accessing iTunes or Amazon to buy music also stops the radio stream, something GCap's technology team hopes to iron out.

And what's ahead?

GCap also hopes to develop the iPod service so listeners can tag, or bookmark, news items, interviews and promotions they hear and then return to them when they have more time. For example, they could bookmark a promotion for free tissues, said Pembrooke, and when they re-visit the item the pack of tissues is automatically sent.
As well as developing "enhanced ads", GCap wants to make its stations available on other new devices coming onto the market.

The main difference between what these guys are doing and what we're focused on in the US is this:

In the US we are obsessed with making HD radio work. While GCap is evidently obsessed with making their brands work, wherever listeners can and will experience them.

Woe unto you if the technology is more important than the brands which that technology will carry.

Yeah, I read somewhere, maybe on Radiointel.com that with the 7600
Sony would be exiting the shortwave market. Changing markets, etc.,
I'm sure figures high on the list.

With a little looking old inventory will be found for quite a while.
To be honest I would probably forgo the 7600 in favor of one of the
chinese brands with a real tuning knob.

3697. EDUARDO - Digital Radio in the UK: "Not Economically Viable"? Read on...

Newsgroup: rec.radio.shortwave
Date: 2008-02-11 21:02:04 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <fb8cbdf1-d9a7-4fc2-af28-fd3922a6b0f4@u10g2000prn.googlegroups.com>
Source record: 136615

Digital Radio in the UK: "Not Economically Viable"?

The UK's largest commercial radio company is pulling out of digital in favor of broadband and FM, calling digital "not economically viable":

GCap Media chief executive Fru Hazlitt said the "new GCap" would be built on winning brands, winning content, and "a focus on platforms that consumers want". Despite a 10% share of all radio listening in the latest Rajar figures, Hazlitt said these platforms would not include DAB radio. "DAB with its current cost structure and slow consumer response is not an economically viable platform for the group," Hazlitt said this morning, unveiling a £9m package of cost-cutting measures.

"In the short term, without massive investment and improbable changes in government policy, it is not a platform in which we can grow."

And this:

...although DAB radio accounts for nearly 10% of all listening, Hazlitt pointed out that only 4% of total listening was to digital-only stations not already available on analogue. She said the greatest growth opportunities for the company's radio stations were on FM and broadband. She also announced a new tie-up with Apple enabling people to listen to digital radio on their iPhone. Now this is part of a larger belt-tightening strategy, and some analysts evidently view this as strictly that. Further, there is a broader context, as GCap is trying to fight off a takeover bid from a competing broadcaster. I'm not up to speed on all the details so you should take the above statements with a grain of salt. They may be "under duress."

Still, the symbolism here may send a chill through digital radio in the UK, and quite probably across the pond in the US, too.

And it's interesting that this is precisely what I've been arguing for the past three to four years.

> it be gone?

I think broadcasting of all types will continue in it's various forms. You will still hear AM, FM, SSB, and new forms like Digital. What will change is the recieiving equipment to include the new forms of transmission.

In the old days, challenges were to capture 'distant' transmissions originating from the country concerned. FM / SSB were not common. Today, we can hear INternational broadcast stations transmitting from non-national transmitting facilities. However, the challenge to hear these stations will still continue.

The change to digital transmissions will cause certainly some problems as once that happens a good amount of equipment will not be able to deal with the transmission. However like all changes, the community will find a way, they always have by way of converters etc, and of course new equipments.

The thing is, that change does occur, and we adapt to those changes.

3702. EDUARDO - The Washington Post misses the point about HD Radio

Newsgroup: rec.radio.shortwave
Date: 2008-02-11 22:56:14 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <faa45d29-1bec-41a0-9967-a4bf0ecc2b09@v46g2000hsv.googlegroups.com>
Source record: 136620

"The Washington Post misses the point about HD Radio"

From the Post:

But far from pushing their HD offerings, most stations seem only halfheartedly invested in the technology. Most Washington stations barely mention their HD channels on their Web sites, let alone on their airwaves.
HD remains a promising technology, but so far, many more people listen to the new programming via online streaming than on an HD radio. Listeners are voting with their ears, and they're choosing Web-based and mobile audio, in part because most HD radio programming just isn't compelling enough to lure people to a different gadget.

Even if we put aside the head-rattling conclusion that radio stations are "halfhearted" in their commitment after countless hundreds of millions of dollars in on-air promotion, this is still wrong, and it reflects a fundamental misunderstanding of consumer behavior and economics.

First, there is nothing radio stations can do to fundamentally drive listeners to purchase new radios (if, in fact, a purchase is required) because listeners do not have a "radio problem." These alternatives - online or mobile - are in our lives not because they offer us radio but because they offer us benefits that are specific to these technologies and address unique and particular needs. The fact that they might also offer radio (of one type or another) is strictly icing on the cake.

Second, If you have nearly 100% distribution, as conventional radio does, and you have fresh, compelling content, where is the best place for you to put it?

On the distribution channel that is used by everyone?

Or on the distribution channel that is used by no one?

If you have something good, why place it in an HD ghetto when it can achieve instant critical mass - and be monetized accordingly - in the bright light of day on a full and ubiquitous FM signal?

Web-based and mobile audio are being preferred because they don't depend on the creation of new audio programming to drive their demand. They are already on our desks and in our palms for reasons which have nothing to do with radio (indeed, this is exactly why they are so important to our future).

I am sick of radio stations being blamed for the difficulties of HD. Folks who complain listeners would come to HD radio if there was something good on it are generally the same folks who have no idea what that "something good" might be.

Besides, when the major groups are firing approximately one program director a day, it tells you all you need to know about the priority placed on fresh and original content.

No, the Samsung chip was not even announced until late last year. They
promised design specs and sample quantities in Q1 and so far are on track.

Once a chip ships, it takes 6 to 18 weeks to get product into the channels.

Not to be nit picking, but shouldn't this great advice be at the BEGINNING of your responses? We all need to know whether the postings have been approved BEFORE we read them.

Thank you for your time,

mike

I say again the cold war is starting again.
Keep monitoring Russian Radios!

Russian Fighters Buzz US Carrier

WASHINGTON (AP) -- U.S. fighter planes intercepted two Russian bombers flying unusually close to an American aircraft carrier in the western Pacific during the weekend.

A U.S. military official says that one Russian Tupolev 95 buzzed the aircraft carrier USS Nimitz twice, at a low altitude of about 2,000 feet, while another bomber circled about 50 nautical miles out. The official was speaking on condition of anonymity because the reports on the flights were classified as secret.

The Saturday incident, which never escalated beyond the flyover, comes amid heightened tensions between the United States and Russia over U.S. plans for a missile defense system based in Poland and the Czech Republic.

I've used everything from balcony railings, to triple track window frames, to the siding on the house as antenna. All with varying degrees of success. But some interesting experimentations comes out of it.

You may find the balcony railing works for you. Try it. The only caveat is to watch for signs of overloading.

More extreme versions of this thinking have taken a member of this group out to long stretches of Colorado and Wyoming expressways to hook his SW-2 up to extended lenghts of guard rail. With some impressive results.

I tried the same thing on a straight 20 mile stretch of 55 outside of St Louis. Quite the listening, that day.

Remember when Star Trek's Uhuru says something like "it's an old style
radio wave, amplitude modulated"?

HF shortwave will always be useful for specialized applications, but
is unlikely to serve general broadcasting in the long term.

Michael

==========

I ain't white, but unlike you, I dislike no one...

I just asked you to have the cunt send me a letter, boy.

Hit the road, drug addled fool.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Hey, have the bitch send me a letter

Have the bitch send me a f00kin letter!

I'll be waiting for that letter from your *daughter*, asshole!

Hey, little pussy boy, we spell it "cunt" out here, just like I think I
spelled it originally, boy.

If I don't get that letter, boy, then you and your *daughter* must
both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms
letterhead within the next two weeks!

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to
understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who
obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I am witty, and I am wise!

Yes, I learn more and more with each passing day!

Lying 'tard boy, much like the other debutante, malcontent, faux boys
who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your
dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her
Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and
The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock
Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be
'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake
Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind River Massacre.

I collect stamps!

Then again, NAB could mean "National Association of Bullshitters" in which case
it might be appropriate that you address them.

How dare they! Cry us a river! The difference between the cold war era and now is the fact that back then the USA had majority support of world opinion because the USSR was perceived as a bully and being the greatest threat to world peace.
Today world opinion and the respective roles of each nation have reversed. The USA is now viewed as the world's bully and as the greatest threat to world peace. America's irresponsible and criminal behavior has resulted in it being justifiably reviled worldwide. Russia and other nations are no longer going to stand idly by and let the American's arrogance go unchecked.
Perhaps the Russian fighter pilots were merely in search of some levity and wanted to get a close look at the keystone cops in action. Seems when the American "heroes" aren't indiscriminately killing innocent women and children with their bombs they are crashing into each other in their F-18's (don't sweat it Mr./Mrs. Taxpayer, they only cost you $80 million each). Makes one wonder how the U.S. Navy "heroes" can find the time to kill thousands of endangered whales and dolphins with their sonar.

Gosh so much killing to do, environmental damage wreak, ill-will to spread and corporate welfare to enable and so little time to do it in! But what's an American "hero" for!!!

Navy Fighter Jets Crash in Persian Gulf
Monday January 7, 2008 7:16 PM

By LOLITA C. BALDOR

WASHINGTON (AP) - Two U.S. Navy fighter jets plunged into the Persian Gulf Monday, after what initial reports suggest was a mid-air collision, a defense official said.

All three pilots ejected safely from the planes and were headed back to the USS Harry Truman, the aircraft carrier they were operating from, according to the official, who requested anonymity because the information was preliminary and not yet released publicly. No other details or the crash were released.

One of the F-18 jets that crashed held two pilots, the other held just one.

NAVY SONAR KILLING WHALES

Recent news reports have documented unusual localized whale beachings around the world along with speculation as to the cause. Some suspect parasites or poisoning. Others have highlighted the chronological and geographic coincidence with Navy tests and they've used examinations of the dead whales showing ear damage and hemorrhaging as evidence that a new high powered Navy sonar called LFAS is killing cetaceans (marine mammals). Story continued at: http://www.holology.com/whale.html

Hmmmm... does CanaDuh even have an aircraft carrier? Can they even afford one?
If they did have one, could they even come up with enough *men* to man one?

I know they've tried the rusty submarine schtick before.

Yes unlike the corporate war machine in the USA Canada has highly competent, professional and honorable military. Sadly, Canada knows has also been victims of American military incompetence all too often. A few recent incidents come to mind:

KANDAHAR, Afghanistan (CNN) -- A U.S. fighter pilot involved in a "friendly fire" incident that killed four Canadian soldiers in Afghanistan dropped a laser-guided bomb after his commanders denied permission to do so, U.S. officials said Thursday.

Another eight Canadians were wounded in the incident early Thursday near Kandahar when the U.S. jet dropped a 500-pound bomb on them during a training mission, U.S. and Canadian military officials said.

U.S. officials said the F-16 pilot made an initial report to his commanders that he and another F-16 had taken enemy ground fire, and he was given permission to mark the target and return for a second look.

During the subsequent fly-over, the pilot requested permission to drop his weapon. A Pentagon official said his superiors denied permission unless the pilot felt he would be acting in self-defense. At that point, the pilot again reported ground fire, invoked his right of self-defense and dropped the laser-guided bomb, military officials said.

Canadian fatalities
Four members of the Canadian armed forces were killed in a "friendly fire" incident nine miles south of Kandahar.

Sgt. Marc D. Leger, 29, of Lancaster, Ontario

Cpl. Ainsworth Dyer, 25, of Montreal, Quebec

Pvt. Richard A. Green, 22, of Edmonton, Alberta

Pvt. Nathan Smith, 27, of Tatamagouche, Nova Scotia

In a statement Thursday, U.S. Defense Secretary Donald Rumsfeld said he had discussed the incident with Canadian Defense Minister Art Eggleton and "assured him that Gen. Tommy Franks and his Central Command staff will work closely with the Canadian representatives in Tampa to investigate the causes of this tragic accident."

At a news conference in Ottawa, Canadian chief of staff Gen. Ray Henault said details of the incident remained to be determined. "But certainly, my understanding is that there was no hostile activity in the area that would have created this incident," he said.

Canadian Prime Minister Jean Chretien offered a statement of regret to the House of Commons on Thursday.

"If words cannot console this loss, they also cannot fully express the pride that all Canadians have felt on the exemplary way (Canadian forces) have carried out their duty," Chretien said. "There are so many questions. ... How has this happened? I want to assure the families and the people of Canada that these questions will be answered."

The Canadian soldiers were part of the 3rd Battalion, Princess Patricia's Canadian Light Infantry Battle Group. They have been in Afghanistan since late January as part of Operation Apollo, Canada's military commitment to the campaign against terrorism, according to the Canadian Defense Ministry.

In a written statement, President Bush said he had expressed his "deepest sorrow and sympathy" to Chretien.

"Canada's fallen heroes and their families are in our hearts and prayers," the statement said. "Canada is a vital member of the coalition against terrorism and hatred. It is shouldering a great burden and making tremendous sacrifices to make the world a safer place for all people."
Canadians were conducting training exercise

The bombing happened at about 1:55 a.m. in Afghanistan. The Canadian soldiers were conducting a live-fire training exercise in an area about nine miles (14 kilometers) south of the Kandahar airfield, Canadian officials said.

The soldiers were firing at inert targets in a "recognized training area," according to Maj. Jamie Robertson, a spokesman for the Canadian Joint Task Force. Henault said the American fighter pilot could not visually identify the troops because the exercise took place in the middle of the night.

"Without a doubt, there was a misidentification of the Canadians and what they were doing on the ground and that was obviously the cause of this accident," Henault said.

Six Canadian soldiers wounded in the incident are being treated at the U.S. medical facility at Ramstein Air Base in Germany, Canadian officials said. Two others who suffered minor injuries remained in Kandahar.

"The immediate response of this battle group has been outstanding, and their professionalism has been unparalleled," Henault said. "Every soldier in the theater of operations is a credit to the Canadian

forces and certainly a symbol of strength in this country."

U.S. forces in the region echoed these sentiments.

"This loss is shared by our entire task force. Our hearts ache with yours as we continue to stand shoulder-to-shoulder against terrorism," said Col. Frank Wiercinski, a U.S. Army spokesman in Afghanistan. "The cost of this fight has been great, but our commitment remains greater."
Third U.S. 'friendly fire' incident in Afghanistan

The incident marks the third time that U.S. forces have been involved in friendly fire accidents during the conflict in Afghanistan.

Friendly fire incidents late last year left three Americans and five Afghan fighters dead and more than 40 people injured -- including slight injuries to Hamid Karzai, who now heads Afghanistan's interim government.

All eight deaths came in a December 5 incident north of Kandahar. In that incident, and another nine days earlier near Mazar-e Sharif, a B-52 bomber dropped a 2,000-pound (980-kilogram) guided bomb on positions manned by ground troops who were directing air strikes against nearby Taliban targets.

In both those accidents, preliminary findings indicate that confused communications between the ground and air crews resulted in the bombs being programmed to hit friendly ground troops.
++++++++++++++++++++++++++++++++++++

Another:

Friendly fire that killed Canadian major
CBC News

Two U.S. aircraft mistakenly fired on a Canadian platoon taking part in NATO's massive anti-Taliban operation in southern Afghanistan on Monday, killing one soldier and injuring dozens of others. Story continued at http://www.cbc.ca/story/world/national/2006/09/04/afghanfriendly.html

There are many others American "hero" debacles but these will suffice to make the point.

Let me be the first to thank you for protecting us from the Filipino's invasion at the start of the 1900s. Without the US killing of 500,000 unarmed men, women and children, Canada would not be in existence today.

We often forget that we have SO much to thank you for. We ALL appreciate what you've done for Canada in the course of all these interventions..I never even realized they were all out to get us. Talk about leading a sheltered life.

http://www.zmag.org/crisescurevts/interventions.htm

Thank you and may you forever remain the salvation of Canada and Western Civilization.

++++++++++++++++++++++++++++++++++++++
Eastern Civilization is grateful as well. Especially Iraq considering:

IRAQ DEATHS DUE TO US INVASION
The number is shocking and sobering.
It is at least 10 times greater than most estimates cited in the US
media, yet it is based on a scientific study of violent Iraqi deaths
caused by the U.S.-led invasion of March 2003.

That study, published in prestigious medical journal The Lancet,
estimated that over 600,000 Iraqis had been killed as a result of the
invasion as of July 2006. Iraqis have continued to be killed since
then. The graphic above provides a rough daily update of this number
based on a rate of increase derived from the Iraq Body Count. (See the
complete explanation.)

The estimate that over a million Iraqis have died received independent
confirmation from a prestigious British polling agency in September
2007. Opinion Research Business estimated that 1.2 million Iraqis have
been killed violently since the US invasion.

This devastating human toll demands greater recognition. It eclipses
the Rwandan genocide and our leaders are directly responsible. Little
wonder they do not publicly cite it.

It was announced to radio, to the CES members who manufacture radios. Just
wait a few months for the radios with those chips to be announced, probably
around June or so.

Apartment Living & Condo Owners,
[NEWBIE Shortwave Radio Listener (SWL)]

ADD - Metal Roof Gutters and Down-Spouts to the list of
Metal 'thingees' that are OutSide of a Building that can
be tried and if they work in your location : Used as an

Shortwave Radio Listening (SWL) Antenna. ~ RHF

DOWN-SPOUT [Hidden] Insulated Wire Vertical SWL Antenna
First depending where you are Vertically in the Building :
Near the Top -or- Near the Bottom.
You can use the Down-Spouts as Visual Barriers {Shields}
to Hide an Insulated Wire used as an SWL Antenna :
* Drop the Wire from the Roof down to your Balcony.
* Drop the Wire from your Balcony down to Ground Level.
Run the Wire along-side the Down-Spout.
RadioShack - 55-Feet Hookup Wire (18 AWG)
http://www.radioshack.com/product/index.jsp?productId=2049741

-IF # 1- You run the Wire down to Ground Level -sometimes-
You can use a 100 µH RF Choke between the Bottom End
http://www.radioshack.com/product/index.jsp?productId=2103978
of the Wire and Ground to reduce Noise and Improve SW
Signals. {Cost you $2 to try it and see if it works : Might
be Great -or- Oh Well what's next}

-IF # 2- the Balcony is Grounded and you have the Vertical
Insulated Wire Antenna running along-side the Down-Spout :
You can use a 9:1 Matching Transformer :
The 9-Side between the Vertical Insulated Wire Antenna
and the Grounded Balcony.
The 1-Side connected to a Coax Cable.
RadioShack - 25-Feet QuadShield Coax Cable (Black)
http://www.radioshack.com/product/index.jsp?productId=2103071
The Low Cost Altenative would be to simple use RG-6
Quad-Shield Coax Cable with a 300 Ohm to 75 Ohm
TV type Matching Transformer*
RadioShack - Indoor/Outdoor TV Matching Transformer
http://www.radioshack.com/product/index.jsp?productId=2103912
One Lead to the Vertical Insulated Wire Antenna
and the Other Lead to the Grounded Balcony.
* These are usually good down to 5 MHz for Shortwave
Radio Listening (SWL) use and actually have a built-in
advantage of Attenuating AM/MW Radio Signals.

hope this helps - iane ~ RHF

No but I have 6 model E's in service, and have replaced 2,
over a decade. (So that's 60 combined years, 2 failures, =
one failure every 30 years, which I guess is not bad.

One interesting flaw : ice forming and thawing eventually
lifts the antenna rod off the pinch-fit stub it's slipped
over, after several years. Application of heat to the rod
and ice to the stub can get it back on fairly easily.)

The E is more sensitive than a Wellbrook ALA1530 by a good deal,
though I suppose more susceptible to any local noise sources
as well.

Both those statements are true.

However, the "rest of the story" is that many people perceive Hillary as a cold, calculating, manipulative, scheming shrew of a "Dragon Lady", to say nothing of my view of her being a carpetbagger when she 'moved' to New York (like she ever lived there before or had family there). A CLASSIC case of carpetbagging.

Thanks! It should be pretty good. I am going to try 5/8 inch diameter rod material for a start, and see how that works out. There are 3-gang caps available, with 400pF per section, so that should give a pretty good tuning range if I use RF relays for switching. The other approach is to use varactor diode tuning, but since these devices don't have as high a Q as air spaced tuning capacitors so regeneration might be needed to regain the RF selectivity that is lost. I have used the NTE-618 varactor in this configuration, and it was actually pretty good. I need to pick up some nylon male/female threaded spacers to isolate the tuning cap from the front panel of the enclosure, since both the rotot and stator are connected to each input of the differential amplifier. If the tuning cap isn't insulated, your hand will act as an antenna when you try to tune the unit. An insulated shaft extension is also required.

Pete

Well said, Burr. I've objected for a long time now about the USA self appointing themselves as policemen of the entire freeking world, pissing off their former allies, etc, etc...yada yada yada. Putin, I have to presume, has obviously had enough of the arrogance and actions of the American leadership. Thank you very much Dubya and many others before him. One can only face the facts regarding involvement in the Middle East...the crux of it is OIL. I'm always amused when we hear our so-called reps refer to "American interests"....we know what the heck that means. Pretty damn sad what this country has done to themselves. (My opinion only) There's some great posts here on this subject. Thanks everyone.

Very nice catch Ace...I'll never forget when I finally logged them for
the first time many years ago. I almost fainted when their QSL arrived
in the mail. At that time they were pretty much a "black"
station...rarely any veries coming from them. I guess perhaps I just
got lucky. Oh, BTW, I heard them on damn near the same frequency you
just reported. Good DX to ya!

Parts of Africa already 'has' Broadband.

Take many Countries in Africa :

Geographically may be about 15% of the Country will have
many of the Services you might expext in a First World
Country. Which leaves 85% of the Country without :
Many of them; Most of them; All of them.

But that 15 % ain't Bad when 50 % of your Population lives
in those Areas Served. Oops - that leaves 50 % of the
Population without them.

OBTW - This is not a Country in Africa but Tuolumne County

U.S.Navy has came a long way, babee.I once saw a tv program about the first U.S.Navy Aircraft Carriers.They were Ships that had been converted so as to have flat tops on them.The Airplanes had ropes attatched to the wings.When the Aircraft came in for a landing, some of the people had to run and grab those ropes to keep the Aircraft from rolling off into the water.

After analog TV is shut down (in one year and seven days...) digital TV will operate in channels 2-51. Channels 52-69 are being - in some cases have already been - sold for other services. For example, channel 55 has already been sold to Qualcomm for their "MediaFLO" service. (being sold to consumers as Verizon's "V-Cast") Channels 2-13 are remaining in TV service, and nearly 500 stations plan to use VHF channels for their permanent DTV operations.

I do think the 54-88MHz "low-band" could be potentially *shared* between radio and digital TV broadcasting. Only 38 stations plan to use these channels for their permanent DTV operations, and Butte, Montana is the only city where more than one channel in this range will be used. 54-88MHz could be authorized for radio on a secondary basis to existing digital TV stations and a co-primary basis to new DTV service.

But I don't think the NAB would ever allow any scheme that would create new stations. They fought LPFM tooth-and-nail - but not satellite-fed FM translators which are actually *more* likely to cause interference than LPFM. (but don't create new stations as they simply relay something that already exists) Anything that would use 54-88MHz spectrum to create new radio stations would be shot down by lobbyists.

"When?"

A lot of Africa already has broadband. Where the standard of living is relatively high, Africa has similar broadband adoption as, say, parts of the US. Only recently has broadband adoption in the /US/ been anywhere near the world average.

It helps to remember that much of Africa is very close to Europe, and the rest is relatively close to China. Both have been trading with African nations for a long time.

- Why wouls a straight stretch of highway need a guard rail?
- Aren't they for keeping you from going over the edge on turns?
- Sounds like some kind of kickback.

Those Brits don't like America and Americans.Did you ever watch that BBC America Top Gear program.Top Gear: Interstate road trip filled with challenges.

Bagdad, Alabama? No such place,,, that little town, Bagdad where Top Gear filmed that episode, is a suburb town of Pensacola,Florida.I have been through there several times before when I used to get on Hghway 90 after passing through Mobile and across Mobie Bay on my way to Florida.I hate to get on the crazy Interstates.There is also a Bagdad,California (or is it Bagdad,Arizona?) and a Bagdad,Oregon too,I think.

The cold war never stopped, it just disappeared form the front pages.
There have been several U.S. presidents since the supposed raising of
the iron curtain, each with his own special spin on how wonderful the
Soviets were. Reagan said he and Gorbachev oversaw the winding down
of the evil empire. George Bush had us believe his close buddy
Vladimir "Pootie" Putin was just a good old boy who was open to
democractic reform.

3812. Hearing-Finding the BBC World Service in the USA and Canada

For One and All,

When you don't have a Shortwave Radio to Listen to . . .
There Will Be Days Like That ! :-{

The BBC World Service can be Heard in the USA
in most major Cities usually on the FM Radio Band.
http://www.bbc.co.uk/worldservice/
http://en.wikipedia.org/wiki/BBC_World_Service

BBC World Service - Schedules and Frequencies
http://www.bbc.co.uk/cgi-bin/worldservice/psims/ScheduleSDT.cgi
* BBC World Service : Locations + Times + Frequencies
BBC-WS - http://www.bclnews.it/b07schedules/bbc.htm
-source- BCL News Italy - http://www.bclnews.it/

BBC World Service - America [USA]
Select-a-State - http://tinyurl.com/7u4mq

New York State
Select-a-City - http://tinyurl.com/2663td

New York City
Select-a-Radio-Station - http://tinyurl.com/2yuny2

BBC World Service - Canada
Select-a-Provence-City - http://tinyurl.com/23g73s

PLUS - The BBC World Service can be Heard on :
* XM Satellite Radio Channel # 131
http://www.xmradio.com/onxm/channelpage.xmc?ch=131
* SIRIUS Satellite Radio Channel # 141
http://www.sirius.com/bbcworldservice
Across American and in Canada too.

You're doing better, you got the spelling right.

It's going to get down to who do you think is going to be better for the
country.
I have children, grand children and one great grand child that are going to
have to live here for many years to come so I "will" vote who I think is
best.
And I was born and raised in the south.

BUT, we got to do something, it can't keep going like this.

Just about every post I've ever seen where US politics/policy come up
your contribution reads in the negative to me. Okay, perhaps you are
not the most anti-American for there is always David with whom you may
share that honor. You obviously see things differently than I, that's
your prerogative. What would work toward changing my sentiment is
instead of posting every faux-pas made by America you actually threw
in some of the good stuff perhaps my judgement call would have been
different.

>Look at Cuhulin. He is a disgusting bestialist pervert who happens to be an

You and DXAce just cannot resist taking a shot at each other. I have
sometimes speculated that you two are actually on decent terms and
just create this online rabid animosity as a form of entertainment on
the newsgroup and perhaps you guys laugh at all the side comments.
When that thought enters my mind I realize it's probably time for the
"AFDB - Aluminum Foil Deflector Beanie"!

Well just maybe the Poles and Czech's feel safer with a higher level
of defense/deterrence? Besides, when we removed them from the
US/Canadian border you didn't expect us to just throw them away did
you. Shees, please put a little more thought into these things before
you jump to conclusions.

That is not counting the 500,000 to 1 million that died from January 1991 up until the beginning of 2003. After all, when you put sanctions on a country like Iraq, who ends up suffering. Sure wasn't Saddam now was it. But it was the hundreds of thousands of civilians that died.

I'm sure that all of the good Christians and so-called purveyors of freedom and liberty for those oppressed Iraqis think thats perfectly ok. Not only that but to steal the oil underneath the ground. Some fine Christian leaders you have, dont ya.

Excellent point Billy. It also brings to mind the cruel embargo
inflicted upon Cuba by the US government which has killed over 250,000
Cuban children whom the USA kept from receiving vaccines and critical
medicine. A horrific act of cruelty and morally indefensible.

Almost every country in the United Nations General Assembly urged the
U.S. Tuesday to end its four-decade-old embargo against Cuba.
The vote, held for the 14th year in a row, was approved by 182 to 4,
with one abstention.The resolution demanded that the U.S. lift its
trade, financial and travel embargo and stop penalizing foreign firms
that deal with the island nation. Story continued at
http://www.cbc.ca/world/story/2005/11/08/cuba-051108.html

What's the cause of your 'beaking off' all the time? Is it simply because you're a dumbass Canuck? A combination of dumbass Canuck and a box of Labatt's? Or, is there another reason?

Aren't you Canucks the smartest folks on the planet? You mean to tell me that you couldn't figure out a way to get some vaccines and critical medicine to Cuba? Heck, I know you folks buy sugar and cigars from Cuba, so why not just bring that critically needed stuff on down when you pick up the other goods?

For CanaDuh not to have taken the lead in doing this is simply a horrific act of cruelty and morally indefensible.

Shame on CanaDuh for killing over 250,000 Cuban children. Shame, shame, shame.

Aren't you Canucks the smartest folks on the planet? You mean to tell me that you couldn't defy the US sanctions? Heck, you dumbass Canucks could have undertaken a massive airlift to aid the Iraqis.

For CanaDuh not to have taken the lead in doing this is simply a horrific act of cruelty and morally indefensible.

Shame on CanaDuh for killing the hundreds of thousands of Iraqi civilians. Shame, shame, shame.

I'm certain that somewhere in the world, just moments ago, somebody died because they either didn't have any food, or they were lacking vaccines or other medicines. It might have been a child.

Why hasn't CanaDuh alleviated these problems? After all, they are the smartest people on the planet.

Think about it. People are dying all over. What has CanaDuh done? Practically nothing.

For CanaDuh not to have taken the lead in ending, even stopping, the massive suffering around the world is simply a horrific act of cruelty and morally indefensible.

Shame on CanaDuh for killing thousands of people every day. Shame, shame, shame.

(Special to Arbitron: the kids hate the radio)

As Arbitron looks to redeploy some incentive dollars to problematic younger demos, it plans to test lowering premiums for 55+ households later this year. The change is expected to cut into the response rate, but it's a trade-off. The cash will be reallocated, which Arbitron hopes will improve proportionality for all other demos. It's one of a series of steps Arbitron will try this year to bring more young people into the diary sample. More in today's

Inside Radio.

Cheap radios with SSB, but no AGC on/off, big tuning steps, and no RF gain control are a bad joke. They will pick up a little SSB, but not to any great advantage over the AM, beyond rudimentarily being able to pick out a few words. They are useless for music, for example.

I assure you I come from the perspective of tough love for the USA. I love the dirt and some of the history. The current USA is a shadow government. If the people wake up there will be a shortage of tar and feathers.

War for profit is no way to keep an economy afloat. We will all burn in a collective Hell for apathetic sheep.

Whilst I cannot share your overt hatred of Canadians, I must rush to
applaud the mighty United States of America for the fabulous and huge
amount of aid they pour into an often ungrateful Africa.

U.S. government aid alone is immense, plus huge contributions from
people like Bill Gates, Oprah Winfrey and many American family trusts
like the Mellon foundation etc.

American taxpayers are feeding millions of starving Africans and I
don't think America gets the recognition it deserves for these mighty
charitable efforts. Thank you and God bless America.

As a native of Africa I am totally unaware of any aid given by Canada,
but must say that the European Union nations also make a considerable
contribution to aid efforts, although it comes nowhere near matching
the American grants.

Has anyone else been hearing this Morse code on 333 kHz lately? It's
been on the last four days now. I'm new to CW and SWL, but when I
tune in this frequency, I think what I'm hearing is this:

.- ..- ... .

What does that mean? It's just repeated, over and over, all day
long. Any ideas?

For every dollar in aid that the developed world provides to the developing world, they easily get $10 back in trade and preferential markets back from those same nations.

Some kind of help is the kind of help that helping is all about. Other kinds of help is the kind of help we can all do without.

Except, of course, people who want cheap throw-away crap and don't want to pay a skilled Canadian or an American to make it.

There are Morse translators on the web. If you heard right, this looks
like A U S H to me.

It's an air navigation beacon. (though I'm perplexed by the presence of
four characters "AUSH" - all beacons I'm aware of have 3 letters. I
wonder if you were tuned to the "wrong" side and hearing "inverted" Morse
- where the spaces were marks & vice-versa?)

Your NNTP posting host is from Oregon, assuming that you are listening
in Oregon,

Please see:
http://worldaerodata.com/nav/US/OREGON.php

and check the NDB (non-directional beacon) entries. You may have
mis-parsed the CW, I think that it may be 'LBH', eg:
.-.. -... ....

LBH is listed as a beacon.

You don't need missiles at the 49th parallel. Our politicians, for a few old crumpled up dollar bills, will let you in immediately. Then they'll subsidize you for taking our resources away. It's a good deal. For every single dollar you give our politicos, you get back 40 million.

The vast majority of Poles and Czechs don't want anything to do with the 'system'. It appears the local politicians aren't listening to what the people want. Familiar?

There a tons of these sites out there:

That sounds like a beacon used in avaition. However they are three letters,
not four. There is a list of them at: http://www.dxinfocentre.com/ndb.htm

What you wrote is AUSH, which is not on the list, but there a YSH on
334 kHz in Smith Falls, Ontario.

There is as far as I can find no airport code AUSH.

Geoff.

www.devilfinder.com America's Economic Contributins to Africa

A lot of the food and other things America ships to Africa gets siphoned
off by some the the crooked leaders/rulers over there.

Zimbabwe is manufacturing high quality dog food from grain, meanwhile
the poor people are starving, those people sure do need that grain,
instead of the dogs.

In Canada, we put the set on the floor, in front of the chair. You then put your your feet on top of it and drape the whole works with the dead-seal-skin-lined dressing gown.

Typical Canadian getting ready for a little shortwave listening. Note the SUMMER wear.

http://tinyurl.com/3clrm6

Winter listening *demands* dead-seal-skin-lined dressing gowns, as the heat from the radio tubes must be captured. It warms the cockles of the heart (and other things).

Seriously, I am doing essentially that in my home in Duluth; I am lucky at present
to have an interior temperature above 46 degrees F in areas where I am working,
elsewhere in the house it is barely above 32 degrees F.

Seems like a lot of money for the antenna. I have both the PA0RDT and the Amrad that I homebrewed for a bunch less money than that. The PA0RDT suffers from some big station IM products here in Rochester, but the Amrad does a nice job. Neither of them will do as well as my 4 foot loop for MW.

Hey Ron, You must like them a lot. How do they perform, and why are you running six of them?

regards,
Bob

I have an 8-element phased array spread out over an acre. 6 DA100E's
and 2 Wellbrook ALA1530's.

Seven ANC-4's combine them.

When you get down to it Mike, the way this country is being run by the bush crime family, it's like living in Berlin-1938. or, maybe Moscow-1954. with the loss of all our freedoms, and the reins of of the Fed handed over to all these big corps; it's just no fun here anymore. and just Tuesday, our so-called elected officials, gave the big tel-cos a free ticket to spy on all of us for the bushie boys. all we can hope for is people open their eyes and see whats really going on in this country. all the lies, and such. i remember people bragging about voting for bush. and, looking at who is running, God help us all. and, a lot the people still believe rush, the dope head, and o'riley (sp) the pervert. so, where do we go from here?

Drifter...

We have had this discussion before, shortwave is alive and well, and
will continue for many decades to come. As for broadband and digital,
converters will be available. But analog is still very popular, and I
always find lots to listen to on HF.

"The kids" DON'T "hate the radio." Ever since the diary radio survey was
first implemented, in 1965, younger demographics have been hard to capture,
especially 18-34 males. And, when incentives that varied with or by age and
ethnicity were developed, the highest incentives went to that group.

In any case, the issue is not "kids" (12-17) but 18 to 34 year old males.

The incentives are just a dollar to a few dollars "guilt money" in any case.

Cuba long got its medicines in abundance from Russia and its own highly
developed pharmaceutical industry. Much of Cuba's propaganda from the 70's
onwards was based on sending doctors and medicines to places like Anglola,
tthe Congo, El Salvador, Nicaragua, etc.

What you do not address are the hundreds of thousands jailed or killed for
their opinions.

No, its not. It's on a rural route that loops out of Chino Valley, north of Prescott which turns back on itself and ends south of Prescott, Yavapai SR 97. You can take it to the 96, and then to US 93 which goes to Vegas. Bagdad is a good 30 twisting miles from the route that goes to Vegas, in fact.

Yeah, they do a lot of business with CanaDuh. In fact, in 2005, CanaDuh was Cuba's 2nd largest trade partner.

How fitting considering that CanaDuh is responsible for the deaths of hundreds of thousands of people around the globe.

What is strange is that CanaDuh did not see fit to supply Cuba with badly needed vacinnes and medications which has resulted in the death of at least 250,000 Cuban children, preferring to place the blame upon the USA.

The west is still giving 'communist' China foreign aid. It's a disguised form of payola.

Canada has given them over a billion dollars in a ten year span.
http://www.cbc.ca/canada/story/2005/07/23/china-aid050723.html

What does the States give them? Trillions?

It's corruption at it's highest levels.

Cross-posted to: rec.radio.swap,rec.radio.shortwave

I have a Drake SW-2 shortwave receiver for sale.
This well cared for receiver is a terrific performer,
and is truly in excellent condition throughout.

Features include:

* Continuous frequency coverage from 100 Khz to 30 Mhz
* Modes: AM, CW, USB, LSB
* Tuning Steps 50 Hz or 5 Khz
* Stores up to 100 Independent, programmable memories
* Built-in Selectable Sideband Synchronous Detector (Sync Detector)
effectively reduces or eliminates distortion due to fading signals
* Front-panel mounted internal speaker
* 1/8" headphone jack, 1/4" external speaker jack
* Front-panel mounted RF gain control
* Dual antenna input terminals (50 ohm feedline or wire antenna
* Front-panel LED frequency display
* LED Bar graph signal strength display
* Includes Drake A/C Adaptor
* Can also be run off of a 12 Volt DC power source
* Size: 10 7/8" Wide X 4 3/8" H X 7 5/8" D
* Weight: 5.8 lbs including A/C adaptor

* Includes original Drake SW-2 Owners Manual

Price is $ 250.00 including insured shipping (Cont'l U.S. only).
Payment by USPS Postal Money Order only, please.

Tnx & 73,

-Bill

Yeah, it's almost as good as discovering that CanaDuh, through its inaction, is responsible for the deaths of hundreds of thousands of people around the globe.

Only because your countrymen were there spending money, getting drunk, and ignoring the fact that they are responsible for the death of hundreds of thousands around the globe.

> Now you
> know where the money goes, you drunk.

Well, it certainly didn't go to Cuba, resulting in the death of over 250,000 children (source: one of your own countrymen)

If by inaction, you mean not condoning the assassination of GW Bush, you are quite right. A civilized country does not commit or condone murder. Bush is the worst President you've ever had and an International war criminal.
Millions have now died because of his territorial ambitions.

Bring back Nuremburg.

mike

3933. What antenna for Grundig G5 ???

No, hundreds of thousands, perhaps millions, have died because of the inaction of CanaDuh.

> Bring back Nuremburg.

Last I checked, Nuremburg was still there. However, those 250,000+ Cuban children are gone due to CanaDuh refusing to supply them with badly needed vaccines and medications.

Shame on CanaDuh.

A little time on the 'net would indicate that Stephen Lewis (a former politician in Canada, working for the UN) has been one of the most forceful advocates of AIDS treatment in Africa.

<plimmer@telkomsa.net> wrote in message news:76e35558-2d9c-43be-9af6-9355f3322f9d@s19g2000prg.googlegroups.com...
Whilst I cannot share your overt hatred of Canadians, I must rush to applaud the mighty United States of America for the fabulous and huge amount of aid they pour into an often ungrateful Africa.

U.S. government aid alone is immense, plus huge contributions from people like Bill Gates, Oprah Winfrey and many American family trusts like the Mellon foundation etc.

American taxpayers are feeding millions of starving Africans and I don't think America gets the recognition it deserves for these mighty charitable efforts. Thank you and God bless America.

As a native of Africa I am totally unaware of any aid given by Canada, but must say that the European Union nations also make a considerable contribution to aid efforts, although it comes nowhere near matching the American grants.

It was only a matter time before someone of your obviously superior intellect discovered the truth. Canada made a pact with Satan way back in the Garden of Eden. We do ALL his dirty work on earth.

I must admit it hasn't all been successful. You were the result of major bio-engineering blunders made in the secret labs buried in the rock below Moose Jaw, Saskatchewan. You aren't something we're particularly proud of...I mean, if you're going to do *EVIL*, for Chr*... oh, damn..I nearly said it..for Bush's sake, do it *RIGHT*.

Sorry, I've got to run..the zionists need inspiration and Condi needs a back rub.

Note also, Lewis is credited with the forceful advocacy. But we do
the work. We pay the freight. And we're demonized for it.

But Lewis is given the kudos.

Like the Marines fighting back insurgents, taking the hits. Being
called everything from traitors to murderers. While John McCain takes
the credit.

You're right of course. I'll send a letter to the Canadian Government immediately.
These people need help. The charts are depressing:

Just like a skipping record.

The geneticists at least got rid of the stuttering. The saliva you sprayed out was disgusting. You should know they were fired when it was discovered they were about to give you the power to reproduce. Talk about good timing.

I don't know how much you want to spend or in what environment you
will be using it but an "Evesdropper" 5 band trap dipole is a great
way to go for swl. Get it up as high and clear outdoors as you can
but it also works indoors run around the ceiling/wall joint.
Available with co-ax or twinlead connections.

- Thanks

SAMOS,

Take a Week to get to know your new Radio.

Put the Radio by/near a Window.

Extend the Radio's Whip Antenna.

Turn the Radio On and Turn-in a Station.

Just Listen to the Radio for 2~5 Hours a Day.

THEN - Consider adding an External Antenna.

hope this helps - iane ~ RHF

Are you thinking of getting one Ace? If you watch the 15 minute video
you will see it has awesome receive capabilities. Certainly a very
nice radio to own.

I posted that I had ordered one, but now I may have to cancel, as the
original estimate has now shot up 40% making it very expensive.....
My currency, the Rand, has dropped like a stone against the Japanese
Yen, the Icom dealer forgot to add VAT tax to my quote and Icom seems
to have upped the pre-estimate price as well = disappointment!

Don't expect a civilized answer from the drunk. Please read some of his responses to other people, collected below. The jerk isn't worth your time.

mike

==========

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one...

Hit the road, drug addled fool.

Shame on CanaDuh for killing thousands of people every day.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Hey, have the bitch send me a letter

Have the bitch send me a f00kin letter!

I'll be waiting for that letter from your *daughter*, asshole!

I just asked you to have the cunt send me a letter, boy.

Hey, little pussy boy, we spell it "cunt" out here, just like I think I spelled it originally, boy.

If I don't get that letter, boy, then you and your *daughter* must both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms letterhead within the next two weeks!

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who
obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I am witty, and I am wise!

Yes, I learn more and more with each passing day!

Lying 'tard boy, much like the other debutante, malcontent, faux boys who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce

Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her
Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and
The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock
Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be
'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind River Massacre.

I collect stamps!

What is your price now?

I, for one, was disappointed in the price of the KWZ 50. Had it been around
$2000 or so I might have sprung for one.

Your bringing Joe to light is appreciated - it was not that he does
not make the cut, rather a function of the author's memory.

As to other categories - go for it. I am curious to see who you
select for Net Police!

West Nile disease kills people in America and other places around the World every year, Canada too.
Bring back DDT!

A few years ago, I read somewhere that DDT is still being manufactured in America, but it is sold to South America.I can still smell that DDT from back in the 1940s and 1950s and 1960s.We used to have a little sprayer thingy, my mom would spray DDT around in our house every year when the mosquitos started showing up.

Sorry about that. I missed it. It's weird thinking about computer usage having a 'history'. History isn't something most people think of themselves as being in the flow of it. History is something that happened to people long dead. I guess that taken in it's proper meaning, History can actually be ten seconds ago.

Telamon,

I Post through Google Groups and at the end of Last-Week
Saturday - 10 Feb 2008 : I had 140 Posts/Replies to the
Rec.Radio.Shortwave Newsgroup for the Whole Month
-and- Today 2/13/08 I now have 186 Posts/Replies which
is a 'difference' of 46 which averages between 14~15
Posts/Replies per Day.

Telamon - Please - Check You Facts -and-
Get Your Numbers Right -before- You OMIF ! ~ RHF

Telamon - Or We Might Start Believing That . . .
You Think We Were All Born Yesterday ! :o)

FWIW - Google Groups using a different 'metric' reports
RHF's 7-Day {Running Weekly} Group Activity :
9 Discussions Started
117 Discussions Replies
Total = 126 Posts/Replies for an Average of 18 per Day.

.
CAUTION : This Post Has Not Been "Approved" by Telamon.

I don't know the price as the dealer is being evasive - says he will
give me a firm price for the shipment arriving next week. I suspect
it's way above his original estimate.

Will let you know when I get a firm price.

Rather than the KWZ-50 I think you would be better off with an Icom
756PROIII
http://www.universal-radio.com/catalog/hamhf/3756.html

and other nationalities in this newsgroup who are routinely insulted by the smal but noisy clique of geriatrics who obsessively post their drivel here. Please know that their ignorant and revolting behavior is not representative of the vast majority of thinking Americans.

Postings such as RHF proclaiming how it made him proud to be an American when he read of the US military killings of Canadian soldiers is so beyond the pale of human decency it is unbelievable.

What is really alarming is that the individual who composed such a sentiment for the world (and posterity) to read is not a maladjusted teenager with a pathological need for attention. It was the proud exclamation of a retired government "worker". Evidently the only difference between him and the described teenager would be their age.

Once again, please accept my/our sincerest apologies.

You have so little faith in those from other countries that I find it
denigrating to them. Do you think they cannot see that the postings
you refer to are from individuals and not all Americans? Do you have
such little faith in their intelligence and feel yourself so superior
you must explain this? Your 'group apology' also speaks little of
your confidence in Americans that you feel you must apologize for us.
Speaking of which, you do NOT speak for "us" you speak only for
yourself. Frankly I am more insulted by your 'group apology' than by
those from other countries who are critical of the US........at least
they speak for themselves.

3987. American Compassion

Newsgroup: rec.radio.shortwave

Looks like compassion in "THE BEST COUNTRY IN THE WORLD" blah blah blah.... isn't limited to just homeless paraplegics (see below). Prison paraplegic also receives some American compassion by being thrown out of his wheelchair onto the floor by police http://www.infowars.com/?p=216.

LOS ANGELES, Jan. 17 (UPI) -- Lawyers filed suit Thursday on behalf of a paraplegic who was left on the street in Los Angeles' skid row still dressed in a hospital gown. Story continued at http://newsdaily.com/TopNews/UPI-1-20080117-19593700-bc-us-patientdumping.xml

I've never been more ashamed to be an American.

GH,

MOH is a Democrat Party of the USA Political Cadre
who's mission is to stir-up Hate between the USA
and any of America's Friends in the War on Terror.

MOH wants everyone to drink the Berkeley Kool-Aid
and March Lock-Step down the Liberal Path to Global
Islamic Facism without a fight; all in the name of Peace.

~ RHF

Why would one need an aircraft carrier to send anything to Cuba? Hmmmm,
Dumbo? After all, a few transport planes or a freighter would do the job.
However, in your impeccable Bullshite logic, its better to piss off everyone
than actually make peace

Its called Corporate Greed where Chinese subjects are making shirts for 25 cents an hour while Walmart and all of these other places import them and charge anywhere from 10 to 30 dollars for a shirt. Thats where the true greed is. And your government is squandering the future of this nation in order to pad the pockets of the few.

BBCWS to close remaining shortwave transmissions to Europe
February 12th, 2008 - 9:35 UTC by Andy

The BBC World Service (BBCWS) announces on its website that the remaining BBCWS shortwave transmissions to Europe will close on 18th February 2008. The BBC says this change is being made in line with listener trends in radio. Increasing numbers of people around the world are choosing to listen to radio on a range of other platforms including FM, satellite and online, with fewer listening on shortwave. This is particularly the case in Europe, where the majority of shortwave transmissions ceased in March 2007. The current closures affect the remaining transmissions heard in southern Europe.

Hey Burr-interesting thread. FWIW and without taking this thread in
another direction or hijacking it I remember posting in here maybe in
02-03-04 I'll try an find it- about Russia.
I had mentioned a little about end time prophecy and mentioned that
the collapse was a facade and that Russia and China were our enemies
and were ultimately going to get us and try an get Israel<--which will
never happen.
I forget who it was that responded and went to berating me and calling
me a num-nut that Russia was finished <sigh> and the Bible was
garbage, I actually received some pretty bad email from that statement
I made. Funny how time shows things for how they really are. :-)
Russia has never missed a beat- they are doing nothing but getting
stronger and behind everything that is evil in this world IMO.

I'm not even sure sure it really simmered down much at all. I think
that Reagan, Clinton and Bushes found it useful to sell the story that
the former Soviets were really opening up and redirect attention
elsewhere.

It did simmer down for quite a while. The Russians were broke. Now, they've a lot of money coming in from sales of oil, so Putin got the bombers out of mothballs.

I remember having a few buzz us a couple times one afternoon. Quite interesting.

Nah, I'm pretty much set with what I have here. If I were to buy a transceiver
I'd probably just go with the 718, if only to do some CW from time to time.

I have no great interest in amateur radio, though I do keep my license current,
but prefer to concentrate on SWBC.

The IBOC is turned on during daylight hours. Wipes out everything 7
khz either
side of their center carrier. Sucks major ass. Whomever invented IBOC
should
be tossed against a wall and shot with 100 rounds from a .50 Cal

No need to apologize. As you've seen, stupidity is Universal. The US also has it's share of inbred alcoholics, but unfortunately, due to the vast difference in population numbers, you are stuck with ten times as many as what Canada can lay claim to.

Thanks for the nice thoughts, they are most welcome.

They tell me it's because people like you are too busy killing in the Guantanamo death camp to be bothered with the small stuff. As always, we get the left overs.

If it makes you feel better, we sing the praises of GW BUSH as we use the rusty pitchforks on the little terrorists. They have to die...we can't have another Cuban cigar and Lewinsky thermidor incident. No kids, No tobacco picking. Prior to this century, Weapons of Mass Intrusion were unheard of.

Yes, Virginia, there IS another leaf...

Yes. George has a Harvard MBA. You, like 'Eduardo', probably never graduated high school.

Now go suck on some sushi, you little miscreant.

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one.

Now go suck on some sushi, you little miscreant.

I just asked you to have the cunt send me a letter, boy.

Damn, the Canucky Niggah didn't have a damn thing to say...

Yes, I am witty, and I am wise!

Hit the road, drug addled fool.

Shame on CanaDuh for killing thousands of people every day.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Hey, have the bitch send me a letter

Have the bitch send me a f00kin letter!

I'll be waiting for that letter from your *daughter*, asshole!

Hey, little pussy boy, we spell it "cunt" out here, just like I think I
spelled it originally, boy.

If I don't get that letter, boy, then you and your *daughter* must
both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms letterhead within the next two weeks!

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I learn more and more with each passing day!

Lying 'tard boy, much like the other debutante, malcontent, faux boys who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

One can never slide the BS by dxAce

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock
Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be
'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake
Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind River Massacre.

I collect stamps!

I would like to have a transceiver that can communicate on the short wave bands and is possible to be powered by battery powered systems.
I would pay $ 500.00 and would need some manuals for the system.

On
> Kill for peace. Scream for sanity.

Kill, kill, kill for peace
Kill, kill, kill for peace
Near or middle or very far east
Far or near or very middle east
Kill, kill, kill for peace
Kill, kill, kill for peace

If you don't like the people
or the way that they talk
If you don't like their manners
or they way that they walk,
Kill, kill, kill for peace
Kill, kill, kill for peace

If you don't kill them
then the Chinese will
If you don't want America
to play second fiddle,
Kill, kill, kill for peace
Kill, kill, kill for peace

If you let them live
they might support the Russians
If you let them live
they might love the Russians
Kill, kill, kill for peace
Kill, kill, kill for peace

(spoken) Kill 'em, kill 'em, strafe those gook creeps!

The only gook an
American can trust
Is a gook that's got
his yellow head bust.
Kill, kill, kill for peace
Kill, kill, kill for peace

Kill, kill, it'll
feel so good,
like my captain
said it should
Kill, kill, kill for peace
Kill, kill, kill for peace

Kill it will give
you a mental ease
kill it will give
you a big release
Kill, kill, kill for peace
Kill, kill, kill for peace
Kill, kill, kill for peace
Kill, kill, kill for peace

I would put it a different way. I would say he was as perceptive as you
are and that has got to be the harshest assessment of RHF to date.

I think so, they have started bad mouthing us a again.

Sure brings back memories of when I started listening to SW in Nam, got my first Sony 7600 from the PX at Phu Bai.

Had a long wire inside the building.

Whine all you want. These are Google search results. My news server read
higher but you can't see that. Sunday to Sunday results.

Jan 20 to Jan 27 - 189 posts
Jan 27 to Feb 3 - 235 posts
Feb 3 to Feb 10 - 210 posts

Feb 10 to Feb 14 - 123 posts (Sunday to today. You are right on track)

Wow. you are even clueless about the number of posts you make.

<You tell a lie and that constitutes a mistake on their part? Sorry
<Sunshine, but that ain't the way it works.

The mistake, I think was made by someone in the industry who recommended me
for the panel, and it just never got corrected. because convention
preparations are pretty much a whirlwind of activity.. The main fact is that
I was the person in charge of programming, and that is what the panel was
about... 5 of the head programmers of 5 of the top 10 radio companies in the
US.

At a certain point, titles are irrelevant.

Funny, there are about 16 million persons over 12 in the NYC metro area, and
nobody, other than you, thinks they are "all" being interfered with. That is
probably because there is no interference at all such as you spoke of.

4094. LW/MW preselector update

Newsgroup: rec.radio.shortwave
Date: 2008-02-15 12:43:11 UTC
From: Pete KE9OA <p.gianako@comcast.net>
Message-ID: <s7-dnamzJeRFFSjanZ2dnUVZ_r-vnZ2d@comcast.com>
Source record: 137062

I've got the first iteration prototype completed. Yesterday, I had a chance to compare this unit to a McKay Dymek
DA-5 active loopstick antenna. The prototype, with its lower gain RF signal chain had 6 to 10dB higher output, and a much sharper peak than the McKay Dymek unit. I would have to attribute this to the fact that the loopstick I am using has much higher Q, probably because of the type of Litz wire that I am using. Nulling capability was at least as good as the McKay Dymek unit, if not slightly better.
Hopefully, next week I should be receiving the 5/8 inch diameter ferrite rod samples. I would expect another 6 to 10dB higher RF output than what I am experiencing with my current iteration, because of the larger cross sectional area afforded by the larger diameter ferrite. I will have two types of ferrite.....the permeability of each type of material will be optimized for both the LW/MW range and also for the 1.8 to 6MHz range. With the 1200pF tuning cap that I will be using, I should be able to cover the LW/MW range with only one loopstick. By switching a parallel cap, I might be able to extend the range of the LW/MW unit down to 100kHz. I still need to do some experimentation. I can't reveal who the manufacturer of this unit is going to be, but some of you have probably already guessed it.

Pete

This sounds promising. Especially up here, where S/N is not conducive
to good listening, it gives hope that someday, decent reception of MW
may be possible again.

Do let us know when this device goes into production. I'll definitely
be interested in owning one.

Congratulations - good choice. Usually the built-in whip is designed to deliver a lot of stations so I would get used to that. The choice of external antenna really depends on your location, setup and the receiver. Sometimes less can be more when it comes to antennas because too much antenna and you will literally swamp that portable with signals at night. A simple wire antenna run around the baseboards, run around the perimeter of a window or hung out a window could be a good and inexpensive choice.

Which antenna were you using with the now defunct Sony 2002. That one should work ewually well with the G5.

Thought I'd check out the freq. for that damn WBBM IBOC. Using the SRII and nulling out WBBM 780 I had WKRD 790 in Louisville at 1330.

Only Foster?

The list of names of Clinton associates who've exited the building is ponderous.

But on the subject of dying in the name of America.....

I had a conversation with an Army pilot who's just returned after two years in Iraq. He's amazed at the press the operation is getting. He refers to it as an operation because he's no longer seeing enough conflict in the region to call it a war.

Two stories he had to tell that made the impact of the discrepancy between what's going on on the ground, there, and the reportage in the press significant. While we're getting the horror in our living rooms, he's seeing a country about the size of Texas, with pretty much peaceful living, except for fighting in 3 regions. Imagine the three worst counties in Texas and you have an idea the size of the conflict. Where it's bad, it's bad. But most of the country is not seeing the insurgency.

Well, ok....two stories....

One is the story of a decision made to include the right to keep and bear arms in the new Iraqi Constitution. Hotly debated, but only on this side of the pond. See, al Quaeda was well known for invading people's homes, putting a knife to the throats of young children in the home and announcing the home had been selected to assist in the efforts of al Quaeda. Well, that's what you get when the public is disarmed.

So, it was decided to include the right to keep and bear arms as a fundamental right of citizenship.

Well, Military operations, US, Iraqi, and coalition forces, unearthed a cache of weapons in a small town in one of the areas seeing a good deal of al Quaeda activity. Mostly AK's, a few hand guns. So, they pass them out to every able bodied citizen who wants one. And with their brand new rifles...30 bullets to each citizen carrying one. One rifle. 30 cartridges. The newly armed citizens return to their homes for the evening.

In the morning, in the village square. 18 dead al Quaeda. Arranged neatly for easy disposal. 18 dead al Quaeda.

No one "knows" what happened.

The town doesn't see another al Quaeda home invasion. Al Quaeda moves on.

The other story is a bit more poignant. It's about religion. And it's about religion in a nation that's seen more than it's share of religion driven killing.

This is in Baghdad. Now, the government was planning to sell off the vacant homes of Christians run off during the early days of the conflict. Al Quaeda had been purging the city of non-Muslims. As things settled down, following the retaking of Baghdad, some, but not all of the Christians had returned. But the government had made the decisions to sell off the unoccupied homes. Almost in unison, the community petitioned the government to stop the sales. Promising that the Christians would be returning. These are primarily Muslims. Petitioning the government to let them care for, maintain, and ready the homes for Christians whom they were fully convinced would return. And so far, these Muslims have been right. Christians are returning to Baghdad. Welcomed as the brethren they are, by their Muslim neighbors.

This return of Christianity has resulted in some amazing moments of unity. One was the opening of a new Catholic Cathedral. This is in Baghdad, now. A new Catholic Cathedral. And on the first day of worship, the faithful could barely get near the place for all the Imams and Mullahs, from the Muslim community, lined up halfway down the block, to shake the hand of the Catholic Priest in his new house of worship. These are Muslims, lining up to shake the hands of the Catholic Priest. In Baghdad.

The construction of the Cathedral, itself, is something of a wonder. Not only was it built by Christians, in Baghdad, but it was built with the help of local Muslims.

This Iraq veteran showed me a picture of Muslims and Christians pulling together to raise the Cross over the new Cathedral...It was no less a moving tableau than the Marines raising the flag on Mount Suribachi.

And this is in Baghdad....the very epicenter of Saddam's Iraq.

We don't hear this in the press. Especially, we don't hear about how well the right to keep and bear arms works in a nation under reconstruction. But we hear it from returning vets. Vets who tell of being fined by their base commander for being off base without their helmets. Because things are so quiet where they are. We don't hear in the press how well the surge is working. Or how much normalcy has returned to the country.

We don't hear in the press that a country the size of Texas nearly bombed back to the Stone Age less than a decade ago has reduced the areas of conflict to three in number, and about the size of a Texas county each.

We only hear about the gore and the violence, and the bombings, and the bullets flying. About the civilians killed, and the soldiers fallen. And we hear about Senators calling our generals traitors, our military murderers, and the President a war criminal. But we don't hear that the soldiers there are welcomed into quiet homes in settled peaceful neighborhoods. We don't hear that civilians are killed by the same enemy that takes our fighting men and women...the insurgents. We don't hear that the infractstructure in Iraq is nearly complete, now. That power has been restored to all but a few places in the country, and that every day people go about their antebellum lives in quiet enjoyment.

It's tough to be in the news business, today. Competition is now 24/7, and ruthless. News lives and dies by ratings, now. And sensationalism and outrage sells. That, and the J-schools have long abandoned any education that includes complete and honest reportage. Agenda is now a structured course a J-schools across the country. So, we hear what sells. We read what sells newspapers. We see what makes ratings. We hear what sells CPP.

What we don't hear is how well we, as Americans, are doing as defenders of freedom. We don't hear how well we, as Americans, are doing in fighting disease worldwide. We don't hear how well we, as Americans, are doing in the aftermath of earthquakes, tsunamis, typhoons, and floods...worldwide...when the call goes out for help.

We only hear the horrors, the abominations, the ulterior motives...we only hear the accusations and attempts to guilt us into turning the product of our lives and livelihoods over to those who simply don't want to do what it takes to achieve them themselves.

We only hear the whinings of self loathing Americans who don't know how to embrace both their own successes, and our successes as a nation in building the infrastructure that permits us to be the most generous people on Earth.

It may be time to pull the plug for a few weeks and let the rest of the world know just what we do for them without being asked.

The word on the Palstar group at Yahoo is that Palstar is intending to launch a number of new products this year, including an active ferrite/ loop antenna with interchangeable heads, a transceiver and a receiver. The active antenna is likely to debut at Dayton in May.

From MacWorld.com

Open Reel Software on Friday introduced Aether, a new ham radio logging application for Mac OS X. It costs $39.

Aether includes tools to log contacts while on the air, organize, search and track contacts later. It features automatic callbook lookup, integration with cocoaModem 2.0, support for Spotlight, Mail, Address Book and AppleScript, RS-232 rig control, ADIF and Cabrillo import/export support, Google Maps and QRZ.com integration and automatic duplication checking.

4115. WSM's chief engineer on HD Radio

Newsgroup: rec.radio.shortwave
Date: 2008-02-15 16:39:09 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <53090a46-bb7d-4b5b-928c-e6c49eb05110@h11g2000prf.googlegroups.com>
Source record: 137083

"Natterings of a naysayer"

"The vast majority of the stations employing HD technology exist in the class of the largest broadcasters that are heavily invested in the brand with a direct ownership stake in the inventor and capital investment in the equipment. The majority of mid to small stations are forever frozen out of participation due to the capital cost and ongoing licensing fees that represent additional expense in a time when it is difficult to pay the FICA tax or light bill, others taking a wait and see attitude. Absences of HD in these geographic regions present a discontinuity of coverage and setback for receiver sales. I contend the large groups are committed but only to a degree as most (if not all) have not yet stuck their neck out far enough to invest in back-up or redundant HD transmission systems. Some of the equipment is now into its second if not already third generation, all in a very short period of existence."

"The 10db power increase that's being talked about for FM may help the digital but will have a negative impact on the analog, which is currently paying ALL the bills. As an example, even a well-integrated 92 and/or 67 kHz relatively narrow-band subcarriers can wreak multipath havoc with an FM signal in some markets. The sheer capital cost of the power increase (if approved) will be staggering considering most of the current hardware and ancillary equipment will have to be replaced."

"Where robust in reach, radio is an ailing medium that is undergoing yet another adjustment to bring expenses inline with revised revenue; so another big outlay in capital is not likely. Many station staff level people look on HD as something that was added to their task list with no operational funding and dwindling resources. Sales people are concerned that additional channels may compete for revenue they have running on other stations even in their own cluster."

Watt Hairston, Chief Engineer, WSM

There are legal requirements to be met before you can broadcast radio.
Licensing usually requires testing by an approved Radio association or
Government agency. Responsible stores usually don't sell equipment to
unlicensed operators.

It isn't illegal (at least in the good ol' USA) for a store to sell a
transceiver to an unlicensed individual.

The individual might just wish to purchase it merely for the receiver side,
and/or may be in the process of being licensed.

You are nuts - SDR has already been around a long time and second generation SDR's are now in widescale use. A lot of my MW DX contacts are using the SDR-IQ and many are moving to the new Italian Perseus.

As for SDR's running circles around hardware based receivers, all the fella's I know who have SDR's retain their normal hardware radio's and use them.

And as for the magnificent Icom IC-7700, it incorporates the best elements of SDR radio's plus the very best of the conventional radio's for inveterate knob twiddlers like me who don't like SDR's.

Maybe RHF would like to publish a few web leads to the SDR radio's now widely in use.

Of all the former 1 A clear channels, WSM is the lowest in billing and the lowest in market rank. It exists only as a promotion for the Gaylord enterprises in Nashville, as its ratings place it 14th in the market, and in billings it is 22nd per a reputable source. For most viable stations in the top 100 markets, the cost of upgrading to new HD gear is small, and is a depreciable capital expense item, not a cost. Dogs like WSM will find it hard to manage, but that is because they are not successful radio stations.

4126. 4930 khz 2125UTC - VOA Africa (Botswana)

Most of the current "hardware" based amateur rigs are mainly software,
anyway, with a just a few knobs here and there. My Icom 7000 is such
a critter. The Elecraft I mentioned is quite digital. If, by SDR, you
mean black boxes, they keep flopping. Knobs and meters have their
allure...

- We have street teams out there every day talking to listners
- of our stations. Despite cuming 2 million New Yorkers,
- we have not heard one complaint of interference inside our
- protected contours other than the routine "when my radio
- is near my computer...." or "when mom puts on the tv...."
- that we all have heard for the last few decades.

d'Eduardo - What would you expect -if- Your Target Audience
is Spanich Speaking Radio Listeners; where the Number of
Spanish Radio Stations "Choices" in a Metro Area is : One,
a Couple, or very Few. A 'Sample' Size that has Attributes
and Charateristics that do not align and correspond with the
Greater non-Spanish Speaking Population {English Speakers}
who have a Greater Number of Radio Listening Options and
more Freedom of Choice across the AM and FM Radio Bands.

Most of your Radio Listeners would 'Fit" into Groups # 1 or # 2.

d"Eduado - Your's is a Limited Answer to a Question
with Mush Broader Aspects. ~ RHF

Most Regular AM/FM Radio Listeners Can Be Grouped Into :

Group # 1 - The Single (1) Radio Station Listeners :
The Reality is that a very large number of Radio Listeners
are Single (1) Station Listeners. Their Radio is Tuned to
One 'Local' Radio Station and that's that.
=PS= You will often see a new or old style Manual Tune
Radio be used by them in some Room in their Home.

So -if- "That" Radio Station 'sounds-ok' they could careless
about what the rest of the Radio Band sounds like.
? Why Is the Tivoli Audio Model One Manual Tuning* ?
http://www.universal-radio.com/catalog/spcialty/1969.html
* Marketing Research shows . . . .

Group # 2 - The Few (3~4) Radio Station Listeners :
This to is a very large Group of Radio Listeners and they
will usually have a newer AM/FM Radio with Five (5)
Presets per Band. Normally They Listen to One to
Two of those 'Local' Radio Stations on each of the
AM and FM Radio Bands.
? Why Does the CCRadio Only Have 5-Presets* ?
http://www.ccrane.com/radios/am-fm-radios/ccradio-plus/index.aspx
* Marketing Research shows . . . .
=PS= Why Do Most Automobile AM/FM Radios
Have About 5~6 Push-Buttons** {PreSets}
http://www.originalcarradios.com/images/Dodgeradios/DA-112.jpg
http://www.hotbuy4u.com/pics/kenwood-kdc132.jpg
** Once Again Marketing Research shows . . . .

Time Out - Just for the Fun of It !
IT WAS EXTREAMLY LOUD => http://tinyurl.com/28qpak

Group # 3 - The Hourly {Minute-by-Minute} Radio Listener
This to is not as large a Group of Radio Listeners and
they are always changing the Radio Station that they are
Listening to; and seeking out something interesting to
hear. For them Seventy Plus (70+) Radio Station PreSets
{Memories} are not enought.
+ They Want More.
+ They Want Their Radios To Auto-Scan.
+ They Want Their Radios Look Complex.
+ They Want AM & FM Plus More . . .
+ They Want To Hear Distant (DX) Radio Stations.
=PS= They Want Shortwave + CW + SSB and Even More . . .

Costs to upgrade run from $100,000 to $600,000 - not small. Plus, the on-going licensing and HD channel royalty fees. Plus, the new 10db power increase, if approved, will be staggering, as most equipment will need replacing. Plus, each new release of hardware upgrade is an on-going expense, with no return. Nice try! The same applies to those empty HD radios that aren't selling.

<Costs to upgrade run from $100,000 to $600,000 - not small.

For a non directional, single tower operation, the costs are at the very low
end.

<Plus, the
<on-going licensing and HD channel royalty fees.

There is on annual fee for an AM.

< Plus, the new 10db
<power increase, if approved, will be staggering, as most equipment
<will need replacing.

That is for FM. And the costs are relatively minor... many existing FM HD
transmitters can increase power with module increases. "Most" is an absurd
word to use. Generally, only the PA part of the HD transmitter will be
replaced... the rest of most systems are robust enough, as they handle the
analog power which is much greater.

Most Spanish speakers are also English speakers in the NY metro. About two thirds of NY Hispanics also listen to English staitons. And NY is 20% Hispanic... one out of ever 5 people.

<who have a Greater Number of Radio Listening Options and
<more Freedom of Choice across the AM and FM Radio Bands.

With the stations that exist in Spanish, the major formats are covered, although only once each... not seversal times over such as happens in the English language station array.

<Most of your Radio Listeners would 'Fit" into Groups # 1 or # 2.
<Most Regular AM/FM Radio Listeners Can Be Grouped Into :

<Group # 1 - The Single (1) Radio Station Listeners :
<The Reality is that a very large number of Radio Listeners
<are Single (1) Station Listeners. Their Radio is Tuned to
<One 'Local' Radio Station and that's that.

Untrue. I was discussing this with Arbitron today, and the percentage of single station listeners is less than 1%. Most single station listeners are evangelicals who do not listen to secular radio, only the evangelical station. In NY, the average person listens to at least 3 radio stations

during the course of a week, with 6 to 7 being the high end.

<Group # 2 - The Few (3~4) Radio Station Listeners :
<This to is a very large Group of Radio Listeners and they
<will usually have a newer AM/FM Radio with Five (5)
<Presets per Band. Normally They Listen to One to
<Two of those 'Local' Radio Stations on each of the
<AM and FM Radio Bands.

Wrong again. While the 3 to 4 station range is normal, most in home and at work radios have no presets. Younger listeners (under 35 to 40) will listen to all FM, and those in the 35-54 range probably 2 to 3 FMs and an AM. Over 55, the split is more even with AM and FM.

Women tend to listen to more FM, and ethnic groups like Bkacks and Hispanics use practically no AM.

<Group # 3 - The Hourly {Minute-by-Minute} Radio Listener
<This to is not as large a Group of Radio Listeners and
<t<hey are always changing the Radio Station that they are
<Listening to; and seeking out something interesting to
<hear. For them Seventy Plus (70+) Radio Station PreSets
<{Memories} are not enought.

This trait almost entirely affects males in the teen and 18-24 bracket, who have three to five stations that play the music they like, and between which the switch when in the car where they have buttons on the radio. These listeners are not very common.

From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <47B62714.1639@mindspring.com>
Source record: 136960

If you're hearing IBOC on 770, try LSB. It LSB is louder than USB, the
the IBOC is coming from 780. If USB is louder than LSB, the IBOC is coming
from 760.

(note opposite direction from what you'd expect.)

To check that (say) 780 is in fact IBOC, listen to 780 in LSB or USB.
If you hear a diesel rumble, IBOC is on.

I have not. But Elecraft gets good reviews in QST and such. They
haven't reviewed the K3 yet, but previous Elecrafts are rated fairly
highly.

There are K3 reviews at eHam.net from actual users --

SDRs are not running circles around hardware based receivers, at least
not yet, but their ability to record a large frequency spectrum to
hard drive for later analysis (up to 800 kHz with the Perseus) and
their price tags ($500-1000) make them exceptionally capable tools for
the demanding DX-er. My personal experience is that an excellent
"hardware" receiver will still be more sensitive, have better AGC and
better audio and should in some cases be able to resolve a difficult
station on that lone frequency. It all comes down to how one prefers
to listen. I have three SDRs and I've never looked back. But I'll
never part with my Icoms either.

- Actually, in NY the choices are 4 FMs and two fulltime AMs,
- plus several more at the edges of the metro, such as an AM
- and FM in Suffolk County.

"plus several more at the edges of the metro"

d'Eduardo - OK so now you are including Radio Stations
BEYOND . . . the Service Contours

Let Us All Take A Deep Breath Before We Start . . .
ROTF LOBO ~ RHF

> All and all, there are about 9 of them.
>
> < A 'Sample' Size that has Attributes
> <and Charateristics that do not align and correspond with the

> Hispanic... one out of ever 5 people.
>
> <who have a Greater Number of Radio Listening Options and
> <more Freedom of Choice across the AM and FM Radio Bands.

- With the stations that exist in Spanish, the major formats
- are covered, although only once each... not seversal times
- over such as happens in the English language station array.

That's Called Limited "Choice" -versus- Maximum "Choice" :
"Your Sampling" applies to "Your Sample"; and can not be
applied to the Greater Polulation with any Degree of Certainty.

> <Most of your Radio Listeners would 'Fit" into Groups # 1 or # 2.
> <Most Regular AM/FM Radio Listeners Can Be Grouped Into :
>
> <Group # 1 - The Single (1) Radio Station Listeners :
> <The Reality is that a very large number of Radio Listeners
> <are Single (1) Station Listeners. Their Radio is Tuned to
> <One 'Local' Radio Station and that's that.

- Untrue. I was discussing this with Arbitron today, and the
- percentage of single station listeners is less than 1%.

A - The They {Arbitron} must not Count Business and Work Place
Radio Listeners : Where it is One Radio Station "Only" All Day
Every Day. {The Shop Radio / Cafe Radio}

Have then give you some numbers specific to Work Place
Radio Listening. I spent 30 Years Five Days a Week
for 8 Hours a Day having the Choice of One Radio Station
to Listen To; that is when I could listen to a Radio at all.

B - Drive Time Radio "Traffic and Weather" is usually a One
Radio Station "Only" Time of Day for Many/Most Commuters :
What Does Arbitron Have To Say About That ?
? Is that "Included" in the One Percent (1%) ?

- Most single station listeners are evangelicals who do not
- listen to secular radio, only the evangelical station.

Like the 'segue' to bashing Christian Evangelical Radio Listeners :

While your Taget Audience Speaks Spanish -remember-
The Christian Evangelical Radio Listeners Speak "GOD" :o)

EWTN "Catholic Radio" should also factor in to that Group
of One Radio Station 'Only' Listeners.
{o: OK - Only the Pope Nose :o}

- In NY, the average person listens to at least 3 radio stations
- during the course of a week, with 6 to 7 being the high end.

Sounds About Right.
{Most likely applies to many/most Metro Areas.}

> <Group # 2 - The Few (3~4) Radio Station Listeners :
> <This to is a very large Group of Radio Listeners and they
> <will usually have a newer AM/FM Radio with Five (5)
> <Presets per Band. Normally They Listen to One to
> <Two of those 'Local' Radio Stations on each of the
> <AM and FM Radio Bands.

- Wrong again. While the 3 to 4 station range is normal,
- most in home and at work radios have no presets.
- Younger listeners (under 35 to 40) will listen to all FM,
- and those in the 35-54 range probably 2 to 3 FMs and
- an AM.
- Over 55, the split is more even with AM and FM.

d'Eduardo - hint, Hint. HINT ! - It was not the type of Radio
{Yes PreSets Make It Easier to Push-a-Button to Tune.}
I was About the Avergae "Being" 3~4 Radio Stations that
the 'majority' of Radio Station Listeners 'Choose' to Listen
to on a Regular Basis; and 97.53% of those Radio Stations
are most likely LOCAL*.
* So for this 'majority' of Radio Listeners IBOC "HD" Radio
Ain't A Problem.

- Women tend to listen to more FM, and ethnic groups
like Blacks and Hispanics use practically no AM.

The 'Inference' being AM/MW Radio is the vestige of :
The All American White Males -aka- Red-Neck Radio*.
* Politely called Conservative Talk Radio

> <Group # 3 - The Hourly {Minute-by-Minute} Radio Listener
> <This to is not as large a Group of Radio Listeners and
> <t<hey are always changing the Radio Station that they are
> <Listening to; and seeking out something interesting to
> <hear. For them Seventy Plus (70+) Radio Station PreSets
> <{Memories} are not enought.

- This trait almost entirely affects males in the teen and
- 18-24 bracket, who have three to five stations that play
- the music they like, and between which the switch when
- in the car where they have buttons on the radio.

DANG - There Are A Whole Bunch of Us Here on RRS :
That Are Still Young at Heart and Alive in the Spirit of
Active Radio Listening.

-Or- Maybe You are Calling Us All Immature ? :-{

- These listeners are not very common.

YEP - That Would Be Us - Distant (DX) Listeners Too !
[-: The Un-Common {Discerning} Few :-]

Oops - I am Playing d'Eduardo Ping-Pong !
now you stop that 'rhf' ~ RHF

(OT) : What About : The d'Eduardo "Ping-Pong" Players List ?

Sometimes it is after eight or nine O'Clock in the morning when I wake up.Then doggy has to take me out in the front yard for a few minutes.Then I make some coffee and turn on my computer and my WebTV and my other tv set (Sony 22'' CRT Trinitron Wega tv set for old, old movies on tv) But, usually it is in the wee wee hours of the night when I nod off and get some sleep.

www.softwar.net look for the articles about the Traitor Klintoons.

Tell ya what, 'Eduardo', I need a road trip. How about you set up a time in May, when you'd be willing to meet up with me and Telamon... I'll pick him up in Ventura after I make a run through Ojai, and we'll run down to Glendale, or wherever you park your ass and we'll both check out those QSL's (I'll bring mine).

Caveat: You agree to pay for my trip if either, you don't show, you don't have the QSL's, etc.

Have your *daughter* draw up a contract, BOY!

"Radio: How many people did it take to write that Clear Channel memo?"

"When BainCapital opened the books it revealed the enormous sums of
money and time wasted with HD Radio conversion - at $100K per station
- and the other Clear Channel side projects, many since abandoned, all
of which helped give the radio industry its bad name."

A pilot, eh? Is it possible that it's difficult to see suicide bombers
from 20,000 feet? ;-)

> Two stories he had to tell that made the impact of the discrepancy
> between what's going on on the ground, there, and the reportage in the

Peaceful? Maybe...but -minus- water, sewage treatment and electricity,
fear of sending kids to school, lack of heating and cooking fuel,
suicide bombers (even though they may have gone elsewhere than Baghdad
for the moment).

> Well, ok....two stories....
>
> One is the story of a decision made to include the right to keep and

> announcing the home had been selected to assist in the efforts of al
> Quaeda. Well, that's what you get when the public is disarmed.

Maybe so, but you are overlooking the fact that there weren't -ANY- al
Quaeda in Iraq until we barged in. Saddam wouldn't stand for it.

> these Muslims have been right. Christians are returning to Baghdad.
> Welcomed as the brethren they are, by their Muslim neighbors.

Interesting, but I believe the issue was not so much of "Christians versus Muslims" as it was "Sunni Muslims versus Shiite Muslims" (with the Kurd issue thrown in to keep things interesting). This battle has been going on for -centuries- and was only kept under control by the iron fist of Saddam. If we are naive enough to think we can settle this millenia old dispute in 5 or 10 or 50 years, well, good luck --and I hope our Treasury can afford it (.6 Trillion spent so far and no end in sight). Just telling them to 'play nice' isn't going to work. On the other hand, maybe McCain is right -- maybe we will be there for a hundred years.

> We only hear about the gore and the violence, and the bombings, and
> the bullets flying. About the civilians killed, and the soldiers fallen.

Well, maybe we hear about it because that is what's happening.

> It's tough to be in the news business, today. Competition is now
> 24/7, and ruthless. News lives and dies by ratings, now. And

> ratings. We hear what sells CPP.

Absolutely true! Iraq news OR domestic newscasts, the nasty stuff gets the play. But even though we only hear about the bad things, the bad things are actually (and sadly) happening. The bad is still there, whether or not the 'good' is reported.

> What we don't hear is how well we, as Americans, are doing as
> defenders of freedom.

Which, in all fairness, begs the question of why we should be the policemen of the world. If what you say is true, why didn't we do -anything- about Stalin killing millions, Rwanda, Pol Pot's killing fields? Our silence then was deafening.

Finally, please explain why us being in Iraq makes us "defenders of freedom". Whose freedom? W himself said "No WMDs"; Cheney himself said "No 9/11 tie-in". Fair enough...but then why are we there????

Yes, but successful radio stations that find it easy to manage are
then destined to become unsuccessful radio stations. This is what
happens when desperation is substituted for a sound business plan.

I use a Yaesu FT-857D. It's a little more than $500, but it has good coverage and is fairly small. A good performer, too. I use it with a small transmitting loop constructed from 1/4" diameter copper refrigeration tubing and tuned with a big butterfly capacitor. Great fun.

correct.. Scares the Bejesus out of me every time a Republican get elected as President of the United States of America and your leftie nutjobs threaten to move to Canada.

Please keep your trash on your side of the border, we already have more than our share.

Politics

Every revolution has its political issues. Free software for building radios is troublesome to some people. In the US, we've run into opposition from the Motion Picture Association of America and its attempt with the Broadcast Flag to restrict the kinds of receivers that can be built for over-the-air digital TV.

The US Federal Communications Commission has issued a Notice of Proposed Rule Making (NPRM) concerning Cognitive Radio Technologies and Software Defined Radios. Several troublesome issues are raised in the NPRM, including restricting the sale of high-speed digital-to-analog converters, requirements for digital signatures or similar methods to keep unauthorized software out of software radio hardware and new restrictions on radios built for the amateur radio market.

I really don't want to say this, my many shortwave friends, but I find that I am giving up far to much of my increasingly valuable time here on RRS trying to educate the faux, the debutantes, and those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the world of SW.

Hi Ace,

I believe they will be there until the end of the month so there will be time to lsiten for the on different hambands. Not sure if you caught the Cocos Island DXpedition. It was only a handful of days, they concluded on 2/14. Submit a few calls and get a nice QSL card.

Sorry to see you're taking off, Ace. Many of us, including myself,
have certainly benefitted from your on-topic postings. So many thanks
for those many contributions over the years.

It's truly a pity that this group is inundated with so much off-topic
rubbish and that so many folks so easily rise to the bait when
intentionally inflammatory off-topic postings are submitted. As I
value my time, as well, I simply ignore the off-topic rubbish and
don't delve into the idiotic ranting threads. This group would be far
better off, in my opinion, if more folks would do the same.

In any case, it's a pity that the group is losing one of its most
experienced DXers. I do hope you'll reconsider. If not, then we bid
you farewell! Enjoy your Drakes, and the best of DX to you!

Junius

I am really sorry to read of your decision. Your contribution to on
topic subjects has been immense and your vast experience highly
appreciated. I will certainly miss you and hope that after a period
you may reconsider and start re-posting your excellent on topic
contributions again.

In the meantime go well and enjoy your DXing with your fine Drake
radio's.
Good luck and all the best from:

- Don't forget that the NIMBYs will go nuts when they hear
- all the radio stations are going up 10 times in power.

Lets see an Analog AM or FM Radio Station that has
100% of it's Analog ERP as a Baseline.

Starts up the IBOC Digital Signal at 1% of the ERP for
the Analog ERP Baseline.

Now they would increase the IBOC Digital Signal from 1%
to 10% (10X) of the ERP for the Analog ERP Baseline.

What's The Problem : Seems to me that 10% is still
1/10th of 100% Analog ERP Baseline.

4220. Consumers, Wall Street Not Buying HD!

Newsgroup: rec.radio.shortwave
Date: 2008-02-16 15:57:46 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <f77b5dca-7ca2-4f41-b0c9-22bc21cbf73c@e60g2000hsh.googlegroups.com>
Source record: 137138

"Consumers, Wall Street Not Buying HD!"

Admit it. You've secretly wondered why the radio industry has invested so much in HD radio. You've secretly wondered what the big payoff is. Here's some advice if you still have a job in radio: keep it secret and don't wonder out loud. In fact, you probably want to be seen gulping as much HD Kool-Aid as you possibly can, lest your name appear on one of those increasingly numerous slips that are coloring the halls of radio stations in Pepto-Bismol pink.Here's how it looks to me: (1) The public has shown little interest in HD Radio. HD Radio was the biggest radio advertiser in 2007 and roughly 350,000 units were sold. By comparison, Sirius added over 900,000 in Q4 of 2006 alone, with a far less advertising support. At the rate HD Radio was adopted in 2007, it would take over 15 years to equal the current critical mass of Satellite radio. (2) There is no apparent revenue model for HD Radio. How many HD radios would have been sold if the channels included advertising? Well, certainly not more. (3) The Radio industry is embarrassing itself with its public support for HD Radio. Whether perceived as backing a loser or profoundly ineffective as an advertising vehicle, Radio isnâEURO(tm)t representing itself well as a marketing vehicle or partner with its public support for this failing product. So why is radio hitching its wagon to the HD radio star? Could even "success" be successful?

Suppose that through some unexplainable act of God, they actually sold 15 million HD radios. (Don't get me wrong, with less than 3% of that number in use despite the year's biggest advertising blitz in radio in 2007, there is no real hope that anything like that will happen in the foreseeable future.)

Then presume that the delivery for HD radio was roughly equal to what now goes to satellite, roughly 6% of all radio listening. (Here again, not likely to happen -- more money/effort is going into XM/Sirius, reception is better, plus they have big name talent). But there is no guarantee that the 6% would be incremental listening. Some of it would probably be INSTEAD of terrestrial radio, not in addition to it. So maybe you end up with 3% more real delivery than they had before.

That puts all radio (terrestrial and HD combined) delivery back to where it was sometime in 2006, under a scenario that's so optimistic it has virtually no chance of happening.
"Consumers, Wall Street Not Buying HD!"

So what's the play here?

There doesn't seem to be one. The Radio industry is correct to conclude that they need to make some changes to start growing again, but they seem to have made a bad bet with HD, and there doesn't seem to be much percentage in staying the course.

Larry Rosin suggested that streaming highly-rated terrestrial streams would be more appealing than what is currently available on most HD channels, and he's right, but the impact wouldn't be enough to offer a real fix.

The radio industry has publicly touted a string of "doomed to fail" strategies to Wall Street since the great consolidation panic of 1996 (Ad buyers buying the whole country with 2 calls, "Less Is More," the idea of radio-equipped cell phones adding $3 billion in revenue, etc.). Wall Street's not buying in anymore. The radio industry's aggregate stock price has fallen by roughly half in the last year. That's double the loss of the most hard-hit markets in the housing sector. Wall Street (based on market capitalization numbers) has actually valued some decent sized radio groups at less than the value of some private houses in the Hamptons and many large banks have dropped analysis of the sector entirely.

One group head said recently that radio's problem is perception. But, and this is a big "but," perception of the radio industry will not improve while its head honchos publicly chase rainbows like HD Radio. It's time radio faced the music on HD and let it fade to inaudibility, where it already is anyway for all but 400,000 people.

http://tinyurl.com/3cqnyq

"HD Radio spinners claim a breakthrough year: Pulling a fast one"

"According to a press release from the Alliance 330,000 HD receivers were sold last year. This is a 725 per cent increase from the 40,000 sets purchased a year earlier and therefore 2007 was a 'breakthrough year' for the technology. In 2008 they will sell a million of the things."

7.because the space of the website is limited,we can also supply many
other products which be not showed out in our site. if you have the
photos of the products you need , we are pleasure to supply for your
orders.

And our company can supply for our customers ,as follow:
1. top quality.all our products have top quality.
2. most rational price. we offer the most competitive price to you
to
open your market. So today most of our products have sold well in the
America, Europe, Middle East, Southeast Asia etc..
3. safe and fast shipment. As different country you are in, we will
deliver the products to you by different ways and pledge to arrive to
your address 100%.and we will send the products to you within 24h
after we get your payment.
4.many products in stock. We have many products in stock and kinds of
size you need , also include kid's.
5.our credit. If the products can be not delivered to your address as
our reason, we will refund the money you paid.
Hope sincerely to have glad and long term business relationship with
you.
If you are interested in our products and have any problem, welcome
to
contact us.
Please trust us , we will be your best choice !!!

to me the biggest reason paypal/ebay sucks and why id NEVER ever use paypal cause if someone you seel something to has a totally bogus complaignt you could find yourself short the money and w/little recourse

if i get paid i don't want anyone to have the ability to just 'take' my money away putting a burden on me to get it back, to wich i might not i sell practically nothing anyplace so no biggie for me and as mostly a occionasional buyer if rules favor the buyer iam happy

but for a few thngs i might like to sell i'd never use pp for that
reason i believe this issue is well documented

4227. Point-of-Fact : Consumers Are Buying "HD" Radios ! - How Is This Bad News For "HD" Radio ?

Newsgroup: rec.radio.shortwave
Date: 2008-02-16 17:25:08 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <c90c833e-4ea6-4ee4-b6b8-61fee6d3cd41@s19g2000prg.googlegroups.com>
Source record: 137145

On Feb 16, 7:57 am, IBOCcrock <ibocisacr...@yahoo.com> wrote:
- "HD Radio spinners claim a breakthrough year:
- Pulling a fast one"
- "According to a press release from the Alliance
- 330,000 HD receivers were sold last year.
- This is a 725 per cent increase from the
- 40,000 sets purchased a year earlier and
- therefore 2007 was a 'breakthrough year' for the technology.
- In 2008 they will sell a million of the things."
- http://www.theinquirer.net/gb/inquirer/news/2008/02/08/hd-radio-spinn...
-

I BOC'Deed and Half-Crocked,

OK lets see if I can get the Numbers correct :
In 2006 there were 40,000 "HD" Radios Sold
In 2007 there were 330,000 "HD" Radios Sold = 725% Increase
For 2008 there will be 1,000,000 "HD" Radios Sold = 203% Increase

Question - How Is This Bad News For "HD" Radio ?

So in reality . . .
Point-of-Fact : Consumers Are Buying "HD" Radios !
http://groups.google.com/group/hd-radio/msg/c5ceff9dc86b1b77

Using 2008 as a Baseline and an 'Average'
of a 200% Increase for Seven (7) Years :
2008 = 1 Million HD Radios Sold with 1 Million in use.
2009 = 3 Million HD Radios Sold with 4 Million in use.
2010 = 9 Million HD Radios Sold with 13 Million in use.
2011 = 27 Million HD Radios Sold with 40 Million in use.
2012 = 81 Million HD Radios Sold with 121 Million in use.
2013 = 243 Million HD Radios Sold with 364 Million in use.
2014 = 729 Million HD Radios Sold with 1+ Billion in use.
Every Household and Car/Truck along with Every Work
Place in the USA will have One or more "HD" Radios.

So 'potentially' within Seven (7) Years "HD" Radio will be
the most common type of "Free" Over-the-Air Radio that
is used and Listened-To by just about every American.

Again - How Is This Bad News For "HD" Radio ?

uhhhhhhhhhh ..... duhhhhhhhhh ..... you must be one of those city boy posers cuz 'coon hunt'in is ALWAYS done in the winter and mid winter is best.

spring through fall 'coons are breeding and raising their young and there is the possibility of meat worms (tric) when the weather is warm as well. it's too hard on the dogs (you know about 'coon dogs doncha ?) in hot weather too , to be runn'in for all hours of the night (you did know that 'coon hunt'in is done at night didncha ?)

the little issue of legalities about winter hunting season of 'coons don't bother us country boys all that much , but even poachers know if you disrupt the breeding - rearing season, there ain't gonna be any more 'coons !

The stations could rent out their secondary channels to foreign language
broadcasters. It works way better than SCA.

I am new to SW and really have no idea what to get. I am really just looking for one to use in an emergency situation but I would teach myself how to use it. Something that would let me listen in on all kinds of possible transmissions. I would like something that is not too large (easily fit in a backpack). Also able to run off of batteries.

What do you really get when you step up from a hand held to a base station type unit? I imagine it is power. Do those require a license to operate?

Thank you!
Karl

No need to read the rest of your replies to Peter since all are on this
simple level of thinking. You are going up in the ratings again and you
get extra points for use of the smiley face. Good work Billy.

If you understand it explain to the audience peak power relative to RMS
and how they relate in terms of transmitter capacity needed for a
digital signal verses analog.

We all know how to search for a topic on web pages. Heck, if you know
how to do it what makes you think others don't know how?

This post is just another fine example of copy and paste with no
explanation by RHF as why you want to go use the links or what he liked
about them.

So get a clue RHF. Oh, wait that's right you don't know how to get one
of those. I'd post a link to a clue if it would help you.

>than our share.

Based on other folks responses I would say their reading comprehension needs a bit of work. Aside from that - nutjobs on any side of the political spectrum are cause for concern. I also suggest it's time for both Americans and Candians to stop lashing out at each other and agree to disagree on our difference. Kinda like Rodney King said, why can't we all just get along?

Okay, I'm stepping down from my soapbox now and putting on my nomex suit as I'm sure some will flame me for such an idea.

4250. Shortwave listening on motorcycle

Newsgroup: rec.radio.shortwave
Date: 2008-02-16 23:26:01 UTC
From: Jim <nospam@nospam.com>
Message-ID: <vtrer35drgn5ru13nn1bcsg2ve3q9cdu9f@4ax.com>
Source record: 137168

I wonder if anyone out there has done any shortwave listening while riding your motorcycle? If so, I'd be interested in your setup and what kind of results you had or are having. I'm thinking of trying to come up with something to listen while daytripping.

What type of headset did you use under your helmet? Wired or wireless? What antenna did you use and where did you mount it?

Trying to get some ideas from people who have actually done it.

Thanks,

4252. UNID 6250 kHz

Newsgroup: rec.radio.shortwave
Date: 2008-02-17 00:30:00 UTC
From: Koikus <kirk74601@sbcglobal.net>
Message-ID: <5baf3cc9-39d5-4d8e-8654-223e00e680f8@72g2000hsu.googlegroups.com>
Source record: 137170

This afternoon I had an interesting UNID on 6250 kHz from t/in 2200
until
they signed off at 2246 UTC. I have much electrical noise here; the
sig
was fair, and finally at 2244 I started hearing bits and pieces of
audio. The station seemed to be broadcasting in English. After a W
ancr
spoke, they went into some unusual music that reminded me a bit of
Irish folk-type music. Then they signed off. Anyone else happen to
catch this or perhaps have any ideas?

Not hardly, only a moron like you could come up with such a twisted
conclusion. The reason for the lack of posts is everyone is out
celebrating the departure of dx"hershey squirts"ace.

The truth behind (no pun intended) his departure is his incontinence
has become so severe he can't stray far enough from the bathroom to
get to his computer. Couldn't happen to a more deserving asshole (no
pun intended).

Telamon -wrt- I will see your <Snip> with a : snip, Snip. SNIP !

Here You Go Again [YoYo] Poluting another On-Topic Shortwave
Radio related Post with you "Clueless" Antics.

So lets change the Subject Line to what the Subject has
Evolved into : (OT) : Hey It's Telamon - My Personal "YoYo"

Telamon - Are You That Staved For Attention ? {I Am :-}

- We all know how to search for a topic on web pages.

Telamon - Clearly You Do - But I did not know that You were
Appointed as the Spokes Person for Everyone Else Here.

- Heck, if you know how to do it what makes you think
- others don't know how?

Dang Telamon - Sometimes People go to a Restaurant
just to have Food Served Up To Them on a Platter.

- This post is just another fine example of copy and paste
- with no explanation by RHF as why you want to go use
- the links or what he liked about them.

Telamon - Now this is bordering on Really Really Clueless.

EXAMPLE :
The Elecraft K3 Transceiver : Two-Minute Video and a lot more . . .
http://www.youtube.com/watch?v=NUxhVKfXf4k

What more is need then this for the Read to decide what
they want to do : -Choice-
[ ] Watch a Two-Minute Video on the Elecraft K3 Transceiver
[ ] Note watch a Two-Minute Video on the Elecraft K3 Transceiver
Give the average Newgroup Read some credit for having a "Clue".

- So get a clue RHF.

Telamon - I Don't Need A Clue. {I Have You}

- Oh, wait that's right you don't know how to get one of those.

Telamon After-all - I Have You To Personally Give Them To Me ;-)

- I'd post a link to a clue if it would help you.

Telamon - Oh Please Please Do - I Await Your Every Word
and I know Countless {Rymes with Clueless} Other Do Too !

- --
- Telamon
- Ventura, California
-

Telamon - Now you can go back to Playing "Ping-Pong" with d'Eduardo.
(OT) : What About : The d'Eduardo "Ping-Pong" Players List ?
http://groups.google.com/group/rec.radio.shortwave/msg/9cb402a4ed9a106a
. - = Just For The Fun Of It ! = - .

Telamon - Hopefully my reply has been more entertaining then
your thoughts about the quality of my original post on the :
The Elecraft K3 Transceiver : Two-Minute Video and a lot more . . .
http://groups.google.com/group/rec.radio.shortwave/msg/de5932e3a8f04bd6

Butt for more Off-Topic Entertainment try "Bongo News"
http://www.bongonews.com/layout3.php?event=3236
http://www.bongonews.com/layout3.php?event=3234
Honestly "Bongo News" is much more Off-the-Top-ical
and Entertaining then both Telamon or myself {RHF}.

d'Eduardo,

Since "HD" Radio starting with a low 1% of the Analog ERP :
Why would not the Radio Station's Chief Engineer or some
Corporate Media Type; have simply Bought an HD Transmitter
or Power Amp that would have been capable of at least 10%
of the Analog ERP. [Dial-it-Up -or- Dial-it-Down]

Knowing that over time {Years of Implementation} the Digital
"HD" Signal Power would be increasing to meet the needs
of the Radio Station's Listeners and to fill-in the Radio Station's
Signal to fully cover the Service Contour.

PRICE REDUCED!

I have an excellent Drake SW-2 shortwave receiver for sale,
at an excellent price. Performs great and is in "just like new"
condition.

Features include:

* Continuous frequency coverage from 100 Khz to 30 Mhz
* Modes: AM, CW, USB, LSB
* Tuning Steps 50 Hz or 5 Khz
* Stores up to 100 Independent, programmable memories
* Built-in Selectable Sideband Synchronous Detector (Sync Detector)
effectively reduces or eliminates distortion due to fading signals
* Front-panel mounted internal speaker
* 1/8" headphone jack, 1/4" external speaker jack
* Front-panel mounted RF gain control
* Dual antenna input terminals (50 ohm feedline or wire antenna
* Front-panel LED frequency display
* LED Bar graph signal strength display
* Includes Drake A/C Adaptor
* Can also be run off of a 12 Volt DC power source
* Size: 10 7/8" Wide X 4 3/8" H X 7 5/8" D
* Weight: 5.8 lbs including A/C adaptor

* Includes original Drake SW-2 Owners Manual

Price is (lowered to) $ 200.00 plus actual cost of insured shipping
(to Cont'l U.S. only). Payment by USPS Postal Money Order only,
please. An excellent receiver offered at an excellent price.

Tnx & 73,

-Bill

Take you spamming crap with you. We "know" how to find stuff on e-bay,
google, yahoo and whatever else you try to "inform" us of.

You must have sat directly in front of a microwave antenna for months
at a time.

Telamon has you pegged for the ultimate dork that you indeed are!

Many, many regular posters from the past have also left for whatever reasons, left the hobby, different hobby or more than likely, RHF's idiotic antics and lengthy replies/posts.

I don't see the names I used to see here and I seldom post, for a multitude of reasons, but RHF is one of them. Roy should either take more meds or pull the trigger.

Ya know, he might just start a thread asking people to vote on their
preference. And yes, many positive contributors have left over the
years and I'm sure has a lot to do with the signal to noise ratio.

I suggest you use the "Re: The RRS no-spin clueless factor report"
thread. I post weekly results here Sunday night. So far on volume,
incomprehensibility, copy and paste, and cluelessness RHF is going to
be a winner three weeks in a row.

Don't need the report - all I have to do is look at the threads and
see that so many of them are from RHF that the posting volume is self
evident. As to his writing style - never could follow it and those
times when I could begin to see what he was saying.....it wasn't
anything worth wading through the mud for.

As far as shortwave goes I may just put aside the 'real stuff' I'm
supposed to be doing today and browse the bands listening for world
opinion on the Kosovo declaration of independence.

Do you truly live by rule ¥3?
.............remember, all your posts regarding Telamon are not
contributions to the group they are part of your ongoing 'fued' with
him. Though I am certain you see it as a contribution it isn't; in
fact after the first few the entertainment value ceased. Do remember
that newsgroups, like radio, need a good signal to noise ratio.

-
- Don't need the report - all I have to do is look at the threads
- and see that so many of them are from RHF that the posting
- volume is self evident. As to his writing style - never could
- follow it and those times when I could begin to see what he
- was saying.....it wasn't anything worth wading through
- the mud for.

GH - See you have Mastered # 2 :o) ~ RHF

- As far as shortwave goes I may just put aside the 'real stuff'
- I'm supposed to be doing today and browse the bands listening
- for world opinion on the Kosovo declaration of independence.

GH - Now see there I did learn something from reading
your Reply : "The Kosovo Declaration of Independence"
About which the BBC + VOA + CRI + DW + VOR say :

- = S N I P = -

Editorial Note : (OT) : An Evening of [Near] Silence
{ Except for the Noise from RHF }

Lets add an (OT) for Off-Topic to the Subject Line
since it is real about the Personalities {Members}
of this NewsGroup and has nothing to do with the
Topic of Shortwave Radio.

Plus - I guess it has Morphed from being about DX Ace
into Being About Me {RHF}.

This should give the Readers of this Newgroup a break
from the Continued Dialog about the # 1 Clueless Poster
here on Rec.Radio.Shortwave : That Being Me {RHF}.

Most of you who have News Readers should have your
Filters set for "RHF" and "Clueless" to help you to over
look and by-pass these Posts and Replies.

hope this helps - the # 1 'clueless' poster boy ~ RHF
.
.
- - # 3 - Reply When : You Have Something To Contribute.
- - {Act Naturally By Being Yourself}
- - .
-
- Do you truly live by rule #3?

GH -first- Not Rules -just- How To Enjoy {There is a Difference.}
[Do As I Say {Suggest} : Not As I Do :<]

HOW TO ENJOY NEWSGROUPS :

1 - Post About What You Are About.
{Be Here For Yourself}

2 - Read Only What You Want To Read.
{Skip - Ignore the Rest}

3 - Reply When : You Have Something To Contribute.
{Act Naturally : By Being Yourself}
.
Addendums :

"A" - Don't Get Punked-Out by some want-to-be NewsGroup
OverLord -aka- Net-Nazi.

I may consider it when two things happen:
1) You follow the rule also, which you do not in many of your posts,
like the one earlier today in your feud with Telamon.
2) When "OT" again means "Off Topic" to the extent it currently can be
used to mean "On Topic."

I certainly am not a computer expert, Velocity Micro in Richmond,Virginia tweaked the Windows Home Edition XP in my computer when they built it for me.(I paid $1,440.00 for my Velocity Micro ProMagix desktop computer, and I am glad I did) although I do subscribe to snail mail delivery PC World www.pcworld.com and Smart Computing www.smartcomputing snail mail magazines.I reckon as how I might as well mentionfy I also subscribe to Popular Mechanics www.popularmechanics.com snail mail and Popular Science www.popsci.com snail mail magazines too.

Hey, about six weeks ago, out of the wild blue yonder, I received a snail mail card from Playboy magazine, Harlan,Iowa.One dollar purrrr issue for one year.Naturally I peeled off that little sticker and I put it where the card said to put it.Next mawnin, I put that card in my snail mail box and I raised that flag up on my snail mail box by the side of the road.A few days ago, my March 2008 Playboy magazine showed up here.Ahhhhh,,,, makes me feel like a sixteen year old boy again! cuhulin

> Good deal. I already have one.

Yes, I believe it's a very good deal on a nice, clean shortwave
receiver that really performs very well.

Would you like a second Drake SW-2, perhaps? <g>
A matched pair.

Hi Bill,

I might be interested in the radio. Does it have the remote? I emailed you but didn't get a reply.

Hi Barry,

I'm sorry I didn't receive your e-mail; I've received several inquiries today about the SW-2, which is still available at this time.

I do not have the remote for this receiver, though there was one originally designed and sold for the SW-2.

Please try to e-mail me again, and hopefully I will receive it.

73,

Almost, but not quite, all these postings on this thread only further remind me of why I spend more time at the dials and am getting more out of shortwave newsgroups with a fraction of the membership as this one!

Morning Roy,

You run a very good antenna information group that I have enjoyed for years, thank you.

I think a lot/most of the people here respects your thoughts and opinions about radios and life, I do!

But the format that you use is a little hard for me to follow and it seems to get mixed in with your signature. Maybe a few others feel this way.

I think I have said something about the length of your signature in the pass and also repeating the post in the reply. I have to pay buy the length of the post that are in the newsgroup so that cost me money and I find that I have very little interest in all the stuff in your signature.

Off Topic (OT) is find if "we" mark it as such, I post OT stuff, if someone doesn't want to read it, don't open it.

Please don't take offence to this post, I am writing out of respect and I am not trying to offend.

Burr

Other than the Usenet amateur radio hierarchy, what other "shortwave newsgroups" are there? (or do you refer to other types of forums not on Usenet?) Certainly there are mailing lists with a higher S/N ratio.

Michael

4311. Kosovo - any shortwave broadcasting?

It's the newest country on the planet, having declared its independence today. They like Americans too. What are the odds on that?

http://www.nytimes.com/2008/02/18/world/europe/18kosovo.html

Kosovo Declares Its Independence From Serbia

By DAN BILEFSKY
Published: February 18, 2008

PRISTINA, Kosovo -- The breakaway province of Kosovo declared independence from Serbia on Sunday, sending tens of thousands of ethnic Albanians streaming through the streets to celebrate what they hoped was the end of a long and bloody struggle for national self-determination.
....

In an outpouring of adulation for the United States, the architect of NATO's 1999 bombing campaign against Serbian forces under President Slobodan Milosevic, thousands of revelers unfurled giant American flags, carried posters of former President Bill Clinton and chanted "Thank you U.S.A." and "God bless America."
==========

They're ethnic Albanians. The capital is Pristina. I have no idea what sort of broadcasting facilities they have.

We used to discuss the subject here but RHF hijacks all the threads.

> I think a lot/most of the people here respects your thoughts and
> opinions about radios and life, I do!

Not me. First off very little of his posts are his thoughts and tiny bit
that is, he usually gets wrong.

> But the format that you use is a little hard for me to follow and it
> seems to get mixed in with your signature. Maybe a few others feel this way.

You seem to be the only person to notice that.

He has me in his signature. I'm flattered.

> Off Topic (OT) is find if "we" mark it as such, I post OT stuff, if
> someone doesn't want to read it, don't open it.

I've had this argument in the past with him. This marking threads OT is
BS. If you think a post does not belong in the news group don't post it.
And while I'm on the subject so is changing the subject line in the
middle of a discussion. It screws people up that sort posts by subject.

> Please don't take offence to this post, I am writing out of respect and
> I am not trying to offend.

Feel free to be offended.

RHF, you are rooting for HD? I almost can't believe my eyes. It's like
hearing Greenpeace root for increased use of fossil fuels.
